Artificial Immune Systems have come of age. They are no longer an obscure computer science technique, worked on by a couple of farsighted research groups. Today, researchers across the globe are working on new computer algorithms inspired by the workings of the immune system. This vigorous field of research investigates how immunobiology can assist our technology, and along the way is beginning to help biologists understand their unique problems.

AIS is now old enough to understand its roots, its context in the research community, and its exciting future. It has grown too big to be confined to special sessions in evolutionary computation conferences. AIS researchers are now forming their own community and identity. The International Conference on Artificial Immune Systems is proud to be the premiere conference in the area. As its organizers, we were honored to have such a variety of innovative and original scientific papers presented this year.

ICARIS 2004 was the third international conference dedicated entirely to the field of Artificial Immune Systems (AIS). It was held in Catania, on the beautiful island of Sicily, Italy, during September 13–16, 2004. While hosting the conference, the city of Catania gave the participants the opportunity to enjoy the richness of its historical and cultural atmosphere and the beauty of its natural resources, the sea, and the Etna volcano.

In comparison to the previous two AIS conferences, at ICARIS 2004 we added some new and exciting features. First, there was a tutorial day, a new track where leading scientists presented the background and the future directions of the Artificial Immune Systems discipline. In particular, four extended tutorials were presented:

- the first was an introduction to Artificial Immune Systems by Dr. J. Timmis;
- the second tutorial, delivered by Dr. Filippo Castiglione, faced the immune system and related pathologies using in silico methodologies;
- the third tutorial, by Prof. R. Callard, described the modelling of the immune system;
- the last tutorial, offered by Dr. Leandro de Castro, illustrated the emerging engineering applications of Artificial Immune Systems.

There was also a plenary lecture, delivered by Prof. Alan S. Perelson, on the current state of the art of computational and theoretical immunology.

Moreover, the organizing committee devoted a special session to the topic “Immunoinformatics”, run by Dr. Darren Flower. Immunoinformatics is a new discipline that aims to apply computer science techniques to molecules of the immune system and to use bioinformatics tools for a better understanding of the immune functions.

We had more submissions than ever this year, and because our acceptance rate is based purely on quality, we were able to accept only 59% of the submitted
papers. More details: 58 papers were submitted, and each one was independently reviewed by at least three members of the program committee in a blind review process. So, in these proceedings you will find the extended abstract of the plenary lecture and 34 papers written by leading scientists in the field, from 21 different countries on 4 continents, describing an impressive array of ideas, technologies and applications for AIS.

We couldn’t have organized this conference without these researchers, so we thank them all for coming. We also couldn’t have organized ICARIS without the excellent work of all of the program committee members, our publicity chair, Simon Garrett, our conference secretary, Jenny Oatley, and, as local organizer, Mario Pavone.

We would like to express our appreciation to the plenary lecturer who accepted our invitation, to the tutorial speakers, and to all authors who submitted research papers to ICARIS 2004.

September 2004

Giuseppe Nicosia, Vincenzo Cutello
Peter J. Bentley, and Jon Timmis
Organizing Committee

Conference Chairs  Jon Timmis (University of Kent, UK)
                   Peter Bentley (University College, London, UK)
Local Chairs       Giuseppe Nicosia (University of Catania, Italy)
                   Vincenzo Cutello (University of Catania, Italy)
Publicity Chair    Simon Garrett (University of Wales, Aberystwyth, UK)

Program Committee

Uwe Aickelin        University of Nottingham, UK
Paolo Arena         University of Catania, Italy
Lois Boggess        Mississippi State University, USA
Filippo Castiglione Consiglio Nazionale delle Ricerche, Italy
Steve Cayzer        Hewlett-Packard (Bristol), UK
C. Coello Coello    CINVESTAV-IPN, Mexico
Dipankar Dasgupta   University of Memphis, USA
Leandro de Castro   Catholic University of Santos (Unisantos), Brazil
Darren Flower       Edward Jenner Institute for Vaccine Research, UK
Stephanie Forrest   University of New Mexico, USA
Alex Freitas        University of Kent, UK
Alessio Gaspar      University of South Florida, USA
Fabio Gonzalez      National University of Colombia, Colombia
Emma Hart           Napier University, UK
Yoshiteru Ishida    Toyohashi University of Technology, Japan
Colin Johnson       University of Kent, UK
Jungwon Kim         King’s College, London, UK
Henry Lau           University of Hong Kong, P.R. China
Doheon Lee          KAIST, Korea
Wenjian Luo         University of Science and Technology, Anhui, P.R. China
Santo Motta         University of Catania, Italy
Mark Neal           University of Wales, Aberystwyth, UK
Peter Ross          Napier University, UK
Derek Smith         University of Cambridge, UK
Susan Stepney       University of York, UK
Alexander Tarakanov St. Petersburg Institute, Russia
Andy Tyrrell        University of York, UK
Fernando von Zuben  University of Campinas, Brazil
Andrew Watkins      University of Kent, UK
Slawomir Wierzchon  Polish Academy of Sciences, Poland

Special Session on Immunoinformatics

Darren Flower       Edward Jenner Institute for Vaccine Research, UK
Vladimir Brusic     Institute for Infocomm Research, Singapore
P. Kangueane        Nanyang Technological University, Singapore
VIII Organization

**Tutorial Speakers**

Jon Timmis  
University of Kent, UK

Filippo Castiglione  
Consiglio Nazionale delle Ricerche, Italy

Robin Callard  
Institute of Child Health, London, UK

Leandro de Castro  
Catholic University of Santos (Unisantos), Brazil

**Keynote Speaker**

Alan S. Perelson  
Los Alamos National Laboratory, USA

**Sponsoring Institutions**

University of Catania, Faculty of Science
