**Contributions Type**

**Research Articles:** (including references, notes, captions and appendix, the same as below, no more than 10 printed pages) are expected to present original and new advance on the emerging fields of communications and information networks. Research Articles include an abstract about 250 words, 5~8 key words (the same as below), an introduction, sections with brief subheadings, conclusion, and up to 60 references. Additional supplemental material is permitted as appendix in the end of the article.

**Reviews** (no more than 15 printed pages) should describe and synthesize recent developments of communications and information networks significance and highlight future directions. They include an abstract, an introduction that outlines the main theme, brief subheadings, an outline of important unresolved questions, and up to 100 references.

**Commentaries:** Comment on new research advances and potential scientific significance of a most recent exciting research in communications and information networks.

**Preparing Your Manuscript**

Preparing a manuscript that follows our guidelines concerning length, style and acceptable file formats will facilitate the evaluation process. Manuscripts are suggested to be arranged in the following order:

- **Titles:** Concise and informative.
- **Authors:** Corresponding author should be marked with superscript asterisk (*).
- **Affiliated** institutions linked by the same superscript numbers on authors.
- **Abstracts** (up to 250 words) should explain to the general reader why the research was done, what was found and why the results are important. They should start with some brief BACKGROUND information: one or two sentences giving a broad introduction to the field comprehensible to the general reader, and then a brief summary of more detailed background specific to your study. This should be followed by an explanation of the OBJECTIVES/METHODS and then the RESULTS. The final sentence should outline the main CONCLUSIONS of the study, in terms that will be comprehensible to all our readers. Please do not include citations or abbreviations in the Abstract.
- **Keywords:** Provide a list of 5–8 words/phrases.
**Funding**: A listing of complete funding information should be placed in the footnote of the front page.

**Main Text**: The manuscript should start with a brief introduction describing the paper’s significance. The introduction should provide sufficient background information to make the article intelligible to readers in other disciplines, and sufficient context that the significance of the experimental findings is clear. Technical terms should be defined. Symbols, abbreviations, and acronyms should be defined the first time they are used. All tables and figures should be cited in numerical order. All data must be shown in the main text. References to unpublished materials are not allowed to substantiate significant conclusions of the paper.

**Acknowledgments** of grants, funds, people, etc., should be gathered into a paragraph after the main text.

**References** are numbered in the order in which they are cited, first through the text, then through the figure and table legends. Each reference should have a unique number; do not combine references or embed references in notes. Reference examples:

**Journal [J]**

**Conference proceedings [C]**

**Monograph [M]**

**Dissertation [D]**

**Electronic bulletin board online[EB/OL]**

**Standard [S]**

Submitting Your Manuscript
We accept submissions only online. Authors and reviewers must have an account to sign into our manuscript submission and information portal at https://www.editorialmanager.com/jcin/default.aspx. If you do not have an account, you will need to create one, but then can use this account for any future submissions to JCIN.

Manuscript Selection
JCIN is committed to thorough and efficient evaluation of submitted manuscripts and adopts a rigorous peer-review procedure. Papers are assigned to a staff editor who has knowledge of the field discussed in the manuscript and select papers for in-depth review. Research papers that are selected for in-depth review are evaluated by at least two outside referees. The entire review process may take 60 to 90 days. Authors of papers that are not selected are notified promptly, within about 2 weeks.

Online First
The article accepted will be published online first after returning the corrected proofs. This is the official first publication citable with the DOI.

Publication
The printed version will be released with issue and page number according to annual plan. The online version will have appeared on JCIN and Springer together. (JCIN and Springer will co-publish and distribute our Journal)
