Part I  Fundamentals

1 History of Nasal Reconstruction .................................................. 3
   Early Nasal Reconstruction .................................................. 3
   The Italian Method ......................................................... 3
   The Indian Method ....................................................... 4
   Internal Lining .......................................................... 5
   Nasal Framework ........................................................ 9
   Skin Coverage ............................................................ 9
   Recent Developments ..................................................... 10
   Conclusion .................................................................. 10
   References ................................................................. 11

2 Anatomic Considerations ......................................................... 13
   Topographic Analysis ..................................................... 13
   Aesthetic Units ........................................................... 13
   External Nasal Anatomy ................................................ 14
   Skin ......................................................................... 14
   Subcutaneous Layer ...................................................... 15
   Muscles ................................................................ 15
   External Blood Supply .................................................. 16
   External Sensory Nerve Supply ......................................... 17
   Nasal Skeletal Anatomy ................................................ 17
   Nasal Tip ................................................................ 17
   Cartilaginous Dorsum .................................................... 19
   Bony Dorsum .............................................................. 19
   Internal Nasal Anatomy .................................................. 19
   Nasal Cavities ............................................................ 19
   Septum ................................................................ 20
   Lateral Nasal Passage ..................................................... 21
   Nasal Valve ................................................................. 21
   References ................................................................. 22

3 Preparation of the Patient ......................................................... 23
   Preoperative Consultation ............................................... 23
   Photography .................................................................. 25
   Anesthesia .................................................................. 26
   Local Anesthesia ......................................................... 26
   Postoperative Care and Supplies ....................................... 27
   Hospitalization ............................................................. 28
