## Contents

1 Analysing Collaborative Demand and Supply Networks in a Global Economy

1.1 SME Networks: a European Way to Collaborative Innovation
   *A. Villa and D. Antonelli*
   
1.2 Industrial Districts: Historical Tools for Complex Systems
   *V. Marchis*

1.3 Motivations for a New Analysis Methodology
   *A. Villa and D. Antonelli*

References

2 A View of SME Clusters and Networks in Europe

2.1 An Overview of SME Networks Across Europe
   *T. Potinecke and T. Rogowski*

2.2 Poles of Competitiveness in France
   2.2.1 The French Context and Advantages Offered by Competitiveness Clusters
   
2.2.2 Thematic and Geographical Distribution

2.2.3 Governance and Managerial Mechanisms

2.2.4 Case Study

2.3 Science Parks in Greece
   2.3.1 STEPA Characteristics

2.3.2 Science Park Institution

2.3.3 Present Situation

2.4 Outsourcing Networks in Ireland
   2.4.1 Electronics Manufacturing Field Study

   2.4.2 Network Creation: The RFx Process

   2.4.3 Case 1: Contract Manufacturer
2.4.4 Case 2: Supplier Sourcing Company ......................... 51
2.4.5 Case 3: Virtual Breeding Environment
            Supply Network ...................................................... 52
2.4.6 Summary ................................................................. 53

2.5 Industrial Districts in Italy ......................................... 54
    M. Salvador and S. Salvador
    2.5.1 Basic Features and Figures of Industrial Districts .... 54
    2.5.2 SMEs Clusters and Institutional Support:
            the FVG Case Study ............................................. 57

References .................................................................................. 60

3 Promote Aggregation of SMEs: Suggestions and Actions .... 61

3.1 Strengthening SME Network Governance ...................... 61
    A. Villa and D. Antonelli
    3.1.1 A Short Catalogue of Graph Models
            of SME Networks .................................................. 62
    3.1.2 Justifying Necessity of SME Network Governance .... 66
    3.1.3 Benefits from Cooperative Management
            in Enterprise Networks ........................................... 68

3.2 Addressing Collaboration in Industrial Networks .......... 70
    B. Caroleo
    3.2.1 Collaboration ........................................................ 70
    3.2.2 Reasons for Addressing Collaboration ..................... 72
    3.2.3 Examples of Collaborative Networks ....................... 74

3.3 Improving SMEs from a Supply Chain Perspective:
    a QFD-Based Approach .................................................. 76
    M. Barad
    3.3.1 The SME Situation in Israel Motivating
            the QFD-Based Approach ........................................ 76
    3.3.2 Scientific Contributions to SCM Knowledge
            in a Nut Shell ........................................................... 77
    3.3.3 Methodology ......................................................... 80
    3.3.4 Findings ............................................................. 83
    3.3.5 Discussion of Results and Further Empirical Research .. 85

3.4 SMEs in Supply Chain Networks: Cooperation and Competition .......................................................... 86
    J. C. Hennet
    3.4.1 The SCM Perspective ............................................. 87
    3.4.2 The SME Perspective ............................................. 89

3.5 Trust in Demand and Supply Networks ....................... 94
    T. Potinecke and T. Rogowski
3.6 Training Networks in Ireland ........................................................ 96
   D. Whelan and C. Heavey
   3.6.1 Development of Training Strategy in Ireland ....................... 96
   3.6.2 Skillnets Training Networks .............................................. 98
   3.6.3 Case Study 1: Renewable Energy Skills .......................... 100
   3.6.4 Case Study 2: First Polymer Training ............................. 101
   3.6.5 Some Concluding Remarks ............................................. 102

3.7 SME Networks for Car Recycling in Hungary:
an Agent-Based Approach............................................................. 103
   G. L. Kovács and G. Haidegger
   3.7.1 The E-Mult Project Approach ........................................... 103
   3.7.2 Two Project Test Sites .................................................... 106
   3.7.3 Governance and Managerial Mechanisms ......................... 107
   3.7.4 Some Details on the E-Mult Project ................................. 107
   3.7.5 A Few Remarks to Conclude ........................................... 111

4 The CODESNET Approach to SME Networks Analysis ............... 117
   4.1 A Model to Represent SME Networks: Structure, Governance
        and Interactions with Markets ............................................ 117
        A. Villa and D. Antonelli
   4.2 A SME Networks Model for Performance Analysis
        Through Comparison............................................................ 122
        D. Antonelli and A. Villa
   4.3 A Formal Model for SME Networks
        Performance Understanding ................................................. 126
        D. Antonelli and A. Villa
   4.4 An Example of Cluster Analysis .......................................... 129
        B. Caroleo and T. Taurino
        4.4.1 Basic Concepts for SME Network
             Performance Analysis..................................................... 136
   4.5 The SME Network Analysis Methodology ............................ 136
        D. Antonelli, B. Caroleo and T. Taurino
