

Contents

1	Introduction	1
2	Bone and Cartilage	7
2.1	Bone Structure and Function	7
2.2	Matrix Mineralisation	10
2.3	Osteoblast Structure and Function	17
2.4	Osteoclast Structure and Function	19
2.5	Bone Regeneration	20
2.6	Cartilage Structure and Function	25
2.7	Chondrocyte Structure and Function	30
2.8	Cartilage Regeneration	33
2.9	Skeletal Biomechanics	35
2.10	Bone Biomechanics	38
2.11	Cartilage Biomechanic	43
3	Principles of Bone and Cartilage Reconstruction	47
3.1	Bone Repair Strategies	48
3.2	Cartilage Repair Strategies	55
3.3	Extracorporeal Strategies	62
4	Cell Development, Cell Sources	65
4.1	Cell Development	65
4.2	Cell Sources	66
4.3	Genetically Modified Cell Lines	70

5	Harvesting and Cultivation	73
5.1	Marrow-derived Stem Cells	73
5.2	Determined Bone Cells	78
5.3	Determined Chondrogenic Cells	83
5.4	Osteoclasts	83
5.5	Endothelial Cells	84
5.6	Co-cultures	85
6	Materials	121
6.1	Synthetic Organic Materials	122
6.2	Synthetic Inorganic Materials	124
6.3	Natural Organic Materials	125
6.4	Natural Inorganic Materials	128
7	Cells/Surface Interactions	131
7.1	Protein Adsorption	133
7.2	Cell Adhesion	133
7.3	Surface Topography	137
7.4	Surface Chemistry	139
7.5	Induction of Mineralisation at Materials	141
7.6	Functional Aspects of Biomaterial/Cell Interactions	143
7.7	Surface Structuring	143
7.8	Surface Patterning	144
7.9	Peptide Adhesion	145
7.10	Protein Coatings	146
8	Bioreactors and Cell Stimulation	149
8.1	Bioreactors	149
8.2	Stimulation in Bioreactors	156
8.3	Biomagnetic and Bioelectric Stimulation in Bioreactors	159
8.4	Hormones and Cytokines	161

9 Scaffold Structure and Fabrication	163
9.1 Scaffold Structure	163
9.2 Scaffold Fabrication	167
9.3 Scaffold-free Micromass Units	173
10 Tissue Reconstruction in vivo	179
10.1 Animal Models used for Bone Tissue Engineering	181
10.2 Animal Models used for Cartilage Tissue Engineering	186
10.3 Clinical Applications	187
10.4 Immunological Aspects	196
11 Clinical Handling and Control	199
11.1 Regulatory Issues	201
12 Ethical Considerations in Bone and Cartilage Tissue Engineering	203
13 Future Prospects	207
13.1 Customised Tissue Reconstruction	207
13.2 Vascularisation	208
13.3 Genetic Engineering	209
References	213
Subject Index	255

Bone and Cartilage Engineering

Meyer, U.; Wiesmann, H.P.

2006, XIV, 264 p. 85 illus., 49 illus. in color., Hardcover

ISBN: 978-3-540-25347-1
