Contents

Part I  Geometric Measure Theory

Sixty Years of Fractal Projections .......................................................... 3
Kenneth Falconer, Jonathan Fraser, and Xiong Jin

Scenery Flow, Conical Densities, and Rectifiability ......................... 27
Antti Käenmäki

The Shape of Anisotropic Fractals: Scaling of Minkowski Functionals ... 39
Philipp Schönhöfer and Klaus Mecke

Projections of Self-Similar and Related Fractals: A Survey
of Recent Developments ................................................................. 53
Pablo Shmerkin

Part II  Self-Similar Fractals and Recurrent Structures

Dimension of the Graphs of the Weierstrass-Type Functions .......... 77
Krzysztof Barański

Tiling $\mathbb{Z}^2$ by a Set of Four Elements ........................................ 93
De-Jun Feng and Yang Wang

Some Recent Developments in Quantization of Fractal Measures ....... 105
Marc Kesseböhmer and Sanguo Zhu

Apollonian Circle Packings ............................................................... 121
Mark Pollicott

Entropy of Lyapunov-Optimizing Measures of Some Matrix Cocycles… 143
Michał Rams
Part III  Analysis and Algebra on Fractals

Poincaré Functional Equations, Harmonic Measures on Julia Sets, and Fractal Zeta Functions .......................................................... 157
Peter J. Grabner

From Self-Similar Groups to Self-Similar Sets and Spectra ............... 175
Rostislav Grigorchuk, Volodymyr Nekrashevych, and Zoran Šunić

Finite Energy Coordinates and Vector Analysis on Fractals .............. 209
Michael Hinz and Alexander Teplyaev

Fractal Zeta Functions and Complex Dimensions: A General
Higher-Dimensional Theory ............................................................ 229
Michel L. Lapidus, Goran Radunović, and Darko Žubrinić

Part IV  Multifractal Theory

Inverse Problems in Multifractal Analysis ..................................... 261
Julien Barral

Multifractal Analysis Based on $p$-Exponents and Lacunarity
Exponents .................................................................................. 279
Patrice Abry, Stéphane Jaffard, Roberto Leonarduzzi, Clothilde Melot, and Herwig Wendt

Part V  Random Constructions

Dimensions of Random Covering Sets ......................................... 317
Esa Järvenpää and Maarit Järvenpää

Expected Lifetime and Capacity .................................................. 327
András Telcs and Marianna E.-Nagy
Fractal Geometry and Stochastics V
Bandt, C.; Falconer, K.; Zähle, M. (Eds.)
2015, X, 340 p. 52 illus., 21 illus. in color., Hardcover
ISBN: 978-3-319-18659-7
A product of Birkhäuser Basel
