# Contents

1 Introduction ............................................. 1  
References .................................................. 3  

2 Properties of a Polycentric Oval ........................... 5  
2.1 Four-Centre Ovals ....................................... 7  
References .................................................. 18  

3 Ruler/Compass Constructions of Simple Ovals .......... 19  
3.1 Ovals with Given Symmetry Axis Lines ................. 20  
3.2 Ovals with Unknown Axis Lines ........................ 39  
3.3 Inscribing and Circumscribing Ovals: The Frame Problem . . . . . . . . . . 49  
3.4 The Stadium Problem and the Running Track ............ 56  
References .................................................. 60  

4 Parameter Formulas for Simple Ovals and Applications .... 61  
4.1 Parameter Formulas for Simple Ovals .................... 61  
4.2 Limitations for the Frame Problem ....................... 80  
4.3 Measuring a Four-Centre Oval ........................... 85  
4.4 Concentric Ovals ....................................... 88  
References .................................................. 91  

5 Optimisation Problems for Ovals .......................... 93  
References .................................................. 99  

6 Remarkable Four-Centre Oval Shapes ...................... 101  
References .................................................. 115  

7 Borromini’s Ovals in the Dome of San Carlo alle Quattro Fontane in Rome ............................................. 117  
7.1 The 1998 Survey .......................................... 120  
7.2 The Project for the Dome ................................ 124  
7.2.1 The Dimensions of the Dome ......................... 124  
7.2.2 The Impost Oval and the Lantern Oval .............. 127
