## Contents

**Invited Talk**

Managing Natural Noise in Recommender Systems ........................................ 3  
*Luis Martinez, Jorge Castro, and Raciel Yera*

**Applications of Natural Computing**

Realization of Periodic Functions by Self-stabilizing Population Protocols with Synchronous Handshakes .................................................. 21  
*Anissa Lamani and Masafumi Yamashita*

Localized Load Balancing in RFID Systems ................................................. 34  
*Ahnaf Munir, Md Sakhawat Hossen, and Salimur Choudhury*

The Fuel-Efficient Platooning of Heavy Duty Vehicles by Mathematical Programming and Genetic Algorithm ....................................................... 46  
*Abtin Nourmohammadzadeh and Sven Hartmann*

How to Implement a Random Bisection Cut .................................................. 58  
*Itaru Ueda, Akihiro Nishimura, Yu-ichi Hayashi, Takaaki Mizuki, and Hideaki Sone*

**Evolutionary Computation**

A Discrete Artificial Bee Colony Algorithm Based on Similarity for Graph Coloring Problems ............................................................... 73  
*Kui Chen and Hitoshi Kanoh*

A Multi-objective Evolutionary Approach to Pareto Optimal Model Trees. A Preliminary Study ................................................................. 85  
*Marcin Czajkowski and Marek Kretowski*

A Sampling-Based Metaheuristic for the Orienteering Problem with Stochastic Travel Times ................................................................. 97  
*Vassilis Papapanagiotou, Roberto Montemanni, and Luca Maria Gambardella*

Real Time Traffic Intersection Management Using Multi-objective Evolutionary Algorithm ................................................................. 110  
*Kazi Shah Nawaz Ripon, Håkon Dissen, and Jostein Solaas*
Formal Models

Natural and Efficient Subtraction Operation in Carry Value Transformation
(CVT)-Exclusive OR (XOR) Paradigm ........................................... 125
  Jayanta Kumar Das, Pabitra Pal Choudhury, and Ayesha Arora

Decreasing Entropy: How Wide to Open the Window? .................... 137
  Balázs Indig, Noémi Vadász, and Ágnes Kalivoda

Simulating Stochastic Dynamic Interactions with Spatial Information
and Flux .................................................................................. 149
  Ozan Kahramanoğulları

Implementation of Turing Machine Using DNA Strand Displacement .... 161
  Wataru Yahiro and Masami Hagiya

Machine Learning

A Quantum Annealing Approach to Biclustering ............................... 175
  Lorenzo Bottarelli, Manuele Bicego, Matteo Denitto,
  Alessandra Di Pierro, and Alessandro Farinelli

Determining Player Skill in the Game of Go with Deep Neural Networks . 188
  Josef Moudřík and Roman Neruda

Flexible Generalized Fuzzy Petri Nets for Rule-Based Systems ............. 196
  Zbigniew Suraj, Piotr Grochowalski, and Sibasis Bandyopadhyay

Learning Grammar Rules in Probabilistic Grammar-Based Genetic
Programming .......................................................................... 208
  Pak-Kan Wong, Man-Leung Wong, and Kwong-Sak Leung

Author Index ............................................................................ 221
Theory and Practice of Natural Computing
5th International Conference, TPNC 2016, Sendai, Japan, December 12-13, 2016, Proceedings
Martín-Vide, C.; Mizuki, T.; Vega-Rodríguez, M.A. (Eds.)
2016, XIV, 221 p. 88 illus., Softcover
ISBN: 978-3-319-49000-7
