

Contents

1	Introduction	1
1.1	Introduction	1
1.2	A Total Dominating Set in a Graph	1
1.3	Graph Theory Terminology and Concepts	3
1.4	Digraph Terminology and Concepts	5
1.5	Hypergraph Terminology and Concepts	5
1.6	The Transition from Total Domination in Graphs to Transversals in Hypergraphs	6
2	Properties of Total Dominating Sets and General Bounds	9
2.1	Introduction	9
2.2	Properties of Total Dominating Sets	9
2.3	General Bounds	11
2.3.1	Bounds in Terms of the Order	11
2.3.2	Bounds in Terms of the Order and Size	14
2.3.3	Bounds in Terms of Maximum Degree	14
2.3.4	Bounds in Terms of Radius and Diameter	15
2.3.5	Bounds in Terms of Girth	17
2.4	Bounds in Terms of the Domination Number	17
3	Complexity and Algorithmic Results	19
3.1	Introduction	19
3.2	Complexity	19
3.2.1	Time Complexities	21
3.3	Fixed Parameter Tractability	21
3.4	Approximation Algorithms	23
3.5	A Tree Algorithm	23
3.6	A Simple Heuristic	26
4	Total Domination in Trees	31
4.1	Introduction	31
4.2	Bounds on the Total Domination Number in Trees	31

4.3	Total Domination and Open Packings	33
4.4	Vertices Contained in All, or in No, Minimum TD-Sets	33
4.5	Trees with Unique Minimum TD-Sets	35
4.6	Trees T with $\gamma_t(T) = 2\gamma(T)$	36
4.7	Trees with $\gamma_t(T) = \gamma(T)$	36
5	Total Domination and Minimum Degree	39
5.1	Introduction	39
5.2	A General Bound Involving Minimum Degree	39
5.3	Minimum Degree One	40
5.4	Minimum Degree Two	40
5.5	Minimum Degree Three	41
5.6	Minimum Degree Four	49
5.7	Minimum Degree Five	52
5.8	Summary of Known Results on Bounds in Terms of Order	53
5.9	Total Domination and Connectivity	53
6	Total Domination in Planar Graphs	55
6.1	Introduction	55
6.2	Diameter Two Planar Graphs	55
6.3	Diameter Three Planar Graphs	58
7	Total Domination and Forbidden Cycles	59
7.1	Introduction	59
7.2	Forbidden 6-Cycles	59
7.3	Total Domination and Girth	62
8	Relating the Size and Total Domination Number	65
8.1	Introduction	65
8.2	Relating the Size and Total Domination Number	65
9	Total Domination in Claw-Free Graphs	71
9.1	Introduction	71
9.2	Minimum Degree One	71
9.3	Minimum Degree Two	71
9.4	Cubic Graphs	72
10	Total Domination Number Versus Matching Number	77
10.1	Introduction	77
10.2	Relating the Total Domination and Matching Numbers	77
10.3	Graphs with Total Domination Number at Most the Matching Number	79
	10.3.1 Claw-Free Graphs	79
	10.3.2 Regular Graphs	80
	10.3.3 Graphs with Every Vertex in a Triangle	81
11	Total Domination Critical Graphs	83
11.1	Introduction	83

- 11.2 Total Domination Edge-Critical Graphs 83
 - 11.2.1 Supercritical Graphs 84
 - 11.2.2 General Constructions 84
 - 11.2.3 The Diameter of $\gamma_{l}EC$ Graphs 87
 - 11.2.4 Applications to Diameter-2-Critical Graphs 89
 - 11.2.5 Total Domination Vertex-Critical Graphs 95
 - 11.2.6 $\gamma_{l}VC$ Graphs of High Connectivity 96
- 11.3 Total Domination Edge Addition Stable Graphs 97
- 11.4 Total Domination Edge Removal Stable Graphs 99
- 11.5 Total Domination Vertex Removal Changing Graphs 100
- 11.6 Total Domination Vertex Removal Stable Graphs 101
- 12 Total Domination and Graph Products 103**
 - 12.1 Introduction 103
 - 12.2 The Cartesian Product 103
 - 12.3 The Direct Product 107
- 13 Graphs with Disjoint Total Dominating Sets 109**
 - 13.1 Introduction 109
 - 13.2 Augmenting a Graph 110
 - 13.3 Disjoint Dominating and Total Dominating Sets 111
 - 13.4 Dominating and Total Dominating Partitions in Cubic Graphs... 115
 - 13.5 A Surprising Relationship 116
- 14 Total Domination in Graphs with Diameter Two 119**
 - 14.1 Introduction 119
 - 14.2 Preliminary Observations 119
 - 14.3 Diameter-2 Moore Graphs 121
 - 14.4 An Optimal Upper Bound 121
- 15 Nordhaus–Gaddum Bounds for Total Domination 125**
 - 15.1 Introduction 125
 - 15.2 Nordhaus–Gaddum Bounds for Total Domination 125
 - 15.3 Total Domination Number and Relative Complement 128
 - 15.4 Multiple Factor Nordhaus–Gaddum-Type Results 129
- 16 Upper Total Domination 131**
 - 16.1 Upper Total Domination 131
 - 16.1.1 Trees 131
 - 16.1.2 Upper Total Domination Versus Upper Domination ... 132
 - 16.2 Bounds on the Upper Total Domination Number 133
 - 16.3 Upper Total Domination in Claw-Free Graphs 133
 - 16.4 Upper Total Domination in Regular Graphs 135
 - 16.5 A Vizing-Like Bound for Upper Total Domination 137
- 17 Variations of Total Domination 141**
 - 17.1 Introduction 141
 - 17.2 Total Restrained Domination 141

17.3	Double Total Domination.....	144
17.4	Locating Total Domination.....	145
17.5	Differentiating Total Domination.....	146
18	Conjectures and Open Problems.....	149
18.1	Introduction.....	149
18.2	Total Domination Edge-Critical Graphs.....	149
18.3	Planar Graphs.....	149
18.4	C_4 -Free Graphs.....	150
18.5	Minimum Degree Four.....	151
18.6	Minimum Degree Five.....	151
18.7	Relating the Size and Total Domination Number.....	152
18.8	Augmenting a Graph.....	152
18.9	Dominating and Total Dominating Partitions in Cubic Graphs.....	153
18.10	Upper Total Domination Versus Upper Domination.....	153
18.11	Total Domination Vertex-Critical Graphs.....	153
18.12	Total Domination Number in Claw-Free Graphs.....	154
18.13	Total Domination Number and Distance.....	154
18.14	Total Domination Number and Relative Complement.....	155
18.15	Total Restrained Domination.....	155
18.16	Double Total Domination Number.....	155
18.17	Locating–Total Domination.....	156
18.18	Differentiating Total Domination.....	157
18.19	Graffiti Conjectures.....	157
	References.....	159
	Glossary.....	169
	Index.....	175

Total Domination in Graphs

Henning, M.; Yeo, A.

2013, XIV, 178 p., Hardcover

ISBN: 978-1-4614-6524-9
