READ-ME for authors

Basic requirements
Legal requirements and conflict of interest
Technical requirements and writing style
Conventions on scientific presentation
Important requests

Basic Requirements
To be considered for publication in ACQUAL, the topic of an article must comply with the journal's scope as outlined in the section Aims and Scope. The development of analytical methods, their applications in a given case and their characterization by figures of merit can be considered to fall within the scope of the journal when metrological aspects - such as metrological traceability or measurement uncertainty - prevail.

All manuscripts must be in English. Non-native speakers of English are strongly advised to have their manuscripts corrected by a native speaker prior to submission, in order to avoid unnecessary constraints of the reviewing process. The production of the journal includes basic language editing, but cannot clarify scientific issues which are not comprehensible from the manuscript. The editors reserve the right to withhold manuscripts from the reviewing process as long as the quality of English in the manuscript is not ensured by the author(s).

A manuscript should be optimized for one of the topical sections structuring ACQUAL's content. The according attributes are listed in the section Article Types.

Legal Requirements and Conflict of Interest
The section Manuscript submission summarizes legal prerequisites. Authors are requested to submit their manuscripts online (Submit Online). Uploading your manuscript confirms your intention to have it published in ACQUAL.

Authors are responsible to declare any Conflict of Interest, whether caused by financial reasons, e.g., by financial relationship with the organization that sponsored the research, or related to personal commitments. The declaration must be given in a separate section 'Disclosure' of the submitted manuscript.

The relevant sources of funding for the work in the manuscript must be disclosed. The sources are to be mentioned in the section 'Disclosure', unless stated in the section 'Acknowledgment'.

Technical Requirements and Writing Style
Please refer to the sections on the right:

- Text (information on formatting, the usage of headings, abbreviations, and footnotes)
- Title page (title, keywords, abstract)
- References
- Tables
- Art work
- Electronic Supplementary Material (ESM).
Concerning the **Writing Style**, authors are kindly asked to keep in mind the diversified audience of the journal. When dealing with specialized topics, an introduction will be appreciated which gives readers a chance to follow the author's argumentation. Terms which are specific for a specialized subfield should be introduced and abbreviations should be explained the first time they are used in the main text. On the whole, the presentation should be as concise as possible, avoiding repetition or duplication of data in Tables and Figures and in the Text.

**Conventions on Scientific Presentation**

To promote global understanding of metrological information and data, *the journal requests all authors to comply with international conventions for concepts, terms, quantities, and units as well as formal presentation* as laid down in, e.g.,

"VIM3" International Vocabulary of Metrology – Basic and General Concepts and Associated Terms (VIM), 3rd edn.;

GUM Supplement 1, Evaluation of measurement data,

"SI Brochure"
The International System of Units (SI), 8th edn.; BIPM 2006

"IUPAC Green Book"

ACQUAL’s series of Tutorials "Recommendations on quantities, symbols, and measurement units for publication in ACQUAL"
- *Reporting measurement results in chemistry* (2007)
  Accred Qual Assur 12:497-498
- *Reporting measurement uncertainty in chemical analysis* (2008)
  Accred Qual Assur 13:113-114
- *Correct use of equations for calculating chemical measurement results* (2008)
  Accred Qual Assur 13:731 DOI 10.1007/s00769-008-0455-x
- *Preparation of tables and graphs* (2011)
  Accred Qual Assur 16:53 DOI 10.1007/s00769-010-0734-1
to be continued

* available free of charge

Please give your special attention to the section **Compulsory Conventions**

*These conventions should be used whenever possible, and deviations must be indicated explicitly and explained.*

ACQUAL’s Editors reserve the right to reject a manuscript not complying with these conventions or to adjust it to ACQUAL's standards.
Nomenclature
IUPAC rules must be used for designating chemical compounds. The use of tradenames alone to identify compounds such as drugs, pharmaceutical products, or pesticides is not allowed. For proprietary substances, materials, and instruments, the correct designation and the manufacturer’s name should be indicated. Trademarks and Registered Trademarks must be designated as such in the text.

Important requests
- Formal presentation should comply with international convention (see below)
- Please activate page numbering option
- Abstract should comprise 150-250 words
- Please upload diagrams without frame and headline, but provide explicative captions
- Using colored or grey background in Figures or Tables is not encouraged
