## Contents

1 Magmatism in the Tyrrhenian Sea Region:
   An Introductory Overview ........................................ 1
   1.1 Introduction .................................................. 2
   1.2 Geochronology and Petrology .................................. 2
   1.3 Regional Distribution of Magma Types .......................... 8
   1.4 Regional Variation of Trace Element and Sr-Nd–Pb-O Isotopic Compositions ........................................ 8
   1.5 Magmatic Provinces in the Tyrrhenian Sea Region ............. 10
   1.6 Petrogenesis and Geodynamic Setting:
      A Preliminary Perspective ....................................... 15
   1.7 Summary and Conclusions ....................................... 16
   References ......................................................... 16

2 The Tuscany Province ................................................. 19
   2.1 Introduction .................................................... 20
   2.2 Regional Geology ................................................ 20
   2.3 Composition and Classification of Tuscany Magmatism .......... 27
   2.4 Silicic Magmatism ................................................ 28
      2.4.1 Effusive Rocks ............................................. 30
      2.4.2 Plutonic Rocks ............................................. 34
   2.5 Mafic Magmatism ................................................ 38
   2.6 Petrogenesis of the Tuscany Magmatic Province ................. 46
      2.6.1 Origin of Silicic Magmas ................................... 46
      2.6.2 Origin of Mafic Magmas ..................................... 48
   2.7 Geodynamic Implications ....................................... 50
   2.8 Summary and Conclusions ....................................... 52
   References ......................................................... 53

3 The Intra-Apennine Province ......................................... 61
   3.1 Introduction .................................................... 62
   3.2 Regional Geology ................................................ 62
   3.3 Compositional Characteristics of Intra-Apennine Magmatism .... 62
      3.3.1 San Venanzo ................................................. 63
      3.3.2 Cupaello ................................................... 65
      3.3.3 Polino ..................................................... 71
      3.3.4 Oricola .................................................... 71
   References ......................................................... 71
## The Apulian Province (Mount Vulture)

### 8.1 Introduction

### 8.2 Regional Geology

### 8.3 Mount Vulture

#### 8.3.1 Volcanology and Stratigraphy

#### 8.3.2 Petrography and Mineral Chemistry

#### 8.3.3 Petrology and Geochemistry

#### 8.3.4 Petrogenesis of Vulture Magmas

### 8.4 Geodynamic Significance of Mount Vulture

### 8.5 Summary and Conclusions

### References

## The Aeolian Arc

### 9.1 Introduction

### 9.2 Regional Geology

### 9.3 Alicudi

#### 9.3.1 Volcanology and Stratigraphy

#### 9.3.2 Petrography and Mineral Chemistry

#### 9.3.3 Petrology and Geochemistry

#### 9.3.4 Magma Evolution at Alicudi

### 9.4 Filicudi

#### 9.4.1 Volcanology and Stratigraphy

#### 9.4.2 Petrography and Mineral Chemistry

#### 9.4.3 Petrology and Geochemistry

#### 9.4.4 Magma Evolution at Filicudi

### 9.5 Salina

#### 9.5.1 Volcanology and Stratigraphy

#### 9.5.2 Petrography and Mineral Chemistry

#### 9.5.3 Petrology and Geochemistry

#### 9.5.4 Magma Evolution at Salina

### 9.6 Lipari

#### 9.6.1 Volcanology and Stratigraphy

#### 9.6.2 Petrography and Mineral Chemistry

#### 9.6.3 Petrology and Geochemistry

#### 9.6.4 Magma Evolution at Lipari

### 9.7 Vulcano

#### 9.7.1 Volcanology and Stratigraphy

#### 9.7.2 Petrography and Mineral Chemistry

#### 9.7.3 Petrology and Geochemistry

#### 9.7.4 Magma Evolution at Vulcano

### 9.8 Panarea

#### 9.8.1 Volcanology and Stratigraphy

#### 9.8.2 Petrography and Mineral Chemistry

#### 9.8.3 Petrology and Geochemistry

#### 9.8.4 Magma Evolution at Panarea

### 9.9 Stromboli

#### 9.9.1 Volcanology and Stratigraphy

#### 9.9.2 Petrography and Mineral Chemistry
11.3 Oligo-Miocene Orogenic Volcanic Stage. 321
  11.3.1 Volcanology and Stratigraphy. 322
  11.3.2 Petrography and Mineral Chemistry. 322
  11.3.3 Petrology and Geochemistry. 323
  11.3.4 Petrogenesis of Oligo-Miocene Orogenic Magmas. 326
11.4 Miocene-Quaternary Anorogenic Volcanism. 327
  11.4.1 Volcanology and Stratigraphy. 328
  11.4.2 Petrography and Mineral Chemistry. 330
  11.4.3 Petrology and Geochemistry. 330
  11.4.4 Petrogenesis of Miocene-Quaternary Anorogenic Magmatism. 332
11.5 Geodynamic Settings of Orogenic and Anorogenic Magmas. 333
11.6 Summary and Conclusions. 334
References. 335

12 Southern Tyrrhenian Sea. 339
  12.1 Introduction. 340
  12.2 Geological Setting. 340
  12.3 Igneous Activity. 345
    12.3.1 MORB-Type Rocks. 346
    12.3.2 OIB-Type Rocks. 347
    12.3.3 Arc-Type Rocks. 350
  12.4 Petrogenesis of the Tyrrhenian Sea Magmatism. 354
  12.5 Geodynamic Setting. 355
  12.6 Summary and Conclusions. 357
References. 358

13 Magmatism and Geodynamics in the Tyrrhenian Sea Region. 363
  13.1 Introduction. 364
  13.2 Compositional and Structural Characteristics of Volcanism in the Tyrrhenian Sea Region. 364
  13.3 Geodynamic Evolution of the Tyrrhenian Sea Region: A Short Summary. 371
  13.4 Relationship between Petrogenesis and Geodynamics. 372
    13.4.1 Plume-Related Hypotheses. 372
    13.4.2 Passive-Rifting-Related Hypotheses. 374
    13.4.3 Subduction-Related Hypotheses. 375
  13.5 Conclusions. 379
References. 380

Erratum to: Cenozoic Volcanism in the Tyrrhenian Sea Region. E1

Appendix 1: The Alpine Magmatic Stage. 383
Appendix 2: Classification of K-rich Rocks. 389
References. 393
Index. 395
