Contents

Optimal Computation of Avoided Words .............................................. 1
  Yannis Almirantis, Panagiotis Charalampopoulos, Jia Gao,
  Costas S. Iliopoulos, Manal Mohamed, Solon P. Pissis,
  and Dimitris Polychronopoulos

A Biclique Approach to Reference Anchored Gene Blocks
and Its Applications to Pathogenicity Islands .................................... 14
  Arnon Benshahar, Vered Chalifa-Caspi, Danny Hermelin,
  and Michal Ziv-Ukelson

An Efficient Branch and Cut Algorithm to Find Frequently Mutated
Subnetworks in Cancer ......................................................................... 27
  Anna Bomersbach, Marco Chiarandini, and Fabio Vandin

Isometric Gene Tree Reconciliation Revisited .................................... 40
  Broňa Brejová, Askar Gafurov, Dana Pardubská, Michal Sabo,
  and Tomáš Vinař

Further Improvement in Approximating the Maximum Duo-Preservation
String Mapping Problem ................................................................. 52
  Brian Brubach

SpecTrees: An Efficient Without a Priori Data Structure for MS/MS Spectra
Identification ................................................................................... 65
  Matthieu David, Guillaume Fertin, and Dominique Tessier

Predicting Core Columns of Protein Multiple Sequence Alignments
for Improved Parameter Advising ..................................................... 77
  Dan DeBlasio and John Kececioglu

Fast Compatibility Testing for Phylogenies with Nested Taxa .............. 90
  Yun Deng and David Fernández-Baca

The Gene Family-Free Median of Three ............................................ 102
  Daniel Doerr, Pedro Feijão, Metin Balaban, and Cedric Chauve

Correction of Weighted Orthology and Paralogy Relations - Complexity
and Algorithmic Results ................................................................. 121
  Riccardo Dondi, Nadia El-Mabrouk, and Manuel Lafond
Copy-Number Evolution Problems: Complexity and Algorithms ................. 137
Mohammed El-Kebir, Benjamin J. Raphael, Ron Shamir, Roded Sharan,
Simone Zaccaria, Meirav Zehavi, and Ron Zeira

Gerbil: A Fast and Memory-Efficient $k$-mer Counter with GPU-Support ..... 150
Marius Erbert, Steffen Rechner, and Matthias Müller-Hannemann

Genome Rearrangements on Both Gene Order and Intergenic Regions........ 162
Guillaume Fertin, Géraldine Jean, and Eric Tannier

Better Identification of Repeats in Metagenomic Scaffolding ................. 174
Jay Ghurye and Mihai Pop

A Better Scoring Model for De Novo Peptide Sequencing:
The Symmetric Difference Between Explained and Measured Masses .......... 185
Ludovic Gillet, Simon Rösch, Thomas Tschager, and Peter Widmayer

StreAM-$T_g$: Algorithms for Analyzing Coarse Grained RNA Dynamics
Based on Markov Models of Connectivity-Graphs.................................. 197
Sven Jager, Benjamin Schiller, Thorsten Strufe, and Kay Hamacher

Solving Generalized Maximum-Weight Connected Subgraph Problem
for Network Enrichment Analysis ..................................................... 210
Alexander A. Loboda, Maxim N. Artyomov, and Alexey A. Sergushichev

A Natural Encoding of Genetic Variation in a Burrows-Wheeler Transform
to Enable Mapping and Genome Inference ........................................ 222
Sorina Maciuca, Carlos del Ojo Elias, Gil McVean, and Zamin Iqbal

Inferring Population Genetic Parameters: Particle Filtering, HMM, Ripley’s
K-Function or Runs of Homozygosity? .............................................. 234
Svend V. Nielsen, Simon Simonsen, and Asger Hobolth

A Graph Extension of the Positional Burrows-Wheeler Transform and Its
Applications ...................................................................................... 246
Adam M. Novak, Erik Garrison, and Benedict Paten

Compact Universal $k$-mer Hitting Sets ............................................. 257
Yaron Orenstein, David Pellow, Guillaume Marçais, Ron Shamir,
and Carl Kingsford

A New Approximation Algorithm for Unsigned Translocation Sorting ....... 269
Lianrong Pu, Daming Zhu, and Haitao Jiang

Independent Component Analysis to Remove Batch Effects from Merged
Microarray Datasets ........................................................................... 281
Emilie Renard, Samuel Branders, and P.-A. Absil
