Call for paper

Advances in Manufacturing is a newly re-launched journal with Professor Kuang-di XU, former President of the Chinese Academy of Engineering, and Professor Ji ZHOU, President of the Chinese Academy of Engineering, as the Honorary Editors-in-Chief, and Professor Hong-jie LUO, President of Shanghai University, as the Editor-in-Chief. It is sponsored by Shanghai University.

Papers presenting new and original research on accomplishments related to modern manufacturing, including, but not limited to, manufacturing automation, mechatronics and robotics, precision manufacturing and control, micro-nano manufacturing, metallic and nonmetallic materials in manufacturing, green manufacturing, design manufacturing, metallurgical process, etc. Review articles and short communications in these areas are also welcome.

Submitted manuscripts must not be published or under consideration for elsewhere. All manuscripts should be submitted to the journal through the online system at http://www.aim.shu.edu.cn. Authors should allow approximately 8 weeks for an initial review cycle.

**Full manuscript:** A manuscript must include title, names of authors and their affiliation, abstract, text, figures and tables, references, and a brief introduction to all authors. The name(s) of any sponsor(s) of the research along with the grant number(s) should be included.

**Abstract and keywords:** A short abstract should appear at the beginning of the paper after title, author name(s), and affiliation. The abstract should have no more than 150 words and cover research objectives, assumptions and methods of solution, results, and conclusions. Indexing keywords are mandatory. Please choose 4 to 6 keywords that describe the main points or topics of the article.

**Figures and tables:** Each figure and table should have a caption to explain contents concisely and intelligibly, and be numbered consecutively.
**Abbreviations:** The journal follows generally used standards on units and abbreviations. The full text for an abbreviation must be given when it appears for the first time unless it is widely known to the intended readers.

**References:** All references should be archived materials such as journal articles, books, and conference proceedings. References require a complete author list, a complete title, and first and last pages cited for each entry. Personal communications and unpublished data are not acceptable.
