BioChip Journal (BioChip J), launched in 2007, is owned and published by the Korean BioChip Society. It is published four times a year in printed and electronic versions. Its editorial policies are the responsibility of the editor, the associate editors, and the editorial board under the general authority of the Publications Committee and the Council. BioChip Journal is abstracted in Science Citation Index Expanded (SciSearch), Journal Citation Reports/Science Edition, SCOPUS, INSPEC, EMBASE, Chemical Abstracts Service (CAS), Google Scholar, Academic OneFile, Biological Abstracts, BIOSIS, EI-Compendex, OCLC, SCImago, and Summon by Serial Solutions.

Scope of Journal: BioChip J publishes original research and reviews in all areas of the biochip technology in the following disciplines, including protein chip, DNA chip, cell chip, lab-on-a-chip, bioMEMS, biosensor, micro/nano mechanics, microfluidics, highthroughput screening technology, medical science, genomics, proteomics, bioinformatics, medical diagnostics, environmental monitoring and micro/nanotechnology. The Journal is committed to rapid peer review to ensure the publication of highest quality original research and timely news and review articles.

Types of papers: Two types of papers may be submitted, full-length papers and minireviews. Authors are urged to keep the length of papers below eight printed pages (24 typed pages of manuscript in double spacing including figures and tables). Language of paper: All manuscripts should be written in English. Authors whose first language is not English are requested to have their manuscripts checked carefully for linguistic correctness before submission. All manuscripts submitted for publication will be screened for English by the professional English editor in the Korean BioChip Society.

Publication charges: Authors will be assessed USD $50.00 (KRW 50,000) for each page with all published manuscripts.

Color charges: Authors will be assessed USD $150.00 (KRW 150,000) for each page with color figure(s). Color figures can generally be reproduced in acceptable quality in black and white if authors are unwilling or unable to pay for color charges.

Copyright: As a condition of publication, all authors must transfer copyright to the Korean BioChip Society. Authors should submit Copyright Transfer Agreement at the time of paper submission. Material transfer: Authors of papers published in BioChip J are obligated to honor any reasonable request by qualified investigators for unique propagative materials, such as cell lines, proteins and DNA clones, that are described in the paper. Review protocol: All manuscripts submitted to BioChip J are reviewed critically, and it is the responsibility of the editor, the associate editors, and the editorial board to determine their suitability for publication. After receipt of a manuscript by the editor, it is sent to an associate editor who usually assigns it to a member of the editorial board. The board member then makes a definitive recommendation for acceptance, revision, or declination based on the scientific merit and technical quality of the studies reported. Referees may be consulted when additional expertise is required. All board members and referees who review a manuscript remain unknown to the authors. Every manuscript is treated by the reviewers as a privileged communication.

Manuscript submission: All submitted manuscript should contain original research that has not been published previously and is not under consideration for publication elsewhere. Submit a digital file including high quality graphics prepared in appropriate formats. A letter must be included indicating the address, telephone and fax numbers, and E-mail address of the corresponding author. Microsoft Word is preferred, although other formats are generally acceptable. Manuscript and other materials will not be returned unless specifically requested. Submit manuscripts and cover letter to: www.biochipjournal.org or www.editorialmanager.com/bicj

Organization of the manuscript:
Contributions should be double-spaced and written in English (spellings as in the Oxford English Dictionary). Contributions should be organized in the sequence: title, text, methods, references, Supplementary Information line (if any), acknowledgements, tables, figure legends. When providing word counts for the editors, authors need only state the number of words in the text (and, separately, methods and total figure legends). Title, ac-
knowledgements and other matter does not need to be included in the word count.

**Title:** Titles do not exceed 90 characters (including spaces), and do not normally include numbers, acronyms, abbreviations or punctuation. They should include sufficient detail for indexing purposes but be general enough for readers outside the field to appreciate what the paper is about.

**Text:** Full-length papers and minireviews should fill no more than 8 pages of BioChip J. An uninterrupted page of text contains about 300 words. A typical papers and reviews contain about 3,000 words of text and, additionally, about five display items (figures and/or tables) with brief legends. When submitting new or revised manuscripts, authors should state in a cover letter to the editor their rough estimate of the length of their paper in terms of number of pages of BioChip J. Longer papers are sometimes allowed but only if explicitly suggested by the editor. Authors of contributions that significantly exceed the limits stated here or specified by the editor will have to shorten their papers before acceptance, inevitably delaying publication. BioChip J prefers authors to be listed without details of relative status, but instead to specify the contribution made by their coauthors in the acknowledgements. BioChip J strongly encourages coauthors to specify their contributions in this way. If authors regard it as essential to indicate that two or more coauthors are equal in status, they may be identified by a symbol with the caption ‘these authors contributed equally to the work’ immediately under the address list. Present addresses appear immediately below the author list; all other essential author-related explanation is in the acknowledgements. Authors should format articles or letters using BioChip J’s Microsoft Word template, and before finalizing their manuscript should use the author’s checklist for format (applies to revised manuscripts as well as original submissions). The style tags in the template should be deleted before submission.

**Units:** The SI system should be used for all dimensional quantities.

**Methods:** If brief (less than 200 words in total), they can be included in the text at an appropriate place. Otherwise, they should be described at the end of the text in a ‘Methods’ section, subdivided by short, bold headings referring to methods used. Descriptions of methods already published should be avoided; a reference number can be provided to save space, with the new addition or variation briefly stated. This whole section should not exceed 800 words and should ideally be shorter. If more space is required for Methods, the editor may suggest use of online-only supplementary information for this purpose after submission and after receiving referees’ reports. Supplementary material is peer-reviewed.

**References:** References are each numbered, ordered sequentially as they appear in the text, methods, tables, figure legends. When cited in the text, reference numbers are superscript, not in brackets unless they are likely to be confused with a superscript number. The maximum number of references, strictly enforced, is 50 for full-papers. Only on publication can be listed for each number. Only articles that have been published or submitted to a named publication should be in the reference list; papers in preparation should be mentioned in the text with a list of authors (or initials if any of the authors are coauthors of the present contribution). Published conference abstracts, numbered patents and preprints on recognized servers may be included in reference lists, but text, grant details and acknowledgements may not.

All authors should be included in reference lists unless there are more than five, in which case only the first author should be given, followed by ‘et al.’.

Please follow the style below in the published edition of BioChip J in preparing reference lists.

Authors should be listed surname first, followed by a comma and initials of given names.

Titles of all cited articles are required. Titles of articles cited in reference lists should be in upright, not italic text; the first word of the title is capitalized, the title written exactly as it appears in the work cited, ending with a full stop. Book titles are italic with all main words capitalized. Journal titles are italic and abbreviated according to common usage; authors can refer to BioChip J, the Index Medicus or the American Institute of Physics style manual for details.

Volume numbers are bold. The publisher and city of publication are required for books cited (Refer to published papers in BioChip J for details).

References to web-only journals should give authors, article title and journal name as above, followed by url in full or doi if known - and the year of publication in parentheses.

References to websites should give authors if known, title of cited page, url in full, and year of posting in parentheses.

Examples, Author name (1 to 5 authors : write all author’s name, 6 and more: 1st author name et al.,) paper
title, journal title (It is the same with Nature Genetics’ style except for ISO Abbreviation. Title italic) volume, pagination (year).

**Acknowledgements:** Acknowledgements are brief and follow the reference list. Authors are encouraged to include a statement to specify the contributions of each coauthor. Acknowledgements contain grant or contribution numbers, but do not contain thanks to anonymous referees and editors, or effusive comments.

**Tables:** Tables should each be presented on a separate page, portrait (not landscape) orientation, and upright on the page, not sideways. Tables have a short, one-line title in bold text. Upright roman (not bold or italic) type of the same size as the rest of the text is used. The body of the table should not contain horizontal or vertical rules; these will be added by BioChip J when necessary after the paper has been accepted for publication. Tables should be as small as possible. Bear in mind the size of a BioChip J page as a limiting factor when compiling a table and ensure it will reduce appropriately.

Symbols and abbreviations are defined immediately below the table, followed by essential descriptive material as briefly as possible, all in double-spaced text.

**Figure legends:** Figure legends should be listed one after the other, as part of the text document, separate from the figure files. Please do not write a legend below each figure. Each figure legend should begin with a brief title for the whole figure and continue with a short description of each panel and the symbols used. For contributions with methods sections, legends should not contain any details of methods, or exceed 100 words (fewer than 500 words in total for the whole paper). In contributions without methods sections, legends should be fewer than 300 words (800 words or fewer in total for the whole paper).
Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all co-authors, if any, as well as – tacitly or explicitly – by the responsible authorities at the institution where the work was carried out. The author warrants that his/her contribution is original and that he/she has full power to make this grant. The author signs for and accepts responsibility for releasing this material on behalf of any and all co-authors. Transfer of copyright to The Korean BioChip Society and Springer becomes effective if and when the article is accepted for publication. After submission of the Copyright Transfer Statement signed by the corresponding author, changes of authorship or in the order of the authors listed will not be accepted by The Korean BioChip Society and Springer. The copyright covers the exclusive right (for U.S. government employees: to the extent transferable) to reproduce and distribute the article, including reprints, translations, photographic reproductions, microform, electronic form (offline, online) or other reproductions of similar nature.

An author may self-archive an author-created version of his/her article on his/her own website. He/she may also deposit this version on his/her institution’s and funder’s (funder designated) repository at the funder’s request or as a result of a legal obligation, including his/her final version, provided it is not made publicly available until after 12 months of official publication. He/she may not use the publisher’s PDF version which is posted on www.springerlink.com for the purpose of self-archiving or deposit. Furthermore, the author may only post his/her version provided acknowledgement is given to the original source of publication and a link is inserted to the published article on Springer’s website. The link must be accompanied by the following text: “The original publication is available at www.springerlink.com.”

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publishers. The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publishers can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA: Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, USA, Tel.: + 1-978-7508400, Fax: + 1-978-6468600, http://www.copyfight.com, stating the ISSN of the journal, the volume, and the first and last page numbers of each article copied. The copyright owner’s consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publishers.

Research Data Policy

The journal encourages authors, where possible and applicable, to deposit data that support the findings of their research in a public repository. Authors and editors who do not have a preferred repository should consult Springer Nature’s list of repositories and research data policy.

☞ List of Repositories
☞ Research Data Policy

General repositories - for all types of research data - such as Figshare and Dryad may also be used. Datasets that are assigned digital object identifiers (DOIs) by a data repository may be cited in the reference list. Data citations should include the minimum information recommended by DataCite: authors, title, publisher (repository name), identifier.

☞ DataCite

Springer Nature provides a research data policy support service for authors and editors, which can be contacted at researchdata@springernature.com. This service provides advice on research data policy compliance and on finding research data repositories. It is independent of journal, book and conference proceedings editorial offices and does not advise on specific manuscripts.

☞ Helpdesk

Online First

The article will be published online after the proof. This is the official first publication citable with the DOI. After release of the printed version, the paper can also be cited by issue and page numbers.
