

Contents

1	Introducing Internal Waves	1
1.1	Introduction.	1
1.2	Internal Ocean Waves and Their Significance	2
1.3	Experimental Insights into Internal Waves.	3
1.4	Useful Definitions	6
1.5	Stability of Water Masses	9
1.6	Governing Equations	11
	References	22
2	Internal Waves in Two-Layer Sea	25
2.1	Introduction.	25
2.2	Analytic Solutions for Infinitesimal Interfacial Waves.	25
2.3	Progressive Interfacial Waves of Finite Amplitude	33
2.3.1	Deep and Intermediate Waters.	33
2.3.2	Long Interfacial Waves.	35
	References	43
3	Waves in a Continuously Stratified Sea of Constant Water Depth	45
3.1	Introduction.	45
3.2	Exponential Density Profile.	46
3.3	Three-Layer Density Profile	53
3.4	Other Specific Density Profiles	59
3.5	Arbitrary Density Profile—Variational Approach	61
3.6	System of Two Pycnoclines	64
3.7	Weakly Nonlinear Long Waves	69
3.8	Wave Energy in a Stratified Fluid	77

3.9	Remarks on Wave Induced Mixing in a Stratified Fluid	81
3.9.1	Mixing in Two-Layer Flow System	81
3.9.2	Role of Internal Waves in Supporting Turbulent Mixing.	82
	References	85
4	Waves in a Continuously Stratified Sea of Varying Depth	87
4.1	Introduction.	87
4.2	Review of Available Theoretical and Numerical Prediction Methods	87
4.3	Waves Propagating on a Coastal Slope	89
4.4	Ray Method for Internal Waves	95
4.5	Nonlinear Internal Waves Propagation in a Horizontally Inhomogeneous Sea	99
	References	105
5	Generation of Internal Waves	109
5.1	Introduction.	109
5.2	Generation of Internal Waves by Localised Disturbances.	109
5.3	Generation of Internal Waves by Wind Action and Atmospheric Pressure Fluctuations	112
	References	117
6	Spectral Properties of Internal Waves	119
6.1	Introduction.	119
6.2	Internal Waves Spectra with a Given Modal Structure	120
6.3	Experimental Spectra for Internal Waves in Deep Ocean.	128
	References	130
7	Internal Waves in the Baltic Sea	131
7.1	Introduction.	131
7.2	Basic Hydrographical and Dynamical Features of the Baltic Sea	131
7.3	Observations of Internal Waves Using Thermistors Chain	135
7.4	Observations of Vertical Water Structure Using Moving CTD Sensors.	142
	References	150
	Appendix A: Sea Water Density According to UNESCO Formula.	153
	Appendix B: Determination of Isopycnal Displacements by Moving CTD Sensors	157
	Index	161

Internal Gravity Waves in the Shallow Seas

Massel, S.R.

2015, XVI, 163 p. 55 illus., 10 illus. in color., Hardcover

ISBN: 978-3-319-18907-9
