Contents

Preface .......................................................... vii

Scientific Portrait of
Alexander Vasilievich Kazhikhov .......................... ix

G.V. Alekseev and D.A. Tereshko
Boundary Control Problems for Stationary Equations
of Heat Convection ........................................... 1

Y. Amirat and V. Shelukhin
Homogenization of the Poisson–Boltzmann Equation .......... 23

S.N. Antontsev and N.V. Chemetov
Superconducting Vortices: Chapman Full Model ............... 41

D. Bresch, E.D. Fernández-Nieto, I.R. Ionescu and P. Vigneaux
Augmented Lagrangian Method and Compressible Visco-plastic
Flows: Applications to Shallow Dense Avalanches .............. 57

D. Bresch, B. Desjardins and E. Grenier
Oscillatory Limits with Changing Eigenvalues: A Formal Study ...... 91

A.Yu. Chebotarev
Finite-dimensional Control for the Navier–Stokes Equations .... 105

H. Beirão da Veiga
On the Sharp Vanishing Viscosity Limit
of Viscous Incompressible Fluid Flows .......................... 113

E. Feireisl and A. Novotný
Small Péclet Number Approximation as a Singular Limit
of the Full Navier-Stokes-Fourier System with Radiation .......... 123

E. Feireisl and A. Vasseur
New Perspectives in Fluid Dynamics: Mathematical Analysis
of a Model Proposed by Howard Brenner ........................ 153
J. Frehse and M. Ružička
Existence of a Regular Periodic Solution to the Rothe Approximation of the Navier–Stokes Equation in Arbitrary Dimension .............................................. 181

A.V. Fursikov and R. Rannacher
Optimal Neumann Control for the Two-dimensional Steady-state Navier-Stokes equations ................................. 193

S. Itoh, N. Tanaka and A. Tani
On Some Boundary Value Problem for the Stokes Equations with a Parameter in an Infinite Sector ................................. 223

A. Khludnev
Unilateral Contact Problems Between an Elastic Plate and a Beam ................................................................. 237

W. Layton and A. Novotný
On Lighthill’s Acoustic Analogy for Low Mach Number Flows ....... 247

A.E. Mamontov
On the Uniqueness of Solutions to Boundary Value Problems for Non-stationary Euler Equations ................................. 281

M. Padula
On Nonlinear Stability of MHD Equilibrium Figures ................. 301

V.V. Pukhnachev
Viscous Flows in Domains with a Multiply Connected Boundary ..... 333

E.V. Radkevich
Problems with Insufficient Information about Initial-boundary Data ................................................................. 349

V.A. Solonnikov
On the Stability of Non-symmetric Equilibrium Figures of Rotating Self-gravitating Liquid not Subjected to Capillary Forces ................................................................. 379

V.N. Starovoitov and B.N. Starovoitova
Dynamics of a Non-fixed Elastic Body ........................................ 415
New Directions in Mathematical Fluid Mechanics
The Alexander V. Kazhikhov Memorial Volume
Fursikov, A.V.; Galdi, G.P.; Pukhnachev, V.V. (Eds.)
2010, XI, 432 p., Hardcover
ISBN: 978-3-0346-0151-1
A product of Birkhäuser Basel
