Table of Contents

Skeleton-Based Seam Computation
for Triangulated Surface Parameterization .......................... 1
Xu-Ping Zhu, Shi-Min Hu (Tsinghua University), and Ralph Martin
(Cardiff University)

Parameterizing $N$-Holed Tori ........................................ 14
Cindy Grimm and John Hughes (Washington University, St. Louis)

Generic Parameterization of Bifurcating Structures ................. 30
Malcolm I.G. Bloor and Michael J. Wilson (Leeds University)

Direct Computation of a Control Vertex Position
on any Subdivision Level ............................................ 40
Loïc Barthe and Leif Kobbelt (RWTH-Aachen)

Optimising Triangulated Polyhedral Surfaces with Self-intersections ...... 48
Lyuba Alboul (Sheffield Hallam University)

Combinatorial Properties of Subdivision Meshes ..................... 73
Ioannis Ivrissimtzis and Hans-Peter Seidel (MPI, Saarbrücken)

Watermarking 3D Polygonal Meshes
Using the Singular Spectrum Analysis ................................ 85
Kohei Murotani and Kokichi Sugihara (University of Tokyo)

Compression of Arbitrary Mesh Data Using Subdivision Surfaces .... 99
Hiroshi Kawaharada and Kokichi Sugihara (University of Tokyo)

Triangle Mesh Duality: Reconstruction and Smoothing .............. 111
Giuseppe Patanè and Michela Spagnuolo (Consiglio Nazionale delle
Ricerche, Genova)

Hand Tracking Using a Quadric Surface Model and Bayesian Filtering .... 129
Roberto Cipolla, Bjorn Stenger, Arasanathan Thayananthan
(University of Cambridge), and Philip H.S. Torr (Microsoft, Cambridge)

Vector Transport for Shape-from-Shading ............................ 142
Fabio Sartori and Edwin R. Hancock (University of York)

A Graph-Spectral Method for Surface Height Recovery .......... 163
Antonio Robles-Kelly and Edwin R. Hancock (University of York)

A Robust Reconstruction Algorithm of Displaced Butterfly Subdivision
Surfaces from Unorganized Points ................................... 182
Byeong-Seon Jeong, Sun-Jeong Kim, and Chang-Hun Kim
(Korea University, Seoul)
Filling Holes in Point Clouds ........................................ 196
    Pavel Chalmovianský and Bert Jüttler (J. Kepler University, Linz)

Trimming Local and Global Self-intersections in Offset Curves
Using Distance Maps ............................................... 213
    Gershon Elber (Technion, Haifa)

Using Line Congruences for Parameterizing Special Algebraic Surfaces .... 223
    Bert Jüttler and Katharina Rittenschober (J. Kepler University, Linz)

Boundary Conditions for the 3-Direction Box-Spline .................... 244
    Malcolm A. Sabin (Numerical Geometry Ltd) and Aurelian Bejancu
    (University of Leeds)

The Plateau-Bézier Problem........................................ 262
    Juan Monterde (Universitat de València)

A Functional Equation Approach to the Computation
of the Parameter Symmetries of Spline Paths ........................ 274
    Helmut E. Bez (Loughborough University)

Efficient One-Sided Linearization of Spline Geometry ................. 297
    Jörg Peters (University of Florida)

Procedural Modelling, Generative Geometry,
and the International Standard ISO 10303 (STEP) ................. 320
    Michael J. Pratt (LRM Systems, UK)

Variable-Free Representation of Manifolds via Transfinite Blending
with a Functional Language ..................................... 338
    Alberto Paoluzzi (Università Roma Tre)

Modified Affine Arithmetic Is More Accurate
than Centered Interval Arithmetic or Affine Arithmetic ............ 355
    Huahao Shou, Hongwei Lin (Zhejiang University of Technology),
    Ralph Martin (Cardiff University), and Guojin Wang
    (Zhejiang University of Technology)

On the Spine of a PDE Surface .................................. 366
    Hassan Ugail (University of Bradford)

Application of PDE Methods to Visualization of Heart Data.......... 377
    Ognyan Kounchev (Bulgarian Academy of Sciences) and
    Michael J. Wilson (University of Leeds)

Author Index ....................................................... 393
Mathematics of Surfaces
10th IMA International Conference, Leeds, UK,
September 15-17, 2003, Proceedings
Wilson, M.J.; Martin, R.R. (Eds.)
2003, VIII, 400 p., Softcover
