Contents

Stochastic Analysis and Optimization of Multiserver Systems .......... 1
Mark S. Squillante

On the Selection of Models for Runtime Prediction of System Resources .................................................. 25
Sara Casolari and Michele Colajanni

Estimating Model Parameters of Adaptive Software Systems in Real-Time 45
Dinesh Kumar, Asser Tantawi, and Li Zhang

A Control-Theoretic Approach for the Combined Management of Quality-of-Service and Energy in Service Centers ........ 73
Charles Poussot-Vassal, Mara Tanelli, and Marco Lovera

The Emergence of Load Balancing in Distributed Systems: the SelfLet Approach .................................................. 97
Nicolò M. Calcavecchia, Danilo Ardagna, and Elisabetta Di Nitto

Run Time Models in Adaptive Service Infrastructure ................. 125
Marco Autili, Paola Inverardi, and Massimo Tivoli

On the Modeling and Management of Cloud Data Analytics ........ 153
Claris Castillo, Asser Tantawi, Malgorzata Steinder, and Giovanni Pacifici
Run-time Models for Self-managing Systems and Applications
Ardagna, D.; Zhang, L. (Eds.)
2010, IX, 185 p., Softcover
ISBN: 978-3-0346-0432-1
