1 Guerrilla Science .................................................. 1

2 The Chinese Connection ........................................... 5
  2.1 From Vortices to Grains .................................. 6
  2.2 Debugging Granular Piles ................................. 14
  2.3 Are Avalanches Predictable? .............................. 19
  Bibliography ..................................................... 21

3 Strange Phenomena in Cuban Sands ......................... 23
  3.1 Echoes of a Failed Class Demonstration:
       The Revolving Rivers ....................................... 23
  3.2 An Open Problem in Three Steps .......................... 30
  3.3 Uphill Bumps: Moving Against the Flow ................. 37
  Bibliography ..................................................... 42

4 Lab-in-a-Bucket: Low Budget Experiments
   in the Solar System ............................................ 45
  4.1 Infinite Penetration into Granular Matter ............... 46
  4.2 Going Wireless Finds Its Match .......................... 52
       4.2.1 Lab-in-a-Bucket, Reloaded ......................... 63
  Bibliography ..................................................... 66
