# Contents

## Part I Introduction to Cancer Stem Cells

1 **Cancer Stem Cells: Historical Perspectives and Lessons from Leukemia** ................................................................. 3  
Christopher R. Cogle

## Part II Cancer Stem Cells in Solid Tumors

2 **Cancer Stem Cells in Breast Cancer** .................................................... 15  
Jenny E. Chu and Alison L. Allan

3 **Cancer Stem Cells in Brain Cancer** ..................................................... 37  
Xin Wang, Chitra Venugopal, and Sheila K. Singh

4 **Cancer Stem Cells in Colorectal Cancer** .............................................. 57  
Mauro Biffoni, Eros Fabrizi, and Lucia Ricci-Vitiani

5 **Cancer Stem Cells in Pancreatic Cancer** ............................................. 79  
Jorge Dorado, Alicia G. Serrano, and Christopher Heeschen

6 **Cancer Stem Cells in Prostate Cancer** ............................................... 99  
Paula Kroon, Davide Pellacani, Fiona M. Frame, Norman J. Maitland, and Anne T. Collins

7 **Cancer Stem Cells in Melanoma** ....................................................... 117  
Ping Jin, Qiuzehe Liu, Marianna Sabatino, David F. Stroncek, Francesco M. Marincola, and Ena Wang

8 **Cancer Stem Cells in Lung Cancer** ...................................................... 139  
Jun Shen and Feng Jiang

9 **Cancer Stem Cells in Ovarian Cancer** ............................................... 151  
Fang Fang, Curt Balch, Meng Li, Jay M. Pilrose, and Kenneth P. Nephew
10 Cancer Stem Cells in Hepatocellular Cancer ........................................ 177
Russell C. Langan and Itzhak Avital

11 Cancer Stem Cells in Head and Neck Cancer ..................................... 197
Mark E.P. Prince and Samantha J. Davis

Part III  Cancer Stem Cell Gene Expression and Mechanisms:
          Convergence of Embryonic and Tumorigenic Signaling Pathways

12 Relationship Between Regulatory Pathways
   in Pluripotent Stem Cells and Human Tumors.................................... 209
Olga Gaidarenko and Yang Xu

13 Influence of the Embryonic Microenvironment
   on Tumor Progression........................................................................... 223
Daniela Quail, Meghan Taylor, Michael Jewer,
and Lynne-Marie Postovit

14 The Epithelial-to-Mesenchymal Transition
   and Cancer Stem Cells.......................................................................... 243
Jonas Fuxe

Part IV  Model Systems for Studying Cancer Stem Cell Biology
          and Therapeutic Development

15 Application of Stem Cell Assays for the Characterization
   of Cancer Stem Cells.............................................................................. 259
Pamela M. Willan and Gillian Farnie

16 Zebrafish as a Model to Study Stem Cells
   in Development, Disease, and Cancer ............................................... 283
Viviana Anelli, Cristina Santoriello, and Marina C. Mione

17 Imaging Cancer Stem Cells................................................................. 297
Paula Foster

18 Mouse Models for Studying Normal and Cancer Stem Cells.............. 311
David A. Hess

Part V  Clinical and Therapeutic Implications of Cancer Stem Cells

19 Cancer Stem Cells and Disease Prognosis ....................................... 329
Zeshaan A. Rasheed, Jeanne Kowalski, and William H. Matsui

20 Mechanisms of Radioresistance in Cancer Stem Cells ..................... 345
Cleo Y-F Lee and Maximilian Diehn
21 The Role of ABC Transporters in Cancer Stem Cell Drug Resistance
Vera S. Donnenberg, Ludovic Zimmerlin, and Albert D. Donnenberg 361

22 Resistance to Endocrine Therapy in Breast Cancer: Are Breast Cancer Stem Cells Implicated?
Ciara S. O’Brien, Sacha J. Howell, Gillian Farnie, and Robert B. Clarke 381

23 Future Directions: Cancer Stem Cells as Therapeutic Targets
Alysha K. Croker and Alison L. Allan 403

Part VI Final Thoughts

24 Final Thoughts: Complexity and Controversy Surrounding the “Cancer Stem Cell” Paradigm
Craig Gedye, Richard P. Hill, and Laurie Ailles 433

Index 465
Cancer Stem Cells in Solid Tumors
Allan, A.L. (Ed.)
2011, XVIII, 478 p., Hardcover
ISBN: 978-1-61779-245-8
