Preface

The Symposium on Logical Foundations of Computer Science series provides a forum for the fast-growing body of work in the logical foundations of computer science, e.g., those areas of fundamental theoretical logic related to computer science. The LFCS series began with “Logic at Botik,” Pereslavl-Zalessky, 1989, which was co-organized by Albert R. Meyer (MIT) and Michael Taitslin (Tver). After that, the organization passed to Anil Nerode. Currently LFCS is governed by a Steering Committee consisting of Anil Nerode (General Chair), Stephen Cook, Dirk van Dalen, Yuri Matiyasevich, J. Alan Robinson, Gerald Sacks, and Dana Scott. The 2016 Symposium on Logical Foundations of Computer Science (LFCS 2016) took place in the Wyndham Deerfield Beach Resort, Deerfield Beach, Florida, USA, during January 4–7. This volume contains the extended abstracts of talks selected by the Program Committee for presentation at LFCS 2016.

The scope of the symposium is broad and includes constructive mathematics and type theory; homotopy type theory; logic, automata, and automatic structures; computability and randomness; logical foundations of programming; logical aspects of computational complexity; parameterized complexity; logic programming and constraints; automated deduction and interactive theorem proving; logical methods in protocol and program verification; logical methods in program specification and extraction; domain theory logics; logical foundations of database theory; equational logic and term rewriting; lambda and combinatory calculi; categorical logic and topological semantics; linear logic; epistemic and temporal logics; intelligent and multiple-agent system logics; logics of proof and justification; non-monotonic reasoning; logic in game theory and social software; logic of hybrid systems; distributed system logics; mathematical fuzzy logic; system design logics; other logics in computer science.

We thank the authors and reviewers for their contributions. We acknowledge the support of the US National Science Foundation, Cornell University, the Graduate Center of the City University of New York, and Florida Atlantic University.

October 2015
