## Contents

### Smart Cities and Distributed Systems

Insertion Modeling and Symbolic Verification of Large Systems .......................... 3
  *Alexander Letichevsky, Oleksandr Leytchevskyi, Volodymyr Peschanenko, and Thomas Weigert*

A Model-Based Framework for SLA Management and Dynamic Reconfiguration .................. 19
  *Mahin Abbasipour, Ferhat Khendek, and Maria Toeroe*

SDL - The IoT Language ................................................................. 27
  *Edel Sherratt, Ileana Ober, Emmanuel Gaudin, Pau Fonseca i Casas, and Finn Kristoffersen*

Event Pattern Mining for Smart Environments ..................................................... 42
  *Lars George*

### Specification and Description Language

Simulating Distributed Systems with SDL and Hardware-in-the-Loop ......................... 49
  *Tobias Braun and Dennis Christmann*

Name Resolution of SDL Revisited: Drawbacks and Possible Enhancements ................... 65
  *Alexander Kraas*

An Experiment to Introduce Interrupts in SDL .................................................... 81
  *Emmanuel Gaudin and Alain Clouard*

### Domain Specific Languages

LanguageLab - A Meta-modelling Environment .................................................... 91
  *Terje Gjøsæter and Andreas Prinz*

Consistency of Task Trees Generated from Website Usage Traces ............................ 106
  *Patrick Harms and Jens Grabowski*

On the Semantic Transparency of Visual Notations: Experiments with UML ............... 122
  *Amine El Kouhen, Abdelouahed Gherbi, Cédric Dumoulin, and Ferhat Khendek*
Goal Modeling

On the Reuse of Goal Models .......................................................... 141
  Mustafa Berk Duran, Gunter Mussbacher, Nishanth Thimmegowda,
  and Jörg Kienzle

Adding a Textual Syntax to an Existing Graphical Modeling Language:
Experience Report with GRL ................................................. 159
  Vahdat Abdelzad, Daniel Amyot, and Timothy C. Lethbridge

Use-Case Modeling

Generating Software Documentation in Use Case Maps from Filtered
Execution Traces. ................................................................. 177
  Edna Braun, Daniel Amyot, and Timothy C. Lethbridge

Towards the Generation of Tests in the Test Description Language
from Use Case Map Models .................................................. 193
  Patrice Boulet, Daniel Amyot, and Bernard Stepien

Describing Early Security Requirements Using Use Case Maps ........... 202
  Jameleddine Hassine and Abdelwahab Hamou-Lhadj

Model-Based Testing

Generating Configurations for System Testing with Common
Variability Language ............................................................... 221
  Daisuke Shimbara and Øystein Haugen

Model-Based Product Line Testing: Sampling Configurations for Optimal
Fault Detection ................................................................. 238
  Hartmut Lackner

Testing Business Processes Using TTCN-3. .................................. 252
  Bernard Stepien, Kavya Mallur, and Liam Peyton

Generating Performance Test Model from Conformance Test Logs ....... 268
  Gusztáv Adamis, Gábor Kovács, and György Réthy

Author Index ................................................................. 285
SDL 2015: Model-Driven Engineering for Smart Cities
17th International SDL Forum, Berlin, Germany, October 12-14, 2015, Proceedings
Fischer, J.; Scheidgen, M.; Schieferdecker, I.; Reed, R. (Eds.)
2015, XIV, 285 p. 90 illus. in color., Softcover
ISBN: 978-3-319-24911-7
