Contents

1 Introduction: Grounding Self-Regulation in the Brain and Body ................................................................. 1
   Guido H.E. Gendolla, Mattie Tops and Sander L. Koole

Part I Integrative Perspectives

2 An Evolving View of the Structure of Self-Regulation .......... 9
   Charles S. Carver, Sheri L. Johnson, Jutta Joormann and Michael F. Scheier

3 Self-Regulation in an Evolutionary Perspective.................... 25
   Marco Del Giudice

4 Self-Regulatory Strength: Neural Mechanisms and Implications for Training ............................................. 43
   Richard B. Lopez, Kathleen D. Vohs, Dylan D. Wagner and Todd F. Heatherton

5 The Muscle Metaphor in Self-Regulation in the Light of Current Theorizing on Muscle Physiology ................. 55
   Michael Richter and Joséphine Stanek

6 Protective Inhibition of Self-Regulation and Motivation:
   Extending a Classic Pavlovian Principle to Social and Personality Functioning ................................. 69
   Mattie Tops, Caroline Schlinkert, Mandy Tjew-A-Sin, Dalya Samur and Sander L. Koole

Part II Interactions between Affect and Cognition in Self-Regulation

7 Affective Modulation of Cognitive Control:
   A Biobehavioral Perspective ............................................. 89
   Henk van Steenbergen
Contents

8  Error Monitoring Under Negative Affect: A Window into Maladaptive Self-Regulation Processes ......................................................... 109
   Kristien Aarts and Gilles Pourtois

9  Pupillometry and Memory: External Signals of Metacognitive Control ................................................................................................. 125
   Megan H. Papesh and Stephen D. Goldinger

10 From Distraction to Mindfulness: Psychological and Neural Mechanisms of Attention Strategies in Self-Regulation .......... 141
   Lotte F. van Dillen and Esther K. Papiès

Part III  The Central Nervous System and Self-Regulation

11 From the Reward Circuit to the Valuation System:
   How the Brain Motivates Behavior ................................................................. 157
   Mathias Pessiglione and Maël Lebreton

12 Neural Foundations of Motivational Orientations........................................ 175
   Eddie Harmon-Jones and Cindy Harmon-Jones

13 Motus Moderari: A Neuroscience-Informed Model for Self-Regulation of Emotion and Motivation ................................................... 189
   Jordan L. Livingston, Lauren E. Kahn and Elliot T. Berkman

14 More than the Medial Prefrontal Cortex (MPFC):
   New Advances in Understanding the Neural Foundations of Self-Insight ........................................................................ 209
   Jennifer S. Beer and Taru Flagan

15 Self-Control in Social Decision Making:
   A Neurobiological Perspective ................................................................... 221
   Daria Knoch and Kyle Nash

Part IV  Self-Regulation of Effort

16 Mental Effort: Brain and Autonomic Correlates in Health and Disease ......................................................................................... 237
   Eugenia Radulescu, Yoko Nagai and Hugo Critchley

17 Psychobiology of Perceived Effort During Physical Tasks ........... 255
   Helma M. de Morree and Samuele M. Marcora

18 Bounded Effort Automaticity: A Drama in Four Parts .......... 271
   Guido H.E. Gendolla and Nicolas Silvestrini
19 The Intensity of Behavioral Restraint: Determinants and Cardiovascular Correlates .................................................... 287
   Rex A. Wright and Stephanie D. Agtarap

20 Self-Striving: How Self-Focused Attention Affects Effort-Related Cardiovascular Activity ......................... 301
   Paul J. Silvia

21 Future Thought and the Self-Regulation of Energization ........ 315
   A. Timur Sevincer and Gabriele Oettingen

Part V Self-Regulatory Problems and Their Development

22 Depression and Self-Regulation: A Motivational Analysis and Insights from Effort-Related Cardiovascular Reactivity ............................................................ 333
   Kerstin Brinkmann and Jessica Franzen

23 Perinatal Developmental Origins of Self-Regulation .......... 349
   Jens Henrichs and Bea R. H. Van den Bergh

24 Self-Regulation Through Rumination: Consequences and Mechanisms .................................................... 371
   Ernst H. W. Koster, Lin Fang and Igor Marchetti

25 Biological Aspects of Self-Esteem and Stress .................... 385
   Jens C. Pruessner and Mark Baldwin

26 A Basic and Applied Model of the Body–Mind System ........ 397
   W.M. Bernstein

Index ................................................................................................................. 419
Handbook of Biobehavioral Approaches to Self-Regulation
Gendolla, G.H.E.; Tops, M.; Koole, S.L. (Eds.)
2015, XIV, 421 p. 58 illus., 11 illus. in color., Hardcover
