Contents

1 Introduction 1
- 1.1 The Different Flavors of Video and Image Processing 2
- 1.2 General Framework 3
- 1.3 The Chapters in This Book 4
- 1.4 Exercises 5

2 Image Acquisition 7
- 2.1 Energy 7
  - 2.1.1 Illumination 8
- 2.2 The Optical System 10
  - 2.2.1 The Lens 11
- 2.3 The Image Sensor 15
- 2.4 The Digital Image 19
  - 2.4.1 The Region of Interest (ROI) 20
- 2.5 Further Information 21
- 2.6 Exercises 23

3 Color Images 25
- 3.1 What Is a Color? 25
- 3.2 Representation of an RGB Color Image 27
  - 3.2.1 The RGB Color Space 30
  - 3.2.2 Converting from RGB to Gray-Scale 30
  - 3.2.3 The Normalized RGB Color Representation 32
- 3.3 Other Color Representations 34
  - 3.3.1 The HSI Color Representation 36
  - 3.3.2 The HSV Color Representation 37
  - 3.3.3 The YUV and YC_bC_r Color Representations 38
- 3.4 Further Information 40
- 3.5 Exercises 42

4 Point Processing 43
- 4.1 Gray-Level Mapping 43
- 4.2 Non-linear Gray-Level Mapping 46
  - 4.2.1 Gamma Mapping 46
  - 4.2.2 Logarithmic Mapping 48

4.2.3 Exponential Mapping . . . 48
4.3 The Image Histogram . . . 49
4.3.1 Histogram Stretching . . . 51
4.3.2 Histogram Equalization . . . 53
4.4 Thresholding . . . 55
4.4.1 Color Thresholding . . . 57
4.4.2 Thresholding in Video . . . 59
4.5 Logic Operations on Binary Images . . . 63
4.6 Image Arithmetic . . . 63
4.7 Programming Point Processing Operations . . . 66
4.8 Further Information . . . 68
4.9 Exercises . . . 69

5 Neighborhood Processing . . . 71
5.1 The Median Filter . . . 71
5.1.1 Rank Filters . . . 75
5.2 Correlation . . . 75
5.2.1 Template Matching . . . 78
5.2.2 Edge Detection . . . 81
5.2.3 Image Sharpening . . . 85
5.3 Further Information . . . 86
5.4 Exercises . . . 88

6 Morphology . . . 91
6.1 Level 1: Hit and Fit . . . 92
6.1.1 Hit . . . 93
6.1.2 Fit . . . 93
6.2 Level 2: Dilation and Erosion . . . 94
6.2.1 Dilation . . . 94
6.2.2 Erosion . . . 95
6.3 Level 3: Compound Operations . . . 96
6.3.1 Closing . . . 97
6.3.2 Opening . . . 98
6.3.3 Combining Opening and Closing . . . 99
6.3.4 Boundary Detection . . . 99
6.4 Further Information . . . 100
6.5 Exercises . . . 100

7 BLOB Analysis . . . 103
7.1 BLOB Extraction . . . 103
7.1.1 The Recursive Grass-Fire Algorithm . . . 104
7.1.2 The Sequential Grass-Fire Algorithm . . . 106
7.2 BLOB Features . . . 107
7.3 BLOB Classification . . . 110
7.4 Further Information . . . 113
7.5 Exercises . . . 114

8 Segmentation in Video Data . . . 117
8.1 Video Acquisition . . . 117
8.2 Detecting Changes in the Video . . . 120
8.2.1 The Algorithm . . . 120
8.3 Background Subtraction . . . 123
8.3.1 Defining the Threshold Value . . . 124
8.4 Image Differencing . . . 125
8.5 Further Information . . . 126
8.6 Exercises . . . 127

9 Tracking . . . 129
9.1 Tracking-by-Detection . . . 129
9.2 Prediction . . . 131
9.3 Tracking Multiple Objects . . . 133
9.3.1 Good Features to Track . . . 135
9.4 Further Information . . . 137
9.5 Exercises . . . 137

10 Geometric Transformations . . . 141
10.1 Affine Transformations . . . 142
10.1.1 Translation . . . 142
10.1.2 Scaling . . . 142
10.1.3 Rotation . . . 142
10.1.4 Shearing . . . 144
10.1.5 Combining the Transformations . . . 144
10.2 Making It Work in Practice . . . 145
10.2.1 Backward Mapping . . . 146
10.2.2 Interpolation . . . 147
10.3 Homography . . . 148
10.4 Further Information . . . 152
10.5 Exercises . . . 152

11 Visual Effects . . . 155
11.1 Visual Effects Based on Pixel Manipulation . . . 155
11.1.1 Point Processing . . . 156
11.1.2 Neighborhood Processing . . . 157
11.1.3 Motion . . . 157
11.1.4 Reduced Colors . . . 158
11.1.5 Randomness . . . 159
11.2 Visual Effects Based on Geometric Transformations . . . 160
11.2.1 Polar Transformation . . . 160
11.2.2 Twirl Transformation . . . 162
11.2.3 Spherical Transformation . . . 163
11.2.4 Ripple Transformation . . . 164
11.2.5 Local Transformation . . . 165
11.3 Further Information . . . 165
11.4 Exercises . . . 167

12 Application Example: Edutainment Game . . . 169
12.1 The Concept . . . 170
12.2 Setup . . . 171
12.2.1 Infrared Lighting . . . 171
12.2.2 Calibration . . . 173
12.3 Segmentation . . . 174
12.4 Representation . . . 175
12.5 Postscript . . . 176

13 Application Example: Coin Sorting Using a Robot . . . 177
13.1 The Concept . . . 178
13.2 Image Acquisition . . . 180
13.3 Preprocessing . . . 181
13.4 Segmentation . . . 182
13.5 Representation and Classification . . . 182
13.6 Postscript . . . 185

Appendix A Bits, Bytes and Binary Numbers . . . 187
A.1 Conversion from Decimal to Binary . . . 188

Appendix B Mathematical Definitions . . . 191
B.1 Absolute Value . . . 191
B.2 min and max . . . 191
B.3 Converting a Rational Number to an Integer . . . 192
B.4 Summation . . . 192
B.5 Vector . . . 194
B.6 Matrix . . . 195
B.7 Applying Linear Algebra . . . 197
B.8 Right-Angled Triangle . . . 198
B.9 Similar Triangles . . . 198

Appendix C Learning Parameters in Video and Image Processing Systems . . . 201
C.1 Training . . . 201
C.2 Initialization . . . 203

Appendix D Conversion Between RGB and HSI . . . 205
D.1 Conversion from RGB to HSI . . . 205
D.2 Conversion from HSI to RGB . . . 208

Appendix E Conversion Between RGB and HSV . . . 211
E.1 Conversion from RGB to HSV . . . 211
E.1.1 HSV: Saturation . . . 212
E.1.2 HSV: Hue . . . 213
E.2 Conversion from HSV to RGB . . . 214

Appendix F Conversion Between RGB and YUV/YC$_b$C$_r$ . . . 217
F.1 The Output of a Colorless Signal . . . 217

F.2 The Range of X_1 and X_2 218
F.3 YUV 218
F.4 YC_bC_r 219
