## Contents

*Preface* ................................................................. v  
*Contributors* .......................................................... xi

**PART I  MODEL ORGANISMS**

1 Use of Whole Embryo Culture for Studying Heart Development  ................. 3  
*Calvin T. Hang and Ching-Pin Chang*

2 Quantifying Cardiac Functions in Embryonic and Adult Zebrafish .................. 11  
*Tiffany Hoage, Yonghe Ding, and Xiaolei Xu*

3 Analysis of the Patterning of Cardiac Outflow Tract and Great Arteries with Angiography and Vascular Casting ......................... 21  
*Ching-Pin Chang*

4 Morpholino Injection in *Xenopus* .................................. 29  
*Panna Tandon, Chris Showell, Kathleen Christine, and Frank L. Conlon*

5 Chicken Chorioallantoic Membrane Angiogenesis Model  ............................ 47  
*Domenico Ribatti*

6 Visualizing Vascular Networks in Zebrafish: An Introduction to Microangiography ................................................................. 59  
*Christopher E. Schmitt, Melinda B. Holland, and Suk-Won Jin*

7 Whole-Mount Confocal Microscopy for Vascular Branching Morphogenesis ......... 69  
*Yoh-suke Mukouyama, Jennifer James, Joseph Nam, and Yutaka Uchida*

8 Visualization of Mouse Embryo Angiogenesis by Fluorescence-Based Staining ..... 79  
*Yang Liu, Marc Antonyak, and Xu Peng*

9 Miniaturized Assays of Angiogenesis In Vitro ........................................... 87  
*May J. Reed and Robert B. Vernon*

**PART II  CELL AND MOLECULAR BIOLOGY METHODS**

10 Analysis of the Endocardial-to-Mesenchymal Transformation of Heart Valve Development by Collagen Gel Culture Assay .................... 101  
*Yiqin Xiong, Bin Zhou, and Ching-Pin Chang*

11 Quantification of Myocyte Chemotaxis: A Role for FAK in Regulating Directional Motility .................................................. 111  
*Britni Zajac, Zeenat S. Hakim, Morgan V. Cameron, Oliver Smithies, and Joan M. Taylor*
12 Analysis of Neural Crest Cell Fate During Cardiovascular Development
Using Cre-Activated lacZ/β-Galactosidase Staining .......................... 125
Yanping Zhang and L. Bruno Ruest

13 Indirect Immunostaining on Mouse Embryonic Heart
for the Detection of Proliferated Cardiomyocyte .......................... 139
Jieli Li, Marc Antonyak, and Xu Peng

14 Isolation and Characterization of Vascular Endothelial Cells
from Murine Heart and Lung .................................................. 147
Yixin Jin, Yang Liu, Marc Antonyak, and Xu Peng

15 Isolation and Characterization of Embryonic and Adult Epicardium
and Epicardium-Derived Cells ................................................. 155
Bin Zhou and William T. Pu

16 Vascular Smooth Muscle Cells: Isolation, Culture, and Characterization ....... 169
Richard P. Metz, Jan L. Patterson, and Emily Wilson

17 C-kit Expression Identifies Cardiac Precursor Cells in Neonatal Mice ........ 177
Michael Craven, Michael I. Kotlikoff, and Alyson S. Nadworny

18 Cardiomyocyte Apoptosis in Heart Development:
Methods and Protocols ....................................................... 191
Dongfei Qi and Mingui Fu

19 Adenovirus-Mediated Gene Transfection in the Isolated
Lymphatic Vessels ............................................................. 199
Anatoliy A. Gashev, Jieli Li, Mariappan Muthuchamy,
and David C. Zawieja

20 Isolation of Cardiac Myocytes and Fibroblasts
from Neonatal Rat Pups .......................................................... 205
Honey B. Golden, Deepika Gollapudi, Fnu Gerilechaogetu,
Jieli Li, Ricardo J. Cristales, Xu Peng, and David E. Dostal

PART III NEW TECHNIQUES

21 The Application of Genome-Wide RNAi Screens in Exploring
Varieties of Signaling Transduction Pathways .............................. 217
Shenyuan Zhang and Hongying Zheng

22 Application of Atomic Force Microscopy Measurements
on Cardiovascular Cells ....................................................... 229
Xin Wu, Zhe Sun, Gerald A. Meininger,
and Mariappan Muthuchamy

23 In Utero Assessment of Cardiovascular Function in the Embryonic
Mouse Heart Using High-Resolution Ultrasound Biomicroscopy .......... 245
Honey B. Golden, Suraj Sunder, Yang Liu, Xu Peng,
and David E. Dostal

24 Isolation and Preparation of RNA from Rat Blood and Lymphatic
Microvessels for Use in Microarray Analysis .............................. 265
Eric A. Bridenbaugh
25  Visual Data Mining of Coexpression Data to Set Research Priorities in Cardiac Development Research ........................................ 291
    Vincent VanBuren

26  High-Speed Confocal Imaging of Zebrafish Heart Development .......... 309
    Jay R. Hove and Michael P. Craig

27  Measurement of Electrical Conduction Properties of Intact Embryonic Murine Hearts by Extracellular Microelectrode Arrays ..................... 329
    David G. Taylor and Anupama Natarajan

Index ........................................................................................................... 339
Cardiovascular Development
Methods and Protocols
Peng, X.; Antonyak, M. (Eds.)
2012, XIV, 341 p. 64 illus., 41 illus. in color., Hardcover
ISBN: 978-1-61779-522-0
