Contents

Computing an Upper Bound for the Longest Edge in an Optimal TSP-Solution. .......................... 1
Hans Achatz and Peter Kleinschmidt

Electricity Storage Systems and Their Allocation in the German Power System .......................... 7
Sonja Babrowski, Patrick Jochem and Wolf Fichtner

Theo Berger

Primal MINLP Heuristics in a Nutshell .......................... 23
Timo Berthold

Layout Optimisation of Decentralised Energy Systems Under Uncertainty .......................... 29
Valentin Bertsch, Hannes Schwarz and Wolf Fichtner

Analysis of Micro–Macro Transformations of Railway Networks .......................... 37
Marco Blanco and Thomas Schlechte

A Human Resource Model for Performance Optimization to Gain Competitive Advantage .......................... 43
Joachim Block and Stefan Pickl

Re-Optimization of Rolling Stock Rotations .......................... 49
Ralf Borndörfer, Julika Mehrgardt, Markus Reuther, Thomas Schlechte and Kerstin Waas

Branch-and-Price on the Split Delivery Vehicle Routing Problem with Time Windows and Alternative Delivery Periods .......................... 57
Heiko Breier and Timo Gossler
Welfare Maximization of Autarkic Hybrid Energy Systems       67
Katja Breitmoser, Björn Geißler and Alexander Martin

Determining Optimal Discount Policies for a Supplier in B2B
Relationships                                       75
Viktoria Buhayenko and Erik van Eikenhorst

Exact and Compact Formulation of the Fixed-Destination
Travelling Salesman Problem by Cycle Imposement Through
Node Currents                                       83
Mernout Burger

0–1 Multiband Robust Optimization                    89
Christina Büsing, Fabio D’Andreagiovanni and Annie Raymond

A Branch-and-Price Approach for a Ship Routing Problem
with Multiple Products and Inventory Constraints       97
Rutger de Mare, Remy Spliet and Dennis Huisman

Data Driven Ambulance Optimization Considering Dynamic
and Economic Aspects                                 105
Dirk Degel, Lara Wiesche and Brigitte Werners

Risk-Adjusted On-line Portfolio Selection             113
Robert Dochow, Esther Mohr and Günter Schmidt

Quantified Combinatorial Optimization                121
Thorsten Ederer, Ulf Lorenz and Thomas Opfer

On the Modeling of Recharging Stops in Context of Vehicle
Routing Problems                                     129
Stefan Frank, Henning Preis and Karl Nachtigall

Demand Fulfillment in an Assemble-to-Order Production System  137
Sebastian Geier and Bernhard Fleischmann

Integrating Keyword Advertising and Dynamic Pricing
for an Online Market Place                            145
Thomas Goertz, Jella Pfeiffer, Henning Schmidt and Franz Rothlauf

Characterizing Relatively Minimal Elements
via Linear Scalarization                              153
Sorin-Mihai Grad and Emilia-Loredana Pop
An MBLP Model for Scheduling Assessment Centers .......................... 161
Joëlle Grüter, Norbert Trautmann and Adrian Zimmermann

DEA Modeling for Efficiency Optimization of Indian Banks with Negative Data Sets .............................................. 169
Pankaj Kumar Gupta and Seema Garg

The Inventory Management of Fresh Vegetables Using Inventory Balance and Across of Its Supply Chain ............................. 177
Adi Djoko Guritno, Henry Yuliando and Endy Suwondo

Moving Bins from Conveyor Belts onto Pallets Using FIFO Queues ................................................................. 185
Frank Gurski, Jochen Rethmann and Egon Wanke

A Generalization of Odd Set Inequalities for the Set Packing Problem ................................................................. 193
Olga Heismann and Ralf Borndörfer

New Lower Bounds for the Three-Dimensional Strip Packing Problem ................................................................. 201
Kirsten Hoffmann

A New Method for Parameter Estimation of the GNL Model Using Real-Coded GA .................................................. 209
Yasuhiro Iida, Kei Takahashi and Takahiro Ohno

Inventory Control with Supply Backordering ........................................ 217
Marko Jakšić

Sequencing Problems with Uncertain Parameters and the OWA Criterion .......................................................... 223
Adam Kasperski and Paweł Zieliński

Application of Scheduling Theory to the Bus Evacuation Problem ... 231
Corinna Kaufmann

Modelling Delay Propagation in Railway Networks .......................... 237
Fabian Kirchhoff

Sensitivity Analysis of BCC Efficiency in DEA with Application to European Health Services ................................. 243
Andreas Kleine, Andreas Dellnitz and Wilhelm Rödder
Competition for Resources .................................................. 249
Max Klimm

Analysis of Full Load Hours ........................................... 255
André Koukal, Stefan Lange and Michael H. Breitner

An Integer Programming Approach to the Hospitals/Residents
Problem with Ties ....................................................... 263
Augustine Kwanashie and David F. Manlove

Learning in Highly Polarized Conflicts ..................................... 271
Sigifredo Laengle and Gino Loyola

Marginal Cost of Capacity for the Case of Overlapping Capacity
Investments ............................................................... 279
Christian Lohmann

Supply Chain Coordination Under Demand Uncertainty:
Analysis of General Continuous Quantity Discounts .................. 287
Hamid Mashreghi and Mohammad Reza Amin-Naseri

An Integer Programming Model for the Hospitals/Residents
Problem with Couples ................................................... 293
Iain McBride and David F. Manlove

Techno-economic Analysis and Evaluation of Recycling Measures
for Iron and Steel Slags .................................................. 301
Christoph Meyer, Matthias G. Wichmann and Thomas S. Spengler

Dynamical Supply Networks for Crisis and Disaster Relief:
Networks Resilience and Decision Support in Uncertain
Environments .............................................................. 309
Silja Meyer-Nieberg, Erik Kropat and Patrick Dolan Weber

A Column Generation Approach to Home Care Staff Routing
and Scheduling ............................................................ 317
Susumu Morito, Daiki Kishimoto, Hiroki Hayashi, Atsushi Torigoe,
Shigeo Okamoto, Yuki Matsukawa and Nao Taniguchi

A Dynamic Customer-Centric Pricing Approach for the Product
Line Pricing Problem .................................................... 325
Michael Neugebauer
Mathematical Formulations for the Acyclic Partitioning Problem .......................... 333
Jenny Nossack and Erwin Pesch

Minimizing Risks for Health at Assembly Lines .................................. 341
Alena Otto

A Multi-Objective Online Terrain Coverage Approach .............................. 347
Michael Preuß

Hot Strip Mill Scheduling Under Consideration of Energy Consumption .......................................................... 355
Karen Puttkammer, Matthias G. Wichmann and Thomas S. Spengler

Capacitated Network Design .......................................................... 363
Christian Raack

Robustness Analysis of Evolutionary Algorithms to Portfolio Optimization Against Errors in Asset Means .................................................. 369
Omar Rifki and Hirotaka Ono

Two-Stage Robust Combinatorial Optimization with Priced Scenarios .......... 377
Roman Rischke

Workload Balancing in Transportation Crew Rostering ........................... 383
Güvenç Şahin and Fardin Dashty Saridarq

An Optimal Placement of a Liaison with Short Communication Lengths Between Two Members of the Same Level in an Organization Structure of a Complete K-ary Tree .................................... 389
Kiyoshi Sawada

Clustering for Data Privacy and Classification Tasks .................................. 397
Klaus B. Schebesch and Ralf Stecking

A Decision Support Concept for Advanced Treatment Planning for Breast Cancer .......................................................... 405
Alexander Scherrer, Patrick Rüdiger, Andreas Dinges, Karl-Heinz Küfer, Ilka Schwidde and Sherko Kümmel

Comparison of Heuristics Towards Approaching a Scheduling and Capacity Planning MINLP for Hydrogen Storage in Chemical Substances .......................................................... 413
Simon Schulte Beerbühl, Magnus Fröhling and Frank Schultmann
