Contents

Information Systems

Special Session on E-Health Information Systems

A System for Uncovering Latent Connectivity of Health Care Providers in Online Reviews. ................................................................. 3
Fredrik S. Bäumer, Michaela Geierhos, and Sabine Schulze

Business Intelligence Application for Analyses of Stress Potential Zones in the Population Doing Sports ........................................... 16
Věra Strnadová and Petr Voborník

Application of ISO 13606 Archetypes for an Integration of Hospital and Laboratory Information Systems ............................................. 29
Georgy Kopanitsa and Maxim Taranik

Using Semi-automated Approach for Mapping Local Russian Laboratory Terms to LOINC. ................................................................. 37
Georgy Kopanitsa and Maxim Taranik

Automation of Colorblindness Detection in Computer-Based Screening Test .......................................................... 45
Maciej Laskowski

GMM-Based Molecular Serum Profiling Framework ................................................. 57
Małgorzata Plechawska-Wójcik

Energy Efficient Method for Motor Imagery Data Compression .......................... 71
Darius Birvinskas and Vacius Jusas

Comparison of Feature Extraction Methods for EEG BCI Classification ............. 81
Tomas Uktveris and Vacius Jusas

Special Session on Smart E-Learning Technologies and Systems

Best Practices for e-Learning in On-Campus and Distance Education – A Case Study of Karlstad University ........................................... 93
Prima Gustiené and Monika Magnusson

Information System of Students’ Knowledge Test Control .......................... 104
Olga Alekseenko, Iryna Baranova, Svitlana Vashchenko, and Andrii Sobol
CVLA: Integrating Multiple Analytics Techniques in a Custom Moodle Report ................................................................. 115
   Bogdan Drăgulescu, Marian Bucos, and Radu Vasiu

The Value of Video Lectures in the Classroom - UPT Study Case .............. 127
   Mihai Onița, Camelia Ciuclea, and Radu Vasiu

An Ontology Oriented Approach for E-Learning Objects Design and Improvement .......................................................... 138
   Armantas Ostreika, Radu Vasiu, Daina Gudoniene, Rytis Maskeliunas, and Danguole Rutkauskiene

The LO Sequencing Problem and Its Solution Using Meta-Programming-Based Approach ..................................................... 151
   Vytautas Štuikys, Renata Burbaitė, and Kristina Bespalova

Business Intelligence for Information and Software Systems

Special Session on Innovative Applications for Knowledge Transfer Support

A Strategy Map of Tacit Knowledge for Manufacturing Companies.
   An Empirical Study ......................................................... 167
   Justyna Patalas-Maliszewska and Irene Krebs

Rule-Based Table Analysis and Interpretation ........................................ 175
   Alexey Shigarov

The Forecasting of the Daily Heat Demand of the Public Sector Buildings with District Heating .............................................. 187
   Yuliia Parfenenko, Vira Shendryk, Svitlana Vashchenko, and Natalya Fedotova

Implementation of the AHP Method in ERP-Based Decision Support Systems for a New Product Development ..................... 199
   Slawomir Klos

Special Session on Impact of Business Intelligence on the Economy and Society

HYRE-ME – Hybrid Architecture for Recommendation and Matchmaking in Employment ...................................................... 208
   Bruno Coelho, Fernando Costa, and Gil M. Gonçalves

Perceived Benefits, Risks and Trust on Online Shopping Festival ............ 225
   Yuan Xu, Tristan W. Chong, Tomas Krilavičius, and Ka Lok Man
Agent-Based Modelling and Simulations as an Integral Functionality of the Business Intelligence Framework ........................................ 236
Vladimír Bureš, Petr Blecha, and Petr Tučnik

Risks and Benefits of Cloud Business Intelligence. .................. 246
Petra Maresová

Enterprise Resource Planning Systems as a Support Tool of Increasing of Performance of the Company ........................................ 257
Helena Jacova and Josef Horák

The Emergence of Public Intelligence: Penetration of Business Intelligence into the Public Administration Realm .................... 268
Tereza Otčenášková, Vladimír Bureš, Pavel Čech, and Fridrich Racz

Software Engineering

Special Session on Intelligent Systems and Software Engineering Advances

The Theoretical Connections Between Agile Software Development and Innovative Climate ................................................. 281
Tomi Juhola, Sami Hyrynsalmi, Tuomas Mäkilä, and Ville Leppänen

Inheritance in Object-Oriented Knowledge Representation ......... 293
Dmytro Terletskyi

QoS-Based Web Services Composition Optimization with an Extended Bat Inspired Algorithm ............................................. 306
Serial Rayene Boussalia, Allaoua Chaoui, and Aurélie Hurault

Automated Distribution of Software to Multi-core Hardware in Model Based Embedded Systems Development .......................... 320
Lukas Krawczyk, Carsten Wolff, and Daniel Fruhner

Risk Evaluation: The Paradigm and Tools .............................. 330
Aiste Balzukiene, Egle Gaule, Raimundas Jasinevicius, Egidijus Kazanavicius, and Vytautas Petrauskas

Weighted Classification Error Rate Estimator for the Euclidean Distance Classifier ......................................................... 343
Mindaugas Gvardinskas

Application of Intelligent Algorithm to Solve the Fractional Heat Conduction Inverse Problem ........................................ 356
Rafal Brociek and Damian Slota

Intelligent System for Detection of Breathing Disorders ............. 366
Marcin Szczygiel, Paweł Kielan, Edyta Hetmaniok, Damian Slota, Roman Witula, and Adam Zielonka
