

# Contents

- List of figures . . . . . ix
- Author’s preface. . . . . xiii
- Acknowledgments. . . . . xvii
  
- 0 The state of the art . . . . . 1**
  - From whence we came: early computing. . . . . 1
  - Outside the computer room: early computing in aviation and space . . . . . 2
  - Computing in manned spacecraft . . . . . 3
  - Defining computer “power” . . . . . 4
  - The evolution of computing . . . . . 7
  - Technology acquisition: consumers vs the aerospace industry . . . . . 8
  
- 1 The AGC hardware . . . . . 11**
  - Introduction . . . . . 11
  - Overview of Chapter 1 . . . . . 15
  - Physical characteristics of the AGC . . . . . 16
  - Properties of number systems . . . . . 18
  - Double precision numbers. . . . . 27
  - FIGMENT. . . . . 29
  - Instructions: the basic units of computer operation. . . . . 29
  - Memory management . . . . . 31
  - A tour of low core and the central registers . . . . . 37
  - Keeping time in the AGC: timers and clocks . . . . . 47
  - Counters – CDUS (X, Y, Z, OPTS, OPTT) and PIPAS (X, Y, Z) . . . . . 51
  - Radar, engine and crew interfaces. . . . . 55
  - Memory addressing and banking in the AGC. . . . . 59
  - Interrupt processing . . . . . 68
  - The instruction set . . . . . 70
  - Communicating with the outside world: the I/O system . . . . . 87

<b>2</b>	<b>The Executive and Interpreter</b> . . . . .	99
	Introduction to the Executive . . . . .	99
	Scheduling: preemptive and cooperative multiprogramming . . . . .	101
	The Executive . . . . .	103
	The astronaut interface: the display and keyboard . . . . .	123
	Telemetry uplink . . . . .	140
	Synchronous I/O processing and T4RUPT . . . . .	143
	High level languages and the Interpreter . . . . .	150
	The Interpreter . . . . .	160
<b>3</b>	<b>The basics of guidance and navigation</b> . . . . .	199
	Hardware unique to solving guidance and navigation problems . . . . .	199
	The important questions in guidance and navigation. . . . .	209
	Question 1: Which way is up? . . . . .	209
	Question 2: Where am I? . . . . .	217
	Question 3: Which way am I going? . . . . .	222
<b>4</b>	<b>Mission programs and operations</b> . . . . .	231
	Introduction . . . . .	231
	Launch from Earth . . . . .	231
	The lunar landing . . . . .	245
	Lunar orbit rendezvous . . . . .	287
	The digital autopilot . . . . .	312
	Erasable memory programs . . . . .	334
	AGC data uplink and downlink . . . . .	337
	Command Module entry . . . . .	341
	Computer problems during Apollo 11 and Apollo 14 . . . . .	358
	<b>Epilogue</b> . . . . .	365
	<b>Appendixes</b> . . . . .	369
	A: AGC instruction set . . . . .	369
	B: AGC interrupt vectors . . . . .	371
	C: Layout of the special and control registers . . . . .	372
	D: Command Module I/O channels . . . . .	373
	E: Lunar Module I/O channels . . . . .	379
	F: Interpreter instruction set . . . . .	386
	G: Command Module programs (Major Modes) . . . . .	391
	H: Command Module routines . . . . .	392
	I: Command Module verbs . . . . .	393
	J: Command Module nouns . . . . .	395
	K: Command Module program alarms . . . . .	401
	L: Lunar Module programs (Major Modes) . . . . .	403
	M: Lunar Module routines . . . . .	404
	N: Lunar Module verbs . . . . .	405

O: Lunar Module nouns . . . . .	407
P: Lunar Module program alarms. . . . .	412
Q: Command Module and Lunar Module downlists . . . . .	415
R: AGC navigation star catalog . . . . .	417
S: Configuring the CSM and LM DAP (Routine 03) . . . . .	418
<b>Glossary of terms and abbreviations . . . . .</b>	<b>421</b>
<b>Bibliography . . . . .</b>	<b>423</b>
<b>Illustration credits . . . . .</b>	<b>427</b>
<b>Index. . . . .</b>	<b>431</b>
