

# Contents

|          |   |    |
|----------|---|----|
| <b>1</b> | <b>Introduction</b> . . . . .   | 1  |
| 1.1      | Reaction-Diffusion Systems . . . . .  | 1  |
| 1.2      | The Gierer-Meinhardt System for Hydra . . . . .   | 4  |
| 1.3      | Turing's Diffusion-Driven Instability . . . . .   | 5  |
| 1.4      | Amplitude Equations and Order Parameters . . . . .  | 9  |
| 1.5      | Analytical Methods for Spiky Patterns . . . . .   | 9  |
| <b>2</b> | <b>Existence of Spikes for the Gierer-Meinhardt System in One Dimension</b> . . . . .           | 13 |
| 2.1      | Symmetric Multi-spike Solutions: A Rigorous Proof of Existence . . . . .                        | 14 |
| 2.2      | Asymmetric Multi-spike Solutions: A Formal Derivation . . . . .                                 | 15 |
| 2.3      | Existence of Symmetric and Asymmetric Multiple Spikes:<br>A Unified Rigorous Approach . . . . . | 17 |
| 2.3.1    | Some Preliminaries . . . . .  | 22 |
| 2.3.2    | Study of the Approximate Solutions . . . . .  | 25 |
| 2.3.3    | The Liapunov-Schmidt Reduction Method . . . . .   | 29 |
| 2.3.4    | The Reduced Problem . . . . .   | 32 |
| 2.4      | Clustered Multiple Spikes . . . . .   | 35 |
| 2.5      | Notes on the Literature . . . . .   | 39 |
| <b>3</b> | <b>The Nonlocal Eigenvalue Problem (NLEP)</b> . . . . .   | 41 |
| 3.1      | A Basic Theorem for $\tau = 0$ . . . . .  | 41 |
| 3.2      | The Method of Continuation . . . . .  | 50 |
| 3.3      | Hopf Bifurcation . . . . .  | 51 |
| 3.4      | The Method of Hypergeometric Functions . . . . .  | 57 |
| 3.5      | Notes on the Literature . . . . .   | 70 |
| <b>4</b> | <b>Stability of Spikes for the Gierer-Meinhardt System in One Dimension</b> . . . . .           | 71 |
| 4.1      | Symmetric Multiple Spikes: Stability . . . . .  | 71 |
| 4.1.1    | Large Eigenvalues . . . . .   | 73 |
| 4.1.2    | Small Eigenvalues . . . . .   | 76 |

|          |  |     |
|----------|--|-----|
| 4.1.3    | The Spectrum of the Matrices $\mathcal{B}$ and $\mathcal{M}$ . . . . .                                   | 85  |
| 4.2      | Notes on the Literature . . . . .  | 88  |
| <b>5</b> | <b>Existence of Spikes for the Shadow Gierer-Meinhardt System</b> . . . . .                              | 91  |
| 5.1      | The Shadow Gierer-Meinhardt System . . . . .   | 91  |
| 5.2      | The Existence Proof . . . . .  | 93  |
| 5.2.1    | Technical Analysis . . . . .   | 93  |
| 5.2.2    | The Liapunov-Schmidt Reduction Method . . . . .  | 100 |
| 5.2.3    | The Reduced Problem: A Finite-Dimensional<br>Maximisation Problem . . . . .                              | 103 |
| 5.2.4    | The Completion of the Existence Proof . . . . .  | 104 |
| 5.3      | Notes on the Literature . . . . .  | 105 |
| <b>6</b> | <b>Existence and Stability of Spikes for the Gierer-Meinhardt System<br/>in Two Dimensions</b> . . . . . | 107 |
| 6.1      | Symmetric Multiple Spikes: Existence . . . . .   | 107 |
| 6.1.1    | The Amplitudes of the Peaks . . . . .  | 109 |
| 6.1.2    | Reduction to Finite Dimensions . . . . .   | 113 |
| 6.1.3    | The Reduced Problem . . . . .  | 121 |
| 6.2      | Symmetric Multiple Spikes: Stability . . . . .   | 124 |
| 6.2.1    | Large Eigenvalues . . . . .  | 126 |
| 6.2.2    | Small Eigenvalues . . . . .  | 131 |
| 6.3      | Asymmetric Multiple Spikes: Existence . . . . .  | 136 |
| 6.3.1    | Analysing the Algebraic System for the Amplitudes . . . . .  | 139 |
| 6.3.2    | The Reduced Problem . . . . .  | 140 |
| 6.4      | Asymmetric Multiple Spikes: Stability . . . . .  | 141 |
| 6.4.1    | Large Eigenvalues . . . . .  | 142 |
| 6.4.2    | Small Eigenvalues . . . . .  | 146 |
| 6.5      | Notes on the Literature . . . . .  | 147 |
| <b>7</b> | <b>The Gierer-Meinhardt System with Inhomogeneous Coefficients</b> . . . . .                             | 149 |
| 7.1      | Precursors . . . . .   | 149 |
| 7.1.1    | Results on Existence and Stability . . . . .   | 150 |
| 7.1.2    | Numerical Computations . . . . .   | 156 |
| 7.2      | Discontinuous Diffusivities . . . . .  | 157 |
| 7.2.1    | Existence and Stability of Interior Spike . . . . .  | 158 |
| 7.2.2    | A Spike near the Jump Discontinuity of the Inhibitor<br>Diffusivity . . . . .                            | 163 |
| 7.2.3    | Numerical Simulations . . . . .  | 169 |
| 7.3      | Notes on the Literature . . . . .  | 172 |
| <b>8</b> | <b>Other Aspects of the Gierer-Meinhardt System</b> . . . . .  | 175 |
| 8.1      | The Gierer-Meinhardt System with Finite Diffusivity . . . . .  | 175 |
| 8.1.1    | Some Properties of the Function $w_L$ . . . . .  | 178 |
| 8.1.2    | Nonlocal Eigenvalue Problems . . . . .   | 185 |
| 8.1.3    | Extensions to Higher Dimensions . . . . .  | 191 |

|           |   |            |
|-----------|---|------------|
| 8.2       | The Gierer-Meinhardt System with Large Reaction Rates . . . . .   | 193        |
| 8.2.1     | Construction of the Steady State . . . . .  | 196        |
| 8.2.2     | Stability . . . . .   | 199        |
| 8.2.3     | Large Eigenvalues . . . . .   | 200        |
| 8.2.4     | Small Eigenvalues . . . . .   | 209        |
| 8.3       | The Gierer-Meinhardt System with Robin Boundary Conditions .  | 214        |
| 8.3.1     | Study of the NLEP . . . . .   | 219        |
| 8.3.2     | Eigenvalue Estimates . . . . .  | 232        |
| 8.3.3     | Numerical Simulations . . . . .   | 239        |
| 8.4       | The Gierer-Meinhardt System on Manifolds . . . . .  | 241        |
| 8.4.1     | Introduction . . . . .  | 241        |
| 8.4.2     | The Geometric Setting . . . . .   | 242        |
| 8.4.3     | The Main Results . . . . .  | 244        |
| 8.5       | Notes on the Literature . . . . .   | 246        |
| <b>9</b>  | <b>The Gierer-Meinhardt System with Saturation . . . . .</b>  | <b>249</b> |
| 9.1       | The Parametrised Ground State . . . . .   | 251        |
| 9.2       | Stability of Spikes . . . . .   | 255        |
| 9.3       | Notes on the Literature . . . . .   | 261        |
| <b>10</b> | <b>Spikes for Other Two-Component Reaction-Diffusion Systems . . .</b>  | <b>263</b> |
| 10.1      | The Schnakenberg Model . . . . .  | 263        |
| 10.2      | The Gray-Scott Model . . . . .  | 265        |
| 10.3      | Flow-Distributed Spikes . . . . .   | 267        |
| 10.4      | Notes on the Literature . . . . .   | 269        |
| <b>11</b> | <b>Reaction-Diffusion Systems with Many Components . . . . .</b>  | <b>271</b> |
| 11.1      | The Hypercycle of Eigen and Schuster . . . . .  | 271        |
| 11.2      | Mutual Exclusion of Spikes . . . . .  | 275        |
| 11.3      | Multiple Activators and Substrates . . . . .  | 279        |
| 11.4      | Exotic Spiky Patterns for a Consumer Chain Model . . . . .  | 282        |
| 11.5      | Notes on the Literature . . . . .   | 286        |
| <b>12</b> | <b>Biological Applications . . . . .</b>  | <b>287</b> |
| 12.1      | Biological, Chemical and Ecological Applications of<br>Reaction-Diffusion Systems . . . . .                         | 287        |
| 12.2      | <i>Hydra</i> : Transplantation of Head . . . . .  | 288        |
| 12.3      | Embryology: Formation of Body Axes for Newt and <i>Drosophila</i> ,<br>Segmentation for <i>Drosophila</i> . . . . . | 291        |
| 12.4      | Pigmentation Patterns on Sea Shells, Fish and Mammals . . . . .   | 293        |
| 12.5      | Patterns on Growing Domains: Stripes on Angelfish and Tooth<br>Formation in Alligators . . . . .                    | 294        |
| <b>13</b> | <b>Appendix . . . . .</b>   | <b>297</b> |
| 13.1      | Sobolev Spaces and Linear Operators . . . . .   | 297        |
| 13.2      | Uniqueness, Nondegeneracy and Spectrum of the Ground State .  | 299        |
