

# Table of Contents

Expressive Power of SQL .....	1
<i>Leonid Libkin</i>	
Query Evaluation via Tree-Decompositions .....	22
<i>Jörg Flum, Markus Frick, Martin Grohe</i>	
Scalar Aggregation in FD-Inconsistent Databases .....	39
<i>Marcelo Arenas, Leopoldo Bertossi, Jan Chomicki</i>	
On Decidability and Complexity of Description Logics with Uniqueness Constraints .....	54
<i>Vitaliy L. Khizder, David Toman, Grant Weddell</i>	
Expressiveness Issues and Decision Problems for Active Database Event Queries .....	68
<i>James Bailey, Szabolcs Mikulás</i>	
A Theory of Transactions on Recoverable Search Trees .....	83
<i>Seppo Sippu, Elias Soisalon-Soininen</i>	
Minimizing View Sets without Losing Query-Answering Power .....	99
<i>Chen Li, Mayank Bawa, Jeffrey D. Ullman</i>	
Cost Based Data Dissemination in Broadcast Networks .....	114
<i>Bo Xu, Ouri Wolfson, Sam Chamberlain</i>	
Parallelizing the Data Cube .....	129
<i>Frank Dehne, Todd Eavis, Susanne Hambrusch, Andrew Rau-Chaplin</i>	
Asymptotically Optimal Declustering Schemes for Range Queries .....	144
<i>Rakesh K. Sinha, Randeep Bhatia, Chung-Min Chen</i>	
Flexible Data Cubes for Online Aggregation .....	159
<i>Mirek Riedewald, Divyakant Agrawal, Amr El Abbadi</i>	
Mining for Empty Rectangles in Large Data Sets .....	174
<i>Jeff Edmonds, Jarek Gryz, Dongming Liang, Renée J. Miller</i>	
FUN: An Efficient Algorithm for Mining Functional and Embedded Dependencies .....	189
<i>Noël Novelli, Rosine Cicchetti</i>	
Axiomatization of Frequent Sets .....	204
<i>Toon Calders, Jan Paredaens</i>	

On Answering Queries in the Presence of Limited Access Patterns . . . . .	219
<i>Chen Li, Edward Chang</i>	
The Dynamic Complexity of Transitive Closure Is in DynTC <sup>0</sup> . . . . .	234
<i>William Hesse</i>	
Query Languages for Constraint Databases: First-Order Logic, Fixed-Points, and Convex Hulls . . . . .	248
<i>Stephan Kreutzer</i>	
A Semi-monad for Semi-structured Data (ICDT-Version) . . . . .	263
<i>Mary Fernandez, Jérôme Siméon, Philip Wadler</i>	
Algebraic Rewritings for Optimizing Regular Path Queries . . . . .	301
<i>Gösta Grahne, Alex Thomo</i>	
Why and Where: A Characterization of Data Provenance . . . . .	316
<i>Peter Buneman, Sanjeev Khanna, Wang-Chiew Tan</i>	
Subsumption for XML Types . . . . .	331
<i>Gabriel M. Kuper, Jérôme Siméon</i>	
Towards Aggregated Answers for Semistructured Data . . . . .	346
<i>Holger Meuss, Klaus U. Schulz, François Bry</i>	
Orthogonal Range Queries in OLAP . . . . .	361
<i>Chung Keung Poon</i>	
Reasoning about Summarizability in Heterogeneous Multidimensional Schemas . . . . .	375
<i>Carlos A. Hurtado, Alberto O. Mendelzon</i>	
Estimating Range Queries Using Aggregate Data with Integrity Constraints: A Probabilistic Approach . . . . .	390
<i>Francesco Buccafurri, Filippo Furfaro, Domenico Saccà</i>	
Constraint-Based Clustering in Large Databases . . . . .	405
<i>Anthony K.H. Tung, Jiawei Han, Laks V.S. Lakshmanan, Raymond T. Ng</i>	
On the Surprising Behavior of Distance Metrics in High Dimensional Spaces . . . . .	420
<i>Charu C. Aggarwal, Alexander Hinneburg, Daniel A. Keim</i>	
On Optimizing Nearest Neighbor Queries in High-Dimensional Data Spaces . . . . .	435
<i>Stefan Berchtold, Christian Böhm, Daniel Keim, Florian Krebs, Hans-Peter Kriegel</i>	
<b>Author Index . . . . .</b>	<b>451</b>

Database Theory - ICDT 2001

8th International Conference London, UK, January 4-6,  
2001 Proceedings

Van den Bussche, J.; Vianu, V. (Eds.)

2001, X, 454 p., Softcover

ISBN: 978-3-540-41456-8
