## Contents

1 General Overview ......................................................... 1
   1.1 Introduction .................................................. 1
   1.2 Types of Nuclear Power Reactors .................................. 10
   1.3 Small Modular Reactors (SMRs) .................................. 11
      1.3.1 Benefits of the Use of Small Modular Reactors .......... 15
      1.3.2 The Perspective of the Small Modular Reactors Market at World Level ........................................ 22
      1.3.3 Main Safety Features of the Small Modular Reactors ... 26
      1.3.4 Different Small Modular Reactor Designs .................. 27
   References .................................................................. 32

2 Advanced Nuclear Technologies and Its Future Possibilities ........ 35
   2.1 Introduction .................................................. 35
   2.2 Generation III, III+ and IV Nuclear Power Reactors ............ 37
      2.2.1 Generation IV Nuclear Power Reactors ................. 37
      2.2.2 GIF Initiative Goals ......................................... 38
      2.2.3 Descriptions of the Generation IV Systems ............ 41
      2.2.4 The Future of the Generation IV Nuclear Power Reactors ......................................................... 49
   2.3 European Pressurised Reactor (EPR) ............................... 54
      2.3.1 EPR Design Project ......................................... 54
      2.3.2 EPR Description .............................................. 55
      2.3.3 Safety, Competitiveness and Flexibility .................. 58
      2.3.4 EPR Projects .................................................. 59
   2.4 Small Modular Reactors (SMRs) .................................. 61
      2.4.1 Why the Interest in Small Modular Reactors ............ 61
      2.4.2 Small Modular Reactors and Their Attributes ............ 63
      2.4.3 Small Modular Reactor Designs .............................. 68
3 The Current Situation and Perspective of the Small Modular Reactors Market in North and South America, Including the Caribbean Regions ........................................ 123
  3.1 Background .......................................... 123
  3.2 The Current Situation and Perspective on the Use of Small Modular Reactors for Electricity Generation in the United States and Canada ........................................ 124
    3.2.1 United States ..................................... 124
    3.2.2 Nuclear Power Plants Operating in the United States .... 125
    3.2.3 Types of Small Modular Reactors Under Development in the United States ...................................... 131
    3.2.4 The Commercialisation Programme of Small Modular Reactor Technology in the United States .............................. 133
    3.2.5 Financing of Small Modular Reactors in the United States ................................................ 135
    3.2.6 Market Perspective of the Small Modular Reactors in the United States ........................................ 136
    3.2.7 The Need of Small Modular Reactors in the United States ................................................................................. 136
    3.2.8 Public Opinion Regarding the Use of Nuclear Energy for Electricity Generation in the United States ............ 139
  3.3 Canada .............................................. 141
    3.3.1 Current Nuclear Power Plants Operating in Canada ........ 141
    3.3.2 Type and Capacity of Small Modular Reactors to Be Built in Canada ............................................... 144
    3.3.3 The Future Role of Nuclear Power in Canada .......... 147
  3.4 The Current Situation and Perspective on the Use of Small Modular Reactors in Latin America and the Caribbean ........................................ 147
References ...................................................................... 152

4 The Current Situation and Perspective of the Small Modular Reactors Market in the European Region ...................... 155
  4.1 Introduction .......................................... 155
  4.2 Current Situation and Perspective in the Use of Small Modular Reactors in the European Region ...................... 161
    4.2.1 The Russian Federation (Russia) ............................ 162
    4.2.2 The United Kingdom (U.K.) ................................ 173
    4.2.3 France ................................................ 182
4.2.4 Ireland ........................................ 186
4.2.5 Sweden ....................................... 187
4.2.6 Germany ...................................... 188
4.2.7 Poland ........................................ 189
4.2.8 Finland ....................................... 192
4.2.9 The Nuclear Power Programme in Other European Countries ...................................... 193

References ................................................ 195

5 The Current Situation and Perspective of the Small Modular Reactors Market in the Asia and the Pacific Region ............. 197
5.1 Introduction .......................................... 197
5.2 Current Situation and Perspective in the Use of Small Modular Reactors in the Asian and the Pacific Region ............. 201
5.2.1 China ......................................... 201
5.2.2 The Republic of Korea (South Korea) ................ 213
5.2.3 Iran, Islamic Republic of ...................................... 219
5.2.4 India ......................................... 222
5.2.5 Pakistan ....................................... 228
5.2.6 Bangladesh ..................................... 230
5.2.7 Indonesia ...................................... 231
5.2.8 Vietnam ....................................... 233
5.2.9 Thailand ...................................... 235
5.2.10 Philippines ..................................... 237
5.2.11 Malaysia ...................................... 237

References ................................................ 239

6 Benefits of Small Modular Reactors. ...................................... 241
6.1 Introduction .......................................... 241
6.2 Enhanced Safety Features ................................ 244
6.2.1 Improved Source Term ................................ 244
6.2.2 Reduced Linear Element Rating ...................................... 244
6.2.3 Enhanced Decay Heat ................................ 245
6.2.4 Other Inherent and Passive Safety Features ...................................... 245
6.3 Economic Competitiveness Between Small Modular Reactors and Large Nuclear Power Reactors. ...................................... 247
6.3.1 Lower Upfront Cost ................................ 249
6.3.2 Modularisation ................................ 249
6.4 Potential Solution for Remote Locations and Developing Countries ...................................... 250
6.5 Proliferation Resistances ................................ 253
6.6 Conclusions .......................................... 254

References ................................................ 255
7 The Future of Small Modular Reactors ........................................... 257
  7.1 Introduction .......................................................... 257
  7.2 Investment in Nuclear Power Plants ............................... 258
  7.3 Safety Issues Associated to Nuclear Power Plants .............. 259
  7.4 Construction of New Nuclear Power Plants ...................... 260
  7.5 The Small Modular Reactors ......................................... 261
  7.6 Priorities in Research and Development Activities to Be
      Considered for a Group of Selected Small Modular Reactors... 265
      7.6.1 Priority R&D for Gas-Cooled Fast Reactors .............. 265
      7.6.2 Priority R&D for Lead-Bismuth Eutectic-Cooled
             Reactors (LBE) .................................... 266
      7.6.3 Priority Research and Development for Sodium-Cooled
             Reactors ........................................... 266
References .............................................................................. 267
Small Modular Reactors for Electricity Generation
An Economic and Technologically Sound Alternative
Morales Pedraza, J.
2017, XIX, 267 p. 40 illus., 39 illus. in color., Hardcover
ISBN: 978-3-319-52215-9
