## Contents

### Biomedical Image Processing and Analysis

A Quantitative Assessment of Image Normalization for Classifying Histopathological Tissue of the Kidney ........................... 3
*Michael Gadermayr, Sean Steven Cooper, Barbara Klinkhammer, Peter Boor, and Dorit Merhof*

### Classification and Detection

Deep Learning for Vanishing Point Detection Using an Inverse Gnomonic Projection ................................. 17
*Florian Kluger, Hanno Ackermann, Michael Ying Yang, and Bodo Rosenhahn*

Learning Where to Drive by Watching Others ....................... 29
*Miguel A. Bautista, Patrick Fuchs, and Björn Ommer*

Learning Dilation Factors for Semantic Segmentation of Street Scenes ..... 41
*Yang He, Margret Keuper, Bernt Schiele, and Mario Fritz*

Learning to Filter Object Detections .................................. 52
*Sergey Prokudin, Daniel Kappler, Sebastian Nowozin, and Peter Gehler*

### Computational Photography

Motion Deblurring in the Wild ........................................... 65
*Mehdi Noroozi, Paramanand Chandramouli, and Paolo Favaro*

Robust Multi-image HDR Reconstruction for the Modulo Camera ........ 78
*Florian Lang, Tobias Plötz, and Stefan Roth*

Trainable Regularization for Multi-frame Superresolution ................ 90
*Teresa Klatzer, Daniel Soukup, Erich Kobler, Kerstin Hammernik, and Thomas Pock*

### Image and Video Processing

A Comparative Study of Local Search Algorithms for Correlation Clustering .................................................. 103
*Evgeny Levinkov, Alexander Kirillov, and Bjoern Andres*
Combined Precise Extraction and Topology of Points, Lines and Curves in Man-Made Environments ...................................................... 115
   Dominik Wolters and Reinhard Koch

Recurrent Residual Learning for Action Recognition ....................... 126
   Ahsan Iqbal, Alexander Richard, Hilde Kuehne, and Juergen Gall

A Local Spatio-Temporal Approach to Plane Wave Ultrasound Particle Image Velocimetry ................................................................. 138
   Ecaterina Bodnariuc, Stefania Petra, Christoph Schnörr, and Jason Voorneveld

Machine Learning and Pattern Recognition

Object Boundary Detection and Classification with Image-Level Labels ................................. 153
   Jing Yu Koh, Wojciech Samek, Klaus-Robert Müller, and Alexander Binder

Semantic Segmentation of Outdoor Areas Using 3D Moment Invariants and Contextual Cues .................. 165
   Sven Sickert and Joachim Denzler

Neuron Pruning for Compressing Deep Networks Using Maxout Architectures .................................. 177
   Fernando Moya Rueda, Rene Grzeszick, and Gernot A. Fink

A Primal Dual Network for Low-Level Vision Problems ....................... 189
   Christoph Vogel and Thomas Pock

End-to-End Learning of Video Super-Resolution with Motion Compensation .......................... 203
   Osama Makansi, Eddy Ilg, and Thomas Brox

Convolutional Neural Networks for Movement Prediction in Videos ........... 215
   Alexander Warnecke, Timo Lüddecke, and Florentin Wörgötter

Finding the Unknown: Novelty Detection with Extreme Value Signatures of Deep Neural Activations ........................................... 226
   Alexander Schultheiss, Christoph Käding, Alexander Freytag, and Joachim Denzler

Improving Facial Landmark Detection via a Super-Resolution Inception Network ................................................... 239
   Martin Knoche, Daniel Merget, and Gerhard Rigoll
Mathematical Foundations, Statistical Data Analysis and Models

Diverse M-Best Solutions by Dynamic Programming ........................................ 255
   Carsten Haubold, Virginie Uhlmann, Michael Unser, and Fred A. Hamprecht

Adaptive Regularization in Convex Composite Optimization for Variational Imaging Problems .................................................. 268
   Byung-Woo Hong, Ja-Keoung Koo, Hendrik Dirks, and Martin Burger

Variational Networks: Connecting Variational Methods and Deep Learning .............................................. 281
   Erich Kobler, Teresa Klatzer, Kerstin Hammernik, and Thomas Pock

Gradient Flows on a Riemannian Submanifold for Discrete Tomography ........................................... 294
   Matthias Zisler, Fabrizio Savarino, Stefania Petra, and Christoph Schnörr

Model Selection for Gaussian Process Regression ............................................. 306
   Nico S. Gorbach, Andrew An Bian, Benjamin Fischer, Stefan Bauer, and Joachim M. Buhmann

Motion and Segmentation

Scalable Full Flow with Learned Binary Descriptors ........................................ 321
   Gottfried Munda, Alexander Shekhovtsov, Patrick Knöbelreiter, and Thomas Pock

Edge Adaptive Seeding for Superpixel Segmentation ....................................... 333
   Christian Wilms and Simone Frintrop

Pose, Face and Gesture

Optical Flow-Based 3D Human Motion Estimation from Monocular Video ........ 347
   Thiemo Alldieck, Marc Kassubeck, Bastian Wandt, Bodo Rosenhahn, and Marcus Magnor

On the Diffusion Process for Heart Rate Estimation from Face Videos Under Realistic Conditions ........................................... 361
   Christian S. Pilz, Jarek Krajewski, and Vladimir Blazek

Reconstruction and Depth

Multi-view Continuous Structured Light Scanning ........................................ 377
   Fabian Groh, Benjamin Resch, and Hendrik P.A. Lensch
Down to Earth: Using Semantics for Robust Hypothesis Selection for the Five-Point Algorithm .................................................. 389
Andreas Kuhn, True Price, Jan-Michael Frahm, and Helmut Mayer

An Efficient Octree Design for Local Variational Range Image Fusion .... 401
Nico Marniok, Ole Johannsen, and Bastian Goldluecke

Tracking

Measuring the Accuracy of Object Detectors and Trackers ............... 415
Tobias Böttger, Patrick Follmann, and Michael Fauser

Author Index ................................................................. 427
Pattern Recognition
Roth, V.; Vetter, Th. (Eds.)
2017, XVI, 428 p. 159 illus., Softcover
ISBN: 978-3-319-66708-9
