**Preface** ......................................................................................... v  
**Contributors** ................................................................................ ix  

### Part I  Methods for Biochemical and Biophysical Analysis of Prion Disease

1. Purification and Fibrillation of Full-Length Recombinant PrP .......................... 3  
   *Natallia Makarava, Regina Savtchenko, and Ilia V. Baskakov*

   *Laura J. Ellett*

3. Analysis of Prion Protein Conformation Using Circular Dichroism Spectroscopy ............................................................... 27  
   *Laura J. Ellett and Vanessa A. Johansen*

4. Analysis of Prion Protein Structure Using Nuclear Magnetic Resonance Spectroscopy ......................................................... 35  
   *Ivana Biljan, Gregor Ilc, and Janez Plavec*

5. Immunodetection of PrPSc Using Western Immunoblotting Techniques ...... 51  
   *Gerald S. Baron and Gregory J. Raymond*

6. Analysis of miRNA Signatures in Neurodegenerative Prion Disease .......... 67  
   *Shayne A. Bellingham and Andrew F. Hill*

### Part II  Methods for Cellular Analysis of Prion Disease

7. Cell Biology Approaches to Studying Prion Diseases .............................. 83  
   *Suzette A. Priola*

   *Zaira E. Arellano-Anaya, Alvina Huor, Pascal Leblanc, Olivier Andréolletti, and Didier Vilette*

9. Generation of Infectious Prions and Detection with the Prion-Infected Cell Assay ................................................................. 105  
   *Laura J. Vella, Bradley Coleman, and Andrew F. Hill*

10. Analysis of Cellular Prion Protein Endoproteolytic Processing ................. 119  
    *Victoria Lewis*

11. Cellular Analysis of Adult Neural Stem Cells for Investigating Prion Biology . . 133  
    *Cathryn L. Haigh*

12. Neurotoxicity of Prion Peptides on Cultured Cerebellar Neurons ............. 147  
    *Giuseppe D. Ciccotosto, Metta Jana, and Roberto Cappai*
PART III METHODS FOR CELL FREE PROPAGATION OF PRIONS

13 Methods of Protein Misfolding Cyclic Amplification ........................ 169
   Natallia Makarava, Regina Savtchenko, and Ilia V. Baskakov

14 RT-QuIC Assays for Prion Disease Detection and Diagnostics .......... 185
   Christina D. Orrù, Bradley R. Groveman, Andrew G. Hughson,
   Matteo Manca, Lynne D. Raymond, Gregory J. Raymond,
   Katrina J. Campbell, Kelsie J. Anson, Allison Kraus, and Byron Caughey

15 A Quick Method to Evaluate the Effect of the Amino Acid
   Sequence in the Misfolding Proneness of the Prion Protein ............ 205
   Natalia Fernández-Borges, Hasier Eran˜a, Saioa R. Elezgarai,
   Chafik Harrathi, Vanesa Venegas, and Joaquı´n Castilla

PART IV IN Vivo INVESTIGATION OF PRION DISEASE

16 Insights into Mechanisms of Transmission and Pathogenesis
   from Transgenic Mouse Models of Prion Diseases ........................ 219
   Julie A. Moreno and Glenn C. Telling

17 In Vivo-Near Infrared Imaging of Neurodegeneration ...................... 253
   Victoria A. Lawson, Carolin Tumpach, Cathryn L. Haigh,
   and Simon C. Drew

18 Strain Typing of Prion Diseases Using In Vivo Mouse Models ............ 263
   Aileen Boyle, Kris Hogan, Jean C. Manson, and Abigail B. Diack

19 Preparation and Immunostaining of the Myenteric Plexus
   of Prion-Infected Mice .................................................. 285
   Laura J. Ellett and Victoria A. Lawson

PART V METHODS FOR THE DETECTION AND TREATMENT OF PRION DISEASES

20 Cell Culture Methods for Screening of Prion Therapeutics............... 295
   Hilary E. McMahon

21 Real-Time Quaking-Induced Conversion for Diagnosis of Prion Disease ...... 305
   Katsuya Satoh, Ryuichiro Atarashi, and Noriyuki Nishida

22 Methods for Molecular Diagnosis of Human Prion Disease ............... 311
   Jonathan D.F. Wadsworth, Gary Adamson, Susan Joiner,
   Lara Brock, Caroline Powell, Jacqueline M. Linehan,
   Jonathan A. Beck, Sebastian Brandner, Simon Mead, and John Collinge

23 Molecular Subtyping of PrPres in Human Sporadic CJD Brain Tissue ...... 347
   G.M. Klug, V. Lewis, and S.J. Collins

PART VI METHODS FOR INVESTIGATION OF PRION-LIKE DISEASE

24 Intercellular Prion-Like Conversion and Transmission of Cu/Zn
   Superoxide Dismutase (SOD1) in Cell Culture .......................... 357
   Leslie I. Grad, Edward Pokrisshevsky, and Neil R. Cashman

Index .................................................................... 369
Prions
Methods and Protocols
Lawson, V. (Ed.)
