Contents

Part I: Connectionist Paradigms and Machine Learning

New Model for Time-series Forecasting using RBFS and Exogenous Data..... 3
Juan Manuel Gorriz, Carlos G. Puntone, J. J. G. de La Rosa and
Moises Salmeron

On Improving Data Fitting Procedure in Reservoir Operation using
Artificial Neural Networks................................................................. 13
S. Mohan and V. Ramani Bai

Automatic Vehicle License Plate Recognition using Artificial Neural
Networks............................................................................................. 23
Cemil Oz and Fikret Ercal

Weather Forecasting Models Using Ensembles of Neural Networks........... 33
Imran Maqsood, Muhammad Riaz Khan and Ajith Abraham

Neural Network Predictive Control Applied to Power System Stability....... 43
Steven Ball

Identification of Residues Involved in Protein-Protein Interaction from
Amino Acid Sequence - A Support Vector Machine Approach................... 53
Changhui Yan, Drena Dobbs and Vasant Honavar

From Short Term Memory to Semantics - a Computational Model.............. 63
Parag C. Prasad and Subramani Arunkumar

Part II: Fuzzy Sets, Rough Sets and Approximate Reasoning

Axiomatization of Qualitative Multicriteria Decision Making with the
Sugeno Integral.................................................................................... 77
D. Iourinski and F. Modave

A Self-learning Fuzzy Inference for Truth Discovery Framework................. 87
Alex T.H. Sim, Vincent C. S. Lee, Maria Indrawan and Hee Jee Mei

Exact Approximations for Rough Sets............................................... 97
Dmitry Sitnikov, Oleg Ryabov, Nataly Kravets and Olga Vilchinska
Correlation Coefficient Estimate for Fuzzy Data ........................................ 105
Yongshen Ni and John Y. Cheung

Part III: Agent Architectures and Distributed Intelligence

A Framework for Multiagent-Based System for Intrusion Detection .......... 117
Islam M Hegazy, Taha Al-Arif, Zaki T. Fayed and Hossam M. Faheem

An Adaptive Platform Based Multi-Agents for Architecting
Dependability ........................................................................................................... 127
Amar Ramdane-Cherif, Samir Benarif and Nicole Levy

Stochastic Distributed Algorithms for Target Surveillance ......................... 137
Luis Caffarelli, Valentino Crespi, George Cybenko, Irene Gamba, Daniela Rus

What-if Planning for Military Logistics ................................................................. 149
M. Afzal Upal

Effects of Reciprocal Social Exchanges on Trust and Autonomy ................. 159
Henry Hexmoor and Prapulla Poli

Part IV: Intelligent Web Computing

Real Time Graphical Chinese Chess Game Agents Based on the
Client and Server Architecture ........................................................................ 173
Peter Vo, Yan-Qing Zhang, G. S. Owen and R. Sunderraman

DIMS: an XML-Based Information Integration Prototype Accessing Web
Heterogeneous Sources ......................................................................................... 183
Linghua Fan, Jialin Cao and Rene Soenen

A Frame-Work for High-Performance Web Mining in Dynamic
Environments using Honeybee Search Strategies .......................................... 193
Reginald L. Walker

Part V: Internet Security

Real-time Certificate Validation Service by Client’s Selective Request .......... 207
Jin Kwak, Seungwoo Lee, Soohyun Oh and Dongho Won
Internet Attack Representation using a Hierarchical State Transition Graph
Cheol-Won Lee, Eul Gyu Im and Dong-Kyu Kim

A Secure Patch Distribution Architecture
Cheol-Won Lee, Eul Gyu Im, Jung-Taek Seo, Tae-Shik Sohn, Jong-Sub Moon and Dong-Kyu Kim

Intrusion Detection Using Ensemble of Soft Computing Paradigms
Srinivas Mukkamala, Andrew H. Sung and Ajith Abraham

Part VI: Data mining, Knowledge Management and Information Analysis

NETMARK: Adding Hierarchical Object to Relational Databases
David A. Maluf and Peter B. Tran

Academic KDD Project LISp-Miner
Milan Simunek

Performance Evaluation Metrics for Link Discovery Systems
M. Afzal Upal

Generalizing Association Rules: A Theoretical Framework and Implementation
Antonio Badia and Mehmed Kantardzic

New Geometric ICA Approach for Blind Separation of Sources
Manuel Rodríguez-Álvarez, Fernando Rojas, Carlos G. Puntonet, F. Theis, E. Lang and R. M. Clemente

A Taxonomy of Data Mining Applications Supporting Software Reuse
S. Tangsripairoj and M. H. Samadzadeh

Codifying the "Know How" Using CyKNIT Knowledge Integration Tools
Suliman Al-Hawamdeh

Data Mining Techniques in Materialised Projection View
Ying Wah Teh and Abu Bakar Zaitun

Data Mining Techniques in Index Techniques
Ying Wah Teh and Abu Bakar Zaitun
Decision Tree Induction from Distributed Heterogeneous Autonomous Data Sources................................................................. 341
Doina Caragea, Adrian Silvescu and Vasant Honavar

Part VII: Computational Intelligence in Management

Using IT To Assure a Culture For Success.......................................................... 353
Raj Kumar

Gender Differences in Performance Feedback Utilizing an Expert System: A Replication and Extension........................................ 363
Tim O. Peterson, David D. Vanfleet, Peggy C. Smith and Jon W. Beard

Part VIII: Image Processing and Retrieval

Image Database Query Using Shape-Based Boundary Descriptors........... 373
Nikolay M. Sirakov, James W. Swift and Phillip A. Mlsna

Image Retrieval by Auto Weight Regulation PCA Algorithm..................... 383
W. H. Chang and M. C. Cheng

Improving the Initial Image Retrieval Set by Inter-Query Learning with One-Class SVMs ............................................................... 393
Iker Gondra, Douglas R. Heisterkamp and Jing Peng

Tongue Image Analysis Software .................................................................. 403
Dipti Prasad Mukherjee and D. Dutta Majumder

2 D Object Recognition Using the Hough Transform .................................. 413
Venu Madhav Gummadi and Thompson Sarkodie-Gyan

Part IX: Optimization, Scheduling and Heuristics

Population Size Adaptation for Differential Evolution Algorithm Using Fuzzy Logic ........................................................................ 425
Junhong Liu and Jouni Lampinen

Intelligent Management of QoS Requirements for Perceptual Benefit ........ 437
George Ghinea, George D. Magoulias and J. P. Thomas
Integrating Random Ordering into Multi-heuristic List Scheduling Genetic Algorithm

Andy Auyeung, Iker Gondra and H. K. Dai

Scheduling to be Competitive in Supply Chains

Sabyasachi Saha and Sandip Sen

Contract Net Protocol for Cooperative Optimisation and Dynamic Scheduling of Steel Production

D. Ouelhadj, P. I. Cowling and S. Petrovic

Part X: Special Session on Peer-to-Peer Computing

A Peer-to-Peer System Architecture for Multi-Agent Collaboration

Prithviraj Dasgupta

A Soft Real-Time Agent-Based Peer-to-Peer Architecture

Feng Chen and Vana Kalogeraki

Social Networks as a Coordination Technique for Multi-Robot Systems

Daniel Rodic and Andries P. Engelbrecht

Biology-Inspired Approaches to Peer-to-Peer Computing in BISON

Alberto Montresor and Ozalp Babaoglu

UbAgent: A Mobile Agent Middleware Infrastructure for Ubiquitous/Pervasive Computing

George Samaras and Paraskevas Evripidou

Part XI: 2003 International Workshop on Intelligence, Soft computing and the Web

Enhanced Cluster Visualization Using the Data Skeleton Model

R. Amarasiri, L. K. Wickramasinghe and L. D. Alahakoon

Generating Concept Hierarchies for Categorical Attributes using Rough Entropy

Been-Chian Chien, Su-Yu Liao, and Shyue-Liang Wang

Learning from Hierarchical Attribute Values by Rough Sets

Tzung-Pei Hong, Chun-E Lin, Jiann-Horng Lin and Shyue-Liang Wang
Delivering Distributed Data Mining E-Services ............................................... 569
Shonali Krishnaswamy

Maintenance of Discovered Functional Dependencies: Incremental Deletion ................................................................. 579
Shyue-Liang Wang, Wen-Chieh Tsou, Jiann-Horng Lin and Tzung-Pei Hong

Filtering Multilingual Web Content Using Fuzzy Logic ......................... 589
Rowena Chau and Chung-Hsing Yeh

A Comparison of Patient Classification Using Data Mining in Acute Health Care ................................................................. 599
Eu-Gene Siew, Kate A. Smith, Leonid Churilov and Jeff Wassertheil

Criteria for a Comparative Study of Visualization Techniques in Data Mining ................................................................. 609
Robert Redpath and Bala Srinivasan

Controlling the Spread of Dynamic Self Organising Maps .................... 621
Damminda Alahakoon

Index of Contributors ........................................................................ 631
Intelligent Systems Design and Applications
Abraham, A.; Franke, K.; Koeppen, M. (Eds.)
2003, XVIII, 632 p. 4 illus., Softcover
ISBN: 978-3-540-40426-2
