## Part I Measuring Stars

<b>1</b>	<b>Classifying and Describing Stars</b> .....	3
1.1	Celestial Motions and Times.....	3
1.2	Celestial Coordinates.....	5
1.3	Precession and Epochs .....	7
1.4	The Magnitude Scale.....	11
	Problems .....	12
<b>2</b>	<b>Introduction to Binary Systems</b> .....	13
2.1	The Two-Body Problem.....	13
2.2	The Orbital Shape .....	15
2.3	Time-Dependent Orbits .....	18
2.4	The Orbital Elements.....	21
2.5	Spectroscopic Binaries .....	24
	Problems .....	28
<b>3</b>	<b>Measuring Other Stellar Properties</b> .....	29
3.1	Distances and Parallax .....	29
3.2	Temperature and Blackbody Spectrum.....	30
3.3	Radii and Eclipsing Binaries.....	34
3.4	Boltzmann and Saha Equations.....	38
	Problems .....	43

## Part II Equations and Processes

<b>4</b>	<b>Stellar Evolution Equations</b> .....	47
4.1	The Energy Equation .....	48
4.2	Hydrodynamic Equation .....	50
4.3	Composition Equations .....	51
4.4	Virial Theorem .....	55

4.5	Total Energy .....	56
4.6	Timescales .....	58
	Problems .....	61
<b>5</b>	<b>Gas and Radiation Pressures</b> .....	<b>63</b>
5.1	Gas Pressure .....	65
5.2	Radiation Pressure .....	67
5.3	Degeneracy Pressure .....	68
5.4	Internal Energy of Gas and Radiation .....	71
5.5	Adiabatic Exponent .....	73
	Problems .....	75
<b>6</b>	<b>Radiative Transfer and Stellar Atmospheres</b> .....	<b>77</b>
6.1	The Radiation Field .....	77
6.2	Radiative Transfer .....	80
6.3	Radiative Heat Flux .....	83
6.4	Model Atmospheres .....	85
	Problems .....	89
<b>7</b>	<b>Nuclear Processes</b> .....	<b>91</b>
7.1	Nuclear Fusion .....	91
7.2	Hydrogen Burning .....	95
	7.2.1 The p-p Chains .....	95
	7.2.2 The CNO Cycle .....	97
7.3	Burning Heavier Nuclei .....	99
7.4	Neutron Capture Processes .....	101
	Problems .....	102
<b>Part III Stellar Models</b>		
<b>8</b>	<b>Simple Stellar Models</b> .....	<b>107</b>
8.1	Polytropes .....	107
8.2	Polytrope Solutions .....	113
8.3	The Eddington Standard Model .....	115
8.4	The Eddington Luminosity .....	116
	Problems .....	117
<b>9</b>	<b>Stability</b> .....	<b>119</b>
9.1	Thermal Stability .....	119
9.2	Thermal Instability .....	121
9.3	Thin-Shell Instability .....	122
9.4	Dynamical Instabilities .....	124
9.5	Convection .....	126
9.6	Mixing Length Theory .....	129
	Problems .....	131

- 10 Stellar Birth** ..... 133
  - 10.1 The Jeans Criteria ..... 133
  - 10.2 Formation of a Protostar ..... 137
  - 10.3 Contraction to Main Sequence ..... 142
  - Problems ..... 145
- 11 Main Sequence Structure** ..... 147
  - 11.1 High-Mass Stars ..... 147
  - 11.2 Low-Mass Evolution ..... 156
  - 11.3 Late-Stage Evolution ..... 158
  - Problems ..... 162
- 12 Compact Remnants** ..... 163
  - 12.1 White Dwarfs ..... 163
  - 12.2 Neutron Stars ..... 169
  - 12.3 Pulsars ..... 172
  - 12.4 Black Holes ..... 175
  - Problems ..... 178
  
- Part IV Dynamical Systems**
  
- 13 Binary Evolution** ..... 181
  - 13.1 The Roche Model ..... 181
  - 13.2 Mass Transfer Stability ..... 184
  - 13.3 Unstable Mass Transfer and Mass Loss ..... 188
  - 13.4 Binary Evolution Example ..... 191
  - Problems ..... 195
- 14 Star Cluster Dynamics** ..... 197
  - 14.1 Cluster Timescales ..... 197
  - 14.2 Globular Cluster Structure ..... 203
  - 14.3 Globular Cluster Evolution ..... 207
  - Problems ..... 211
- 15 Dynamical Evolution of Binaries** ..... 213
  - 15.1 Dynamical Formation ..... 213
  - 15.2 Binary Interactions ..... 216
  - 15.3 N-Body Integration ..... 218
  - 15.4 Binary–Cluster Interactions ..... 220
  - Problems ..... 221
  
- A Useful Constants** ..... 223
  - A.1 Physical Constants ..... 223
  - A.2 Astronomical Constants ..... 224

<b>B</b>	<b>Atomic Properties of Selected Elements</b> .....	225
B.1	Atomic Properties of Selected Elements .....	225
<b>C</b>	<b>Closest and Brightest Stars</b> .....	229
C.1	Closest Stars .....	229
C.2	Brightest Stars .....	230
<b>Solutions</b>	.....	231
<b>Index</b>	.....	259
