Contents

Preface .............................................................................. v
Contributors .................................................................... ix

1 The Application of Humanized Mouse Models for the Study of Human Exclusive Viruses.................... 1
Fatemeh Vahedi, Elizabeth C. Giles, and Ali A. Ashkar

2 Zebrafish as a Model for the Study of Host-Virus Interactions .................................................... 57
Peng Fei Zou and Pin Nie

3 Northern Blot Detection of Virus-Derived Small Interfering RNAs in Caenorhabditis elegans Using Nonradioactive Oligo Probes .......... 79
Tianyun Long and Rui Lu

4 Extraction and qPCR-Based Detection of miRNAs from Cultured PBMCs of Bubaline Origin ..................... 89
Chandra S. Mukhopadhyay, Ramneek Verma, and Jasdeep Singh

5 Visualizing Virus-Derived dsRNA Using Antibody-Independent and -Dependent Methods ............... 103
Sarah J. Poynter and Stephanie J. DeWitte-Orr

6 RNA PAMPs as Molecular Tools for Evaluating RIG-I Function in Innate Immunity ..................... 119
Renee C. Ireton, Courtney Wilkins, and Michael Gale Jr.

7 Methods to Visualize MAVS Subcellular Localization ................................................................. 131
Christine Vazquez, Dia C. Beachboard, and Stacy M. Horner

8 Purification of Cyclic GMP-AMP from Viruses and Measurement of Its Activity in Cell Culture ............... 143
Alice Mayer, Jonathan Maelfait, Anne Bridgeman, and Jan Rehwinkel

9 cGAMP Quantification in Virus-Infected Human Monocyte-Derived Cells by HPLC-Coupled Tandem Mass Spectrometry .... 153
Jennifer Paijo, Volkhard Kaever, and Ulrich Kalinke

10 Methods of Assessing STING Activation and Trafficking ............................................................. 167
Vladislav Pokatayev and Nan Yan

11 Genome-Wide CRISPR/Cas9 Screening for High-Throughput Functional Genomics in Human Cells .................. 175
Shiyou Zhu, Yuexin Zhou, and Wensheng Wei

12 High-Throughput Screening for Identification of Novel Innate Immune Activators ......................... 183
Bryan J. Gall and Victor R. DeFilippis

13 Chromosome Conformation Capture for Research on Innate Antiviral Immunity ............................. 195
Yoon Jung Kim and Tae Hoon Kim
14 Discovery of Variants Underlying Host Susceptibility to Virus Infection Using Whole-Exome Sequencing ........................................ 209
   Gabriel A. Leiva-Torres, Nestor Nebesio, and Silvia M. Vidal

15 Isolation, Purification, and Culture of Primary Murine Sensory Neurons ...... 229
   Sarah Katzenell, Jorge R. Cabrera, Brian J. North, and David A. Leib

16 Isolation of Group 2 Innate Lymphoid Cells from Mouse Lungs ............... 253
   Claudia U. Duerr and Jörg H. Fritz

17 Epidemiological Methods .......................................................... 263
   Biao Wang and Mark Loeb

Index ............................................................................................... 273
