Regular Papers

A Context-Aware Usage Prediction Approach for Smartphone Applications . . . 3
   Jingjing Huangfu, Jian Cao, and Chenyang Liu

A Framework for Fast Service Verification and Query Execution
   for Boolean Service Rules .......................... 17
   Soumi Chattopadhyay, Saikat Dutta, and Ansuman Banerjee

A Novel Reactive-Predictive Hybrid Resource Provision Method
   in Cloud Datacenter ................................. 33
   Guorui Sun, ZhiHui Lu, Jie Wu, Xueying Wang, and Patrick Hung

A Social Balance Theory-Based Service Recommendation Approach .......... 48
   Lianyong Qi, Xuyun Zhang, Yiping Wen, and Yuming Zhou

A Software-Defined Cloud Resource Management Framework .............. 61
   Aaqif Afzaal Abbasi, Hai Jin, and Song Wu

Automated Clarification of Constraints in Web Services for Accurate
   Service Reuse ....................................... 76
   Xiaocao Hu, Zhiyong Feng, Shizhan Chen, and Keman Huang

Common Topic Group Mining for Web Service Discovery ................. 92
   Jian Wang, Panpan Gao, Yutao Ma, and Keqing He

Context-Aware Web Services Recommendation Based on User
   Preference Expansion ................................ 108
   Yakun Hu, Xiaoliang Fan, Ruisheng Zhang, and Wenbo Chen

CPFirewall: A Novel Parallel Firewall Scheme for FWaaS
   in the Cloud Environment ................................ 121
   Zhenfang Wang, ZhiHui Lu, Jie Wu, and Kang Fan

Dependency Aware Business Process Analysis for Service Identification .... 137
   Jiawei Li, Wenge Rong, Chuantao Yin, and Zhang Xiong

Dynamic Allocation of Virtual Resources Based on Genetic Algorithm
   in the Cloud ......................................... 153
   Li Deng and Li Yao
Effective Mashup Service Clustering Method by Exploiting LDA Topic Model from Multiple Data Sources ........................................ 165
Buqing Cao, Xiaoqing (Frank) Liu, Jianxun Liu, and Mingdong Tang

Efficient Search-Based Automatic Execution Replay for Virtual Machines ... 181
Tao Wang, Jianhua Zhang, Wenbo Zhang, Jiwei Xu, and Jun Wei

Leveraging Process Mining on Service Events Towards Service Composition ......................................................... 195
Yulai Li, Hongming Cai, Chengxi Huang, and Fenglin Bu

RAID-6Plus: A Fast and Reliable Coding Scheme Aided by Multi-failure Degradation .................................................. 210
Ming-Zhu Deng, Yang Ou, Nong Xiao, Song-Ping Yu, Wei Chen, Zhi-Guang Chen, and Fang Liu

The Searching Ranking Model Based on the Sharing and Recommending Mechanism of Social Network .................... 222
Hongxiao Fei, Tianchi Mo, Yang Wang, Zequan Wu, Yihuan Liu, and Li Kuang

WebCDN: A Peer-to-Peer Web Browser CDN Based WebRTC ................. 235
Kai Shuang, Xin Cai, Peng Xu, and Qiannan Jia

Short Papers

DDS: A Deadline Driven Workflow Scheduling Algorithm for Hybrid Amazon Instances .................................................. 247
Zitai Ma, Jian Cao, and Shiyou Qian

GPU-based Static State Security Analysis in Power Systems ................. 258
Yong Chen, Hai Jin, Han Jiang, Dechao Xu, Ran Zheng, and Haocheng Liu

Improved WSN Capabilities Through Efficient Duty-Cycle Mechanism .... 268
Zibouda Aliouat and Makhlof Aliouat

Mining Multiple Periods in Event Time Sequence ........................................ 278
Bing Xu, Zhijun Ding, and Hongzhong Chen

Social Aware Mobile Payment Service Popularity Analysis:
The Case of WeChat Payment in China ......................................... 289
Yue Qu, Wenge Rong, Yuanxin Ouyang, Huì Chen, and Zhang Xiong

Towards Truly Elastic Distributed Graph Computing in the Cloud .......... 300
Lu Lu, Xuanhua Shi, and Hai Jin
