## Contents

### Section A: Performance Benchmarking and Analysis

Quantifying Architectural Requirements of Contemporary Extreme-Scale Scientific Applications. .................................................................................................................. 3  
*Jeffrey S. Vetter, Seyong Lee, Dong Li, Gabriel Marin, Collin McCurdy, Jeremy Meredith, Philip C. Roth, and Kyle Spafford*

Performance Evaluation of the Intel Sandy Bridge Based NASA Pleiades Using Scientific and Engineering Applications ................................................................. 25  
*Subhash Saini, Johnny Chang, and Haoqiang Jin*

Analysis of Cray XC30 Performance Using Trinity-NERSC-8 Benchmarks and Comparison with Cray XE6 and IBM BG/Q ........................................................................ 52  
*M.J. Cordery, Brian Austin, H.J. Wassermann, C.S. Daley, N.J. Wright, S.D. Hammond, and D. Doerfler*

Analysis of Data Reuse in Task-Parallel Runtimes ........................................... 73  
*Miquel Pericàs, Abdelhalim Amer, Kenjiro Taura, and Satoshi Matsuoka*

### Section B: Performance Modeling and Simulation

Using Simulation to Evaluate the Performance of Resilience Strategies at Scale. ................................................................................................................................. 91  
*Scott Levy, Bryan Topp, Kurt B. Ferreira, Dorian Arnold, Torsten Hoefler, and Patrick Widener*

Characterizing the Impact of Prefetching on Scientific Application Performance .................................................................................................................. 115  
*Collin McCurdy, Gabriel Marin, and Jeffrey S. Vetter*

Performance Modeling of Gyrokinetic Toroidal Simulations for a Many-Tasking Runtime System ............................................................................................... 136  
*Matthew Anderson, Maciej Brodowicz, Abhishek Kulkarni, and Thomas Sterling*

Toward Better Simulation of MPI Applications on Ethernet/TCP Networks. . . 158  
*Paul Bédaride, Augustin Degomme, Stéphane Genaud, Arnaud Legrand, George S. Markomanolis, Martin Quinson, Mark Stillwell, Frédéric Suter, and Brice Videau*
Sesh Framework: A Space Exploration Framework for GPU Application and Hardware Codesign ......................................................... 182
   Joo Hwan Lee, Jiayuan Meng, and Hyesoon Kim

Optimal Checkpointing Period: Time vs. Energy ......................... 203
   Guillaume Aupy, Anne Benoît, Thomas Hérault, Yves Robert, and Jack Dongarra

Section C: Performance Optimization

Tuning HipGISAXS on Multi and Many Core Supercomputers ............. 217
   Abhinav Sarje, Xiaoye S. Li, and Alexander Hexemer

Multi Objective Optimization of HPC Kernels for Performance, Power, and Energy ............................................................. 239
   Prasanna Balaprakash, Ananta Tiwari, and Stefan M. Wild

Performance Tuning of Fock Matrix and Two-Electron Integral Calculations for NWChem on Leading HPC Platforms .................... 261
   Hongzhang Shan, Brian Austin, Wibe De Jong, Leonid Oliker, N.J. Wright, and Edoardo Apra

Performance Analysis of the NWChem TCE for Different Communication Patterns .............................................................. 281
   Priyanka Ghosh, Jeff R. Hammond, Sayan Ghosh, and Barbara Chapman

Author Index .................................................................................. 295
4th International Workshop, PMBS 2013, Denver, CO, USA, November 18, 2013. Revised Selected Papers
Jarvis, S.; Wright, S.; Hammond, S.D. (Eds.)
2014, XII, 295 p. 136 illus., Softcover
ISBN: 978-3-319-10213-9
