Table of Contents

Part I Web-Languages and Logic

Introduction ................................................................. 3
  Oskar Bartenstein, Stephane Bressan

The Rule Markup Language: RDF-XML Data Model, XML Schema Hierarchy, and XSL Transformations ........................................ 5
  Harold Boley

Software Components for Internet Based Self-service Consulting Systems .................................................. 23
  Oskar Bartenstein

iML: A Logic-Based Framework for Constructing Graphical User Interface
on Mobile Agents .......................................................... 36
  Naoki Fukuta, Nobuaki Mizutani, Tadachika Ozono, Toramatsu Shintani

PGR: Portuguese Attorney General’s Office Decisions on the Web .......... 51
  Paulo Quaresma, Irene Pimenta Rodrigues

Part II Knowledge Acquisition and Knowledge Representation

Introduction ................................................................. 67
  Paulo Quaresma, Akira Ishikawa, Rolf Schwitter

Preferring and Updating in Logic-Based Agents ............................ 70
  Pierangelo Dell’Acqua, Luís Moniz Pereira

Relational Information Retrieval through Natural Language Analysis .... 86
  Luis Quintano, Salvador Abreu, Irene Rodrigues

A Functional Operator-Based Morphological Analysis of Japanese .... 100
  Akira Ishikawa

Towards Reconciling Use Cases
via Controlled Language and Graphical Models ............................. 115
  Kathrin Böttger, Rolf Schwitter, Diego Mollá, Debbie Richards

Selection Restrictions Acquisition for Parsing Improvement ............. 129
  Alexandre Agustini, Pablo Gamallo, Gabriel P. Lopes

Part III Decision Support by Advanced Logic Programming

Introduction ................................................................. 147
  Ulrich Geske, Dietmar Seipel

Defeasible Logic ............................................................ 151
  Donald Nute

Connecting Databases with Argumentation .................................. 170
  Shekhar Pradhan
Prolog Issues and Experimental Results of an MCMC Algorithm .......... 186
Nicos Angelopoulos, James Cussens

Action Rules for Programming Constraint Propagators and Interactive User Interfaces ........................................ 197
Neng-Fa Zhou

Constraint Solving over OCR Graphs ........................................ 205
Andreas Fordan

Constraint-Based Configuration of Large Systems ....................... 217
Ulrich John, Ulrich Geske

Part IV Data Mining and Web-Knowledge Management

Introduction ............................................................................. 235
Sergio A. Alvarez, Carolina Ruiz, Virginia Dignum

Collaborative Information Filtering
by Using Categorized Bookmarks on the Web ............................. 237
Jason J. Jung, Jeong-Seob Yoon, Geun-Sik Jo

Discovering Frequent Itemsets in the Presence of Highly Frequent Items ... 251
Dennis P. Groth, Edward L. Robertson

Mining Multi-dimensional Quantitative Associations ...................... 265
Michal Okoniewski, Lukasz Gancarz, Piotr Gawrysiak

Constructing Appropriate Data Abstractions
for Mining Classification Knowledge ........................................... 276
Yoshiaki Okubo, Yoshimitsu Kudoh, Makoto Haraguchi

Relationship-Based Dynamic Versioning of Evolving Legal Documents .... 290
M. Mercedes Martínez, Pablo de la Fuente, Jean-Claude Derniame,
Alberto Pedrero

Author Index ............................................................................. 307
Web Knowledge Management and Decision Support
14th International Conference on Applications of
Prolog, INAP 2001, Tokyo, Japan, October 20-22, 2001,
Revised Papers
Bartenstein, O.; Geske, U.; Hannebauer, M.; Yoshie, O.
(Eds.)
2003, X, 314 p., Softcover
ISBN: 978-3-540-00680-0
