Contents

Assurance Cases for Software-Intensive Systems (ASSURE 2015)

Informing Assurance Case Review Through a Formal Interpretation of GSN Core Logic .................................................. 3
Victor Bandur and John McDermid

Representing Confidence in Assurance Case Evidence ............. 15
Lian Duan, Sanjai Rayadurgam, Mats P.E. Heimdahl, Oleg Sokolsky, and Insup Lee

Safe & Sec Case Patterns ............................................... 27
Kenji Taguchi, Daisuke Souma, and Hideaki Nishihara

A Comprehensive Safety Lifecycle ..................................... 38
John Knight, Jonathan Rowanhill, M. Anthony Aiello, and Kimberly Wasson

An Approach to Assure Dependability Through ArchiMate ........ 50
Shuichiro Yamamoto

Tool Support for Assurance Case Building Blocks: Providing a Helping Hand with CAE ................................................. 62
Kateryna Netkachova, Oleksandr Netkachov, and Robin Bloomfield

Safety.Lab: Model-Based Domain Specific Tooling for Safety Argumentation ............................................................. 72
Daniel Ratiu, Marc Zeller, and Lennart Killian

A Safety Condition Monitoring System ............................... 83
John Knight, Jonathan Rowanhill, and Jian Xiang

Error Type Refinement for Assurance of Families of Platform-Based Systems ................................................................. 95
Sam Procter, John Hatcliff, Sandy Weininger, and Anura Fernando

Qualitative and Quantitative Analysis of CFTs Taking Security Causes into Account ...................................................... 109
Max Steiner and Peter Liggesmeyer
Sequential Logic for State/Event Fault Trees: A Methodology to Support the Failure Modeling of Cyber Physical Systems .................. 121
   Michael Roth and Peter Liggesmeyer

Towards a Framework for Alignment Between Automotive Safety and Security Standards ............................................. 133
   Christoph Schmittner and Zhendong Ma

Reconfiguration Testing for Cooperating Autonomous Agents ........... 144
   Francesca Saglietti, Stefan Winzinger, and Raimar Lill

A Motion Certification Concept to Evaluate Operational Safety and Optimizing Operating Parameters at Runtime ........... 156
   Sebastian Müller and Peter Liggesmeyer

Approach for Demonstrating Safety for a Collision Avoidance System .... 167
   Thomas Gruber and Christian Zinner

Contract Modeling and Verification with FormalSpecs Verifier Tool-Suite - Application to Ansaldo STS Rapid Transit Metro

System Use Case .................................................. 178
   Marco Carloni, Orlando Ferrante, Alberto Ferrari, Gianpaolo Massaroli, Antonio Orazzo, and Luigi Velardi

Towards Verification of Multicore Motor-Drive Controllers in Aerospace ... 190
   Stylianos Basagiannis and Francisco Gonzalez-Espin

FlexRay Robustness Testing Contributing to Automated Safety Certification .............................................................. 201
   Erwin Kristen and Egbert Althammer

Towards Perfectly Scalable Real-Time Systems ........................................ 212
   Peter Priller, Werner Gruber, Niklas Olberding, and Dietmar Peinsipp

Dependable Cyber-Physical Systems with Redundant Consumer
Single-Board Linux Computers .................................................. 224
   Øyvind Netland and Amund Skavhaug

International Workshop on the Integration of Safety and Security Engineering (ISSE 2015)

A Combined Safety-Hazards and Security-Threat Analysis Method for Automotive Systems .................................................. 237
   Georg Macher, Andrea Höller, Harald Sporer, Eric Armengaud, and Christian Kreiner
Safety and Security Assessment of Behavioral Properties Using Alloy

Julien Brunel and David Chemouil

Combining MILS with Contract-Based Design for Safety and Security Requirements

Alessandro Cimatti, Rance DeLong, Davide Marcantonio, and Stefano Tonetta

Security Analysis of Urban Railway Systems: The Need for a Cyber-Physical Perspective

Binbin Chen, Christoph Schmittner, Zhendong Ma, William G. Temple, Xinshu Dong, Douglas L. Jones, and William H. Sanders

Sequential and Parallel Attack Tree Modelling

Florian Arnold, Dennis Guck, Rajesh Kumar, and Marièle Stoelinga

International Workshop on Reliability and Security Aspects for Critical Infrastructure Protection (ReSA4CI 2015)

Analysis of Companies Gaps in the Application of Standards for Safety-Critical Software

Andrea Ceccarelli and Nuno Silva

Simulative Evaluation of Security Attacks in Networked Critical Infrastructures

Marco Tiloca, Francesco Racciatti, and Gianluca Dini

Optimization of Reconfiguration Mechanisms in Critical Infrastructures

Szilvia Varró-Gyapay, Dániel László Magyar, Melinda Kocsis-Magyar, Katalin Tasi, Attila Hoang thanh Dinh, Ágota Bausz, and László Gőnczy

How to Use Mobile Communication in Critical Infrastructures: A Dependability Analysis

Jonas Wäfler and Poul E. Heegaard

Using Structured Assurance Case Approach to Analyse Security and Reliability of Critical Infrastructures

Kateryna Netkachova, Robin Bloomfield, Peter Popov, and Oleksandr Netkachov

Multidirectional Modular Conditional Safety Certificates

Tiago Amorim, Alejandra Ruiz, Christoph Dropmann, and Daniel Schneider
