Contents

1 Background: Nuclear Materials and Their Analysis Needs ........ 1
  1.1 Materials ..................................................... 1
  1.2 Nuclear Materials ............................................. 5
    1.2.1 Generation 0 Reactors Materials .......................... 6
    1.2.2 From Generation I to II Reactor Materials .............. 7
    1.2.3 Generation III Reactor Materials ........................ 9
    1.2.4 Generation IV Reactor Materials ........................ 10
    1.2.5 Materials from Generation V Reactors and Accelerators 12
    1.2.6 Military Nuclear Materials .............................. 13
    1.2.7 Nuclear Waste Management .............................. 16
    1.2.8 Contaminated Materials .............................. 18
  1.3 Analysis Needs and Limitations .............................. 19
    1.3.1 Required Analyses and Analysis Requirement ............ 19
    1.3.2 Analytical Limitations .................................. 20
    1.3.3 Analysis Modes and Combinations ........................ 22
  References ...................................................... 23

2 Sampling, Handling, Treatment and Separation .................. 25
  2.1 Sample Collection and Analysis Mode ........................ 25
    2.1.1 Sample Selection and Collection ........................ 25
    2.1.2 Sampling from Analysis Mode ............................ 27
  2.2 Sub-sampling ................................................ 28
    2.2.1 Fluid Samples .......................................... 29
    2.2.2 Solid Samples .......................................... 29
  2.3 Reference Materials and Calibration .......................... 32
    2.3.1 Reference Materials ..................................... 32
    2.3.2 Calibration with Internal or External Standards ....... 33
  References ...................................................... 33

xiii
3 Characterization Using Passive or Interactive Techniques........ 35
  3.1 Material Characterization by Field-Free Passive Techniques ... 38
    3.1.1 Techniques with Phonon Detection ...................... 38
    3.1.2 Techniques with Photon Detection ...................... 39
    3.1.3 Techniques with Lepton Detection ...................... 47
    3.1.4 Techniques with Neutron Detection ..................... 57
    3.1.5 Techniques with Atom or Ion Detection ................. 58
  3.2 Material Characterization by Field-Free Interactive Techniques
    3.2.1 Techniques with Phonon Interaction and Phonon Detection 62
    3.2.2 Techniques with Photon Interaction and Phonon Detection 71
    3.2.3 Techniques with Photon Interaction and Photon Detection 74
    3.2.4 Techniques with Photon Interaction and Lepton Detection 126
    3.2.5 Techniques with Photon Interaction and Ion or Neutron Detection 127
    3.2.6 Techniques with Lepton Interaction and Phonon Detection 133
    3.2.7 Techniques with Lepton Interaction and Photon Detection 134
    3.2.8 Techniques with Lepton Interaction and Lepton Detection 141
    3.2.9 Techniques with Lepton Interaction and Neutron Detection 152
    3.2.10 Techniques with Lepton Interaction and Ion Detection 152
    3.2.11 Techniques with Neutron Interaction and Photon Detection 153
    3.2.12 Techniques with Neutron Interaction and Lepton Detection 157
    3.2.13 Techniques with Neutron Interaction and Neutron Detection 160
    3.2.14 Techniques with Neutron Interaction and Ion Detection 165
    3.2.15 Techniques with Ion or Atom Interaction and Phonon Detection 168
    3.2.16 Techniques with Ion or Atom Interaction and Photon Detection 169
The Analysis of Nuclear Materials and Their Environments
Degueldre, C.A.
2017, XXIV, 288 p. 109 illus., 83 illus. in color., Hardcover
ISBN: 978-3-319-58004-3
