1 Vita-PAMPs: Signatures of Microbial Viability ......................... 1
Diego Mourao-Sa, Soumit Roy, and J. Magarian Blander

2 Innate Lymphoid Cells in Immunity and Disease .................... 9
You Yi Hwang and Andrew N.J. McKenzie

3 Tuning Cross-Presentation of Apoptotic T Cells in Immunopathology ................................................. 27
Vincenzo Barnaba

4 Regulation of Type 2 Immunity by Basophils ......................... 37
David Voehringer

5 Crosstalk Between Adaptive and Innate Immune Cells Leads to High Quality Immune Protection at the Mucosal Borders .................................................................... 43
Hilde Cheroutre and Yujun Huang

6 The Interaction Between Filarial Parasites and Human Monocyte/Macrophage Populations ...................... 49
Roshanak Tolouei Semnani

7 Innate-Like B Cells and Their Rules of Engagement ............... 57
Nicole Baumgarth

8 The CD28/B7 Pathway: A Novel Regulator of Plasma Cell Function ................................................................. 67
Modesta N. Njau and Joshy Jacob

9 Memory CD8+ T Cell Protection ........................................... 77
Sanda Remakus and Luis J. Sigal

10 Human T Follicular Helper Cells: Development and Subsets ........................................................................... 87
Nathalie Schmitt and Hideki Ueno

11 Differentiation and Activation of γδ T Lymphocytes: Focus on CD27 and CD28 Costimulatory Receptors .......... 95
Julie C. Ribot and Bruno Silva-Santos
12 Decision on the Road to Memory ............................................... 107
Derk Amsen, Ronald A. Backer, and Christina Helbig

13 Targeting the Skin for Microneedle Delivery
of Influenza Vaccine ................................................................. 121
Dimitrios G. Koutsonanos, Richard W. Compans,
and Ioanna Skountzou

Index....................................................................................................... 133
Crossroads Between Innate and Adaptive Immunity IV
Katsikis, P.D.; Schoenberger, S.P.; Pulendran, B. (Eds.)
2013, XII, 136 p. 15 illus., 3 illus. in color., Hardcover
ISBN: 978-1-4614-6216-3
