### 3 Generation Expansion Planning

#### 3.1 Introduction

#### 3.2 Problem Description
- 3.2.1 Notation
- 3.2.2 Aim and Assumptions
- 3.2.3 Time Framework
- 3.2.4 Operating Conditions
- 3.2.5 Uncertainty Characterization
- 3.2.6 Modeling of the Transmission Network
- 3.2.7 Complementarity Model

#### 3.3 Deterministic Single-Node Static GEP
- 3.3.1 Complementarity Model
- 3.3.2 Equivalent NLP Formulation
- 3.3.3 Equivalent MILP Formulation
- 3.3.4 Meaning of Dual Variables $\lambda_o$

#### 3.4 Deterministic Single-Node Dynamic GEP

#### 3.5 Deterministic Network-Constrained Static GEP
- 3.5.1 Complementarity Model
- 3.5.2 Equivalent MILP Formulation
- 3.5.3 Meaning of Dual Variables $\lambda_{no}$

#### 3.6 Stochastic Single-Node GEP
- 3.6.1 Static Model Formulation
- 3.6.2 Dynamic Model Formulation

#### 3.7 Summary and Conclusions

#### 3.8 End-of-Chapter Exercises

#### 3.9 GAMS Codes

#### References

### 4 Generation and Transmission Expansion Planning

#### 4.1 Introduction

#### 4.2 Problem Description
- 4.2.1 Notation
- 4.2.2 Approach
- 4.2.3 Risk Management

#### 4.3 Deterministic Static G&TEP
- 4.3.1 MINLP Formulation
- 4.3.2 MILP Formulation

#### 4.4 Deterministic Dynamic G&TEP

#### 4.5 Stochastic G&TEP
- 4.5.1 Static Approach
- 4.5.2 Dynamic Approach

#### 4.6 Stochastic Dynamic Risk-Constrained G&TEP
- 4.6.1 Formulation

#### 4.7 Summary and Conclusions
5 Investment in Production Capacity

5.1 Introduction

5.1.1 Electricity Pool

5.1.2 Network Representation

5.1.3 Static and Dynamic Investment Models

5.1.4 Operating Conditions: Demand Level and Stochastic Production

5.1.5 Uncertainty

5.1.6 Bilevel Model

5.1.7 Alternative Solution Approaches

5.2 Static Production Capacity Investment Model

5.3 Dynamic Production Capacity Investment Model

5.4 Direct Solution Approach

5.4.1 MPEC

5.4.2 MPEC Linearization

5.4.3 Numerical Results

5.5 Benders Solution Approach

5.5.1 Complicating Variables

5.5.2 Convexity Analysis

5.5.3 Functioning of Benders Decomposition

5.5.4 The Benders Algorithm

5.6 Summary

5.7 End-of-Chapter Exercises

5.8 GAMS Code

References

6 Investment Equilibria

6.1 Introduction

6.2 Solution Approach

6.3 Modeling Features and Assumptions

6.4 Single-Producer Problem

6.4.1 MPEC

6.5 Multiple-Producer Problem: EPEC

6.5.1 EPEC Solution

6.5.2 Searching for Multiple Solutions

6.5.3 Ex-Post Algorithm for Detecting Nash Equilibria

6.5.4 Numerical Results

6.6 Summary

6.7 End-of-Chapter Exercises

6.8 GAMS Code
