Preface

Underlying most of the IWANN calls for papers is the aim to reassume some of the motivations of the groundwork stages of biocybernetics and the later bionics formulations and to try to reconsider the present value of two basic questions. The first one is: “What does neuroscience bring into computation (the new bionics)?” That is to say, how can we seek inspiration in biology? Titles such as “computational intelligence”, “artificial neural nets”, “genetic algorithms”, “evolutionary hardware”, “evolutive architectures”, “embryonics”, “sensory neuromorphic systems”, and “emotional robotics” are representatives of the present interest in “biological electronics” (bionics).

The second question is: “What can return computation to neuroscience (the new neurocybernetics)?” That is to say, how can mathematics, electronics, computer science, and artificial intelligence help the neurobiologists to improve their experimental data modeling and to move a step forward towards the understanding of the nervous system?

Relevant here are the general philosophy of the IWANN conferences, the sustained interdisciplinary approach, and the global strategy, again and again to bring together physiologists and computer experts to consider the common and pertinent questions and the shared methods to answer these questions.

Unfortunately, we have not always been successful in the six biennial meetings from 1991. Frequently the well-known computational models of the past have been repeated and our understanding about the neural functioning of real brains is still scarce. Also the biological influence on computation has not always been used with the necessary methodological care. However IWANN 2001 constituted a new attempt to formulate new models of bio-inspired neural computation with the deeply-held conviction that the interdisciplinary way is, possibly, the most useful one.

IWANN 2001, the 6th International Work-Conference in Artificial and Natural Neural Networks, took place in Granada (Spain) June 13-15, 2001, and addressed the following topics:

1. **Foundations of connectionism.** Brain organization principles. Connectionist versus symbolic representations.
2. **Biophysical models of neurons.** Ionic channels, synaptic level, neurons, and circuits.
3. **Structural and functional models of neurons.** Analogue, digital, probabilistic, Bayesian, fuzzy, object oriented, and energy related formulations.
4. **Learning and other plasticity phenomena.** Supervised, non-supervised, and reinforcement algorithms. Biological mechanisms of adaptation and plasticity.
5. **Complex systems dynamics.** Optimization, self-organization, and cooperative processes. Evolutionary and genetic algorithms. Large scale neural models.

7. Methodology for nets design. Data analysis, task identification, and recursive hierarchical design.

8. Nets simulation and implementation. Development environments and editing tools, implementation, evolving hardware.

10. Other applications. Artificial vision, speech recognition, spatio-temporal planning, and scheduling, data mining, sources separation. Applications of ANNs in robotics, economy, internet, medicine, education, and industry.

IWANN 2001 was organized by the Universidad Nacional de Educación a Distancia, UNED (Madrid), and the Universidad de Granada, UGR (Granada), also in cooperation with IFIP (Working Group in Neural Computer Systems, WG10.6), and the Spanish RIG IEEE Neural Networks Council.

Sponsorship was obtained from the Spanish CICYT and the organizing universities (UNED and UGR).

The papers presented here correspond to talks delivered at the conference. After the evaluation process, 200 papers were accepted for oral or poster presentation, according to the recommendations of reviewers and the authors’ preferences. We have organized these papers in two volumes arranged basically following the topics list included in the call for papers. The first volume, entitled “Connectionist Models of Neurons, Learning Processes, and Artificial Intelligence”, is divided into four main parts and includes the contributions on:

I. Foundations of connectionism and biophysical models of neurons.
II. Structural and functional models of neurons.
III. Learning and other plasticity phenomena, and complex systems dynamics.
IV. Artificial intelligence and cognitive processes.

In the second volume, with the title, “Bio-inspired Applications of Connectionism”, we have included the contributions dealing with applications. These contributions are grouped into three parts:

I. Bio-inspired systems and engineering.
II. Methodology for nets design, and nets simulation and implementation.
III. Other applications (including image processing, medical applications, robotics, data analysis, etc.).

We would like to express our sincere gratitude to the members of the organizing and program committees, in particular to F. de la Paz and J. R. Álvarez-Sánchez, to the reviewers, and to the organizers of preorganized sessions for their invaluable effort in helping with the preparation of this conference. Thanks also to the invited speakers for their effort in preparing the plenary lectures.

Last, but not least, the editors would like to thank Springer-Verlag, in particular Alfred Hofmann, for the continuous and excellent cooperative collaboration.

June 2001

José Mira
Alberto Prieto
Invited Speakers

Oscar Herreras, Dept. of Research, Hospital Ramón y Cajal (Spain)
Daniel Mange, Logic Systems Laboratory, IN-Ecublens (Switzerland)
Leonardo Reyneri, Dip. Elettronica, Politecnico di Torino (Italy)
John Rinzel, Center for Neural Science, New York University (USA)

Field Editors

Igor Aizenberg, Neural Networks Technologies Ltd. (Israel)
Amparo Alonso Betanzos, University of A Coruña (Spain)
Jose Manuel Benitez Sanchez, Universidad de Granada (Spain)
Enrique Castillo Ron, Universidad de Cantabria (Spain)
Andreu Català Mallofré, Univ. Politècnica de Catalunya (Spain)
Carolina Chang, Universidad Simón Bolívar (Venezuela)
Carlos Cotta, University of Málaga (Spain)
Richard Duro, Universidade da Coruña (Spain)
Marcos Faundez-Zanuy, Univ. Politècnica de Catalunya (Spain)
Carlos Garcia Puntonet, Universidad de Granada (Spain)
Gonzalo Joya, Universidad de Málaga (Spain)
Christian Jutten, Inst. National Polytechnique de Grenoble (France)
Dario Maravall, Universidad Politécnica de Madrid (Spain)
Eduardo Sánchez, Universidad de Santiago de Compostela (Spain)
José Santos Reyes, Universidade da Coruña (Spain)
Kate Smith, Monash University (Australia)
Reviewers

Igor Aleksander, Imperial College of Sci. Tech. and Medicine (UK)
José Ramón Álvarez-Sánchez, UNED (Spain)
Shun-ichi Amari, RIKEN (Japan)
A. Bahamonde, Universidad de Oviedo en Gijón (Spain)
Senén Barro Ameneiro, Univ. Santiago de Compostela (Spain)
J. Cabestany, Universidad Politécnica de Cataluña (Spain)
Marie Cottrell, Université Paris 1 (France)
Félix de la Paz López, UNED (Spain)
Ana E. Delgado García, UNED (Spain)
Ángel P. del Pobil, Universidad Jaime I de Castellón (Spain)
José Dorronsoro, Universidad Autónoma de Madrid (Spain)
José Manuel FERRÁNDEZ, Universidad Miguel Hernandez (Spain)
Kunihiro Fukushima, Osaka Univ (Japan)
Tamas Gedeon, Murdoch University (Australia)
Karl Goser, Univ. Dortmund (Germany)
Manuel Graña Romay, Universidad País Vasco (Spain)
J. Hérault, Inst. N. P. Grenoble (France)
Óscar Herreras, Hospital Ramón y Cajal (Spain)
Gonzalo Joya, Universidad de Málaga (Spain)
Christian Jutten, Inst. National Polytechnique de Grenoble (France)
Shahla Keyvan, University of Missouri-Rolla (USA)
Daniel Mange, IN-Ecublens (Switzerland)
Darío Maravall, Universidad Politécnica de Madrid (Spain)
Eve Marder, Brandeis University (USA)
José Mira, UNED (Spain)
J.M. Moreno Aróstegui, Univ. Politécnica de Cataluña (Spain)
Christian W. Omlin, University of Western Cape South (Africa)
Julio Ortega Lopera, Universidad de Granada (Spain)
F.J. Pelayo, Universidad de Granada (Spain)
Franz Pichler, Johannes Kepler University (Austria)
Alberto Prieto Espínosa, Universidad de Granada (Spain)
Leonardo Maria Reyneri, Politecnico di Torino (Italy)
John Rinzel, New York University (USA)
J.V. Sánchez-Andrés, Universidad de Alicante (Spain)
Francisco Sandoval, Universidad de Málaga (Spain)
J.A. Sigüenza, Universidad Autónoma de Madrid (Spain)
M. Verleysen, Université Catholique de Louvain (Belgium)
Table of Contents, Part II

Bio-inspired Systems and Engineering

From Embryonics to POEtic Machines ........................................ 1
\ D. Mange, A. Stauffer, G. Tempesti, and C. Teuscher

Design and Codesign of Neuro-Fuzzy Hardware .......................... 14
\ L.M. Reyneri

A Field-Programmable Conductance Array IC
for Biological Neurons Modeling ........................................... 31
\ V. Douence, S. Renaud-Le Masson, S. Saïghi, and G. Le Masson

A 2-by-n Hybrid Cellular Automaton Implementation
Using a Bio-Inspired FPGA ............................................................. 39
\ H.F. Restrepo and D. Mange

Parametric Neurocontroller for Positioning of an Anthropomorphic Finger
Based on an Oponent Driven-Tendon Transmission System ............ 47
\ J.I. Mulero, J. Feliú Batlle, and J. López Coronado

An Integration Principle for Multimodal Sensor Data Based
on Temporal Coherence of Self-Organized Patterns .................... 55
\ E.I. Barakova

Simultaneous Parallel Processing of Object and Position
by Temporal Correlation .............................................................. 64
\ L.F. Lago-Fernández and G. Deco

Methodology for Nets Design, Nets Simulation
and Implementation

NeuSim: A Modular Neural Networks Simulator for Beowulf Clusters .... 72
\ C.J. García Orellana, R. Gallardo Caballero,
H.M. González Velasco, F.J. López Aligué

Curved Kernel Neural Network for Functions Approximation .......... 80
\ P. Bourret and B. Pelletier

Repeated Measures Multiple Comparison Procedures Applied
to Model Selection in Neural Networks .................................... 88
\ E. Guerrero Vázquez, A. Yañez Escolano, P. Galindo Roaño,
J. Pizarro Junquera
Extension of HUMANN for Dealing with Noise and with Classes of Different Shape and Size: A Parametric Study .......................... 96
P. García Báez, C.P. Suárez Araujo, and P. Fernández López

Evenet 2000: Designing and Training Arbitrary Neural Networks in Java .. 104

Neyman-Pearson Neural Detectors ........................................ 111
D. Andina and J.L. Sanz-González

Distance between Kohonen Classes Visualization Tool to Use SOM in Data Set Analysis and Representation .............................. 119
P. Roussel and C. Guinot

Optimal Genetic Representation of Complete Strictly-Layered Feedforward Neural Networks ..................... 127
S. Raptis, S. Tzafestas, and H. Karagianni

Assessing the Noise Immunity of Radial Basis Function Neural Networks ... 136
J.L. Bernier, J. González, A. Cañas, and J. Ortega

Analyzing Boltzmann Machine Parameters for Fast Convergence .......... 144
F.J. Salcedo, J. Ortega, and A. Prieto

A Penalization Criterion Based on Noise Behaviour for Model Selection ... 152
J. Pizarro Junquera, P. Galindo Riaño, E. Guerrero Vázquez, and A. Yañez Escolano

Image Processing

Wood Texture Analysis by Combining the Connected Elements Histogram and Artificial Neural Networks .............................. 160
M.A. Patricio Guisado and D. Maravall Gómez-Allende

Dynamic Topology Networks for Colour Image Compression ............. 168
E. López-Rubio, J. Muñoz-Pérez, and J.A. Gómez-Ruiz

Analysis on the Viewpoint Dependency in 3-D Object Recognition by Support Vector Machines ............................. 176
T. Hayasaka, E. Ohnishi, S. Nakauchi, and S. Usui

A Comparative Study of Two Neural Models for Cloud Screening of Iberian Peninsula Meteosat Images ............................ 184
M. Macías Macías, F.J. López Aligué, A. Serrano Pérez, and A. Astilleros Vivas
A Growing Cell Neural Network Structure for Off-Line Signature Recognition ........................................ 192
K. Toscano-Medina, G. Sanchez-Perez, M. Nakano-Miyatake, and H. Perez-Meana

ZISC-036 Neuro-processor Based Image Processing .................... 200
K. Madani, G. de Trémiolles, and P. Tannhof

Self-Organizing Map for Hyperspectral Image Analysis .................. 208
P. Martínez, P.L. Aguilar, R.M. Pérez, M. Linaje, J.C. Preciado, and A. Plaza

Classification of the Images of Gene Expression Patterns Using Neural Networks Based on Multi-valued Neurons ................. 219
I. Aizenberg, E. Myasnikova, and M. Samsonova

Image Restoration Using Neural Networks .................................... 227
S. Ghennam and K. Bennmahammed

Automatic Generation of Digital Filters by NN Based Learning: An Application on Paper Pulp Inspection ........................ 235
P. Campoy-Cervera, D.F. Muñoz García, D. Peña, and J.A. Calderón-Martínez

Image Quality Enhancement for Liquid Bridge Parameter Estimation with DTCNN .................................................. 246
M.A. Jaramillo, J. Álvaro Fernández, J.M. Montanero, and F. Zayas

Neural Network Based on Multi-valued Neurons: Application in Image Recognition, Type of Blur and Blur Parameters Identification ........................................ 254
I. Aizenberg, N. Aizenberg, and C. Butakoff

Analyzing Wavelets Components to Perform Face Recognition ........ 262
P. Isasi, M. Velasco, and J. Segovia

Man-Machine Voice Interface Using a Commercially Available Neural Chip .................................................. 271
N.J. Medrano-Marqués and B. Martín-del-Brío

Partial Classification in Speech Recognition Verification ................ 279
G. Hernández Árrego and I. Torres Sánchez

Speaker Recognition Using Gaussian Mixtures Model .................. 287
E. Simancas-Acevedo, A. Kurematsu, M. Nakano Miyatake, and H. Perez-Meana

A Comparative Study of ICA Filter Structures Learnt from Natural and Urban Images ................................................ 295
C. Ziegaus and E.W. Lang
Neural Edge Detector –
A Good Mimic of Conventional One Yet Robust against Noise .......... 303
K. Suzuki, I. Horiba, and N. Sugie

Neural Networks for Image Restoration from the Magnitude of Its Fourier Transform
................................................................. 311
A. Burian, J. Saarinen, and P. Kuosmanen

Medical Applications

An Automatic System for the Location of the Optic Nerve Head from 2D Images........................................... 319
M. Bachiller, M. Rincón, J. Mira, and J. García-Feijó

Can ICA Help Classify Skin Cancer and Benign Lesions?................. 328
C. Mies, C. Bauer, G. Ackermann, W. Bäumler, C. Abels,
C.G. Puntonet, M. Rodríguez-Alvarez, and E.W. Lang

An Approach Fractal and Analysis of Variogram for Edge Detection of Biomedical Images.................................... 336
L. Hamami and N. Lassouaoui

Some Examples for Solving Clinical Problems Using Neural Networks. .... 345
A.J. Serrano, E. Soria, G. Camps, J.D. Martín, and N.V. Jiménez

Medical Images Analysis: An Application of Artificial Neural Networks in the Diagnosis of Human Tissues ..................... 353
E. Restum Antonio, L. Biondi Neto, V. De Roberto Junior,
and F. Hideo Fukuda

Feature Selection, Ranking of Each Feature and Classification
for the Diagnosis of Community Acquired Legionella Pneumonia ......... 361
E. Monte, J. Solé i Casals, J.A. Fiz, and N. Sopena

Rotation-Invariant Image Association for Endoscopic Positional
Identification Using Complex-Valued Associative Memories ............. 369
H. Aoki, E. Watanabe, A. Nagata, and Y. Kosugi

A Multi Layer Perceptron Approach for Predicting and Modeling
the Dynamical Behavior of Cardiac Ventricular Repolarisation .......... 377
R. El Dajani, M. Miquel, and P. Rubel

Detection of Microcalcifications in Mammograms by the Combination of a Neural Detector and Multiscale Feature Enhancement ........... 385
D. Andina and A. Vega-Corona
**Table of Contents, Part II**

An Auto-learning System for the Classification of Fetal Heart Rate Decelerative Patterns ........................................ 393
B. Guijarro Berdiñas, A. Alonso-Betanzos, O. Fontenla-Romero, O. García-Dans, and N. Sánchez Maroño

Neuro-Fuzzy Nets in Medical Diagnosis: The DIAGEN Case Study of Glaucoma .................................................. 401
E. Carmona, J. Mira, J. García Feijó, and M.G. de la Rosa

**Robotics**

Evolving Brain Structures for Robot Control ............................... 410
F. Pasemann, U. Steinmetz, M. Hülse, and B. Lara

A Cuneate-Based Network and Its Application as a Spatio-Temporal Filter in Mobile Robotics ........................................ 418
E. Sánchez, M. Mucientes, and S. Barro

An Application of Fuzzy State Automata: Motion Control of an Hexapod Walking Machine ........................................... 426
D. Morano and L.M. Reyneri

Neural Adaptive Force Control for Compliant Robots ................. 436
N. Saadia, Y. Amirat, J. Pontnaut, and A. Ramdane-Cherif

Reactive Navigation Using Reinforcement Learning Techniques in Situations of POMDPs ............................................... 444
P. Puliti, G. Tascini, and A. Montesanto

Landmark Recognition for Autonomous Navigation Using Odometric Information and a Network of Perceptrons ........... 451
J. de Lope Asiaín and D. Maravall Gómez-Allende

F. de la Paz López, and J.R. Álvarez-Sánchez

Information Integration for Robot Learning Using Neural Fuzzy Systems ................................................................. 468
C. Zhou, Y. Yang, and J. Kanniah

Incorporating Perception-Based Information in Reinforcement Learning Using Computing with Words .................. 476
C. Zhou, Y. Yang, and X. Jia

Cellular Neural Networks for Mobile Robot Vision ........................ 484
M. Balsi, A. Maraschini, G. Apicella, S. Luengo, J. Solsona, and X. Vilasis-Cardona

Learning to Predict Variable-Delay Rewards and Its Role in Autonomous Developmental Robotics .......................... 492
A. Pérez-Uribe and M. Courant
Robust Chromatic Identification and Tracking ........................................... 500
  \textit{J. Ramírez and G. Grittani}

Sequence Learning in Mobile Robots Using Avalanche Neural Networks 508
  \textit{G. Quero and C. Chang}

Investigating Active Pattern Recognition in an Imitative Game .............. 516
  \textit{S. Moga, P. Gaussier, and M. Quoy}

Towards an On-Line Neural Conditioning Model for Mobile Robots ....... 524
  \textit{E. Şahin}

\textbf{General Applications}

A Thermocouple Model Based on Neural Networks ............................. 531
  \textit{N. Medrano-Marqués, R. del-Hoyo-Alonso, and B. Martín-del-Brió}

Improving Biological Sequence Property Distances
Using a Genetic Algorithm ............................................................. 539
  \textit{O.M. Perez, F.J. Marin, and O. Trelles}

Data Mining Applied to Irrigation Water Management ....................... 547
  \textit{J.A. Botía, A.F. Gómez Skarmeta, M. Valdés, and A. Padilla}

Classification of Specular Object Based on Statistical Learning Theory 555
  \textit{T.S. Yun}

On the Application of Heteroassociative Morphological Memories
to Face Localization ................................................................. 563
  \textit{B. Raducanu and M. Graña}

Early Detection and Diagnosis of Faults in an AC Motor
Using Neuro Fuzzy Techniques: FasArt+ Fuzzy k Nearest Neighbors ...... 571
  \textit{J. Juez, G.I. Sainz, E.J. Moya, and J.R. Perán}

Knowledge-Based Neural Networks for Modelling Time Series ............... 579
  \textit{J. van Zyl and C.W. Omlin}

Using Artificial Neural Network to Define Fuzzy Comparators
in FSQl with the Criterion of Some Decision-Maker ......................... 587
  \textit{R. Carrasco, J. Galindo, and A. Vila}

Predictive Classification for Integrated Pest Management by Clustering
in NN Output Space ...................................................................... 595
  \textit{M. Salmerón, D. Guidotti, R. Petacchi, and L.M. Regneri}

Blind Source Separation in the Frequency Domain: A Novel Solution
to the Amplitude and the Permutation Indeterminacies ...................... 603
  \textit{A. Dapena and L. Castedo}

Table of Contents, Part I

Foundations of Connectionism and Biophysical Models of Neurons

Dendrites: The Last-Generation Computers .......................... 1
   O. Herreras, J.M. Ibarz, L. López-Aguado, and P. Varona

Homogeneity in the Electrical Activity Pattern as a Function of Intercellular Coupling in Cell Networks ......................... 14
   E. Andreu, R. Pomares, B. Soria, and J.V. Sanchez-Andres

A Realistic Computational Model of the Local Circuitry of the Cuneate Nucleus ........................................ 21
   E. Sánchez, S. Barro, J. Mariño, and A. Canedo

Algorithmic Extraction of Morphological Statistics from Electronic Archives of Neuroanatomy ......................... 30
   R. Scorcioni and G.A. Ascoli

What Can We Compute with Lateral Inhibition Circuits? ............ 38
   J. Mira and A.E. Delgado

Neuronal Models with Current Inputs ................................ 47
   J. Feng

Decoding the Population Responses of Retinal Ganglions Cells Using Information Theory ................................. 55
   J.M. Ferrández, M. Bongard, F. García de Quirós, J.A. Bolea, J. Ammermüller, R.A. Normann, and E. Fernández

Numerical Study of Effects of Co-transmission by Substance P and Acetylcholine on Synaptic Plasticity in Myenteric Neurons .......... 63
   R. Miftakov and J. Christensen

Neurobiological Modeling of Bursting Response During Visual Attention .. 72
   R. Rajimehr and L. Montaser Kouhsari

Sensitivity of Simulated Striate Neurons to Cross-Like Stimuli Based on Disinhibitory Mechanism .......................... 81
   K.A. Saltykov and I.A. Shevelev

Synchronisation Mechanisms in Neuronal Networks .................. 87
   S. Chillemi, M. Barbi, and A. Di Garbo
Detection of Oriented Repetitive Alternating Patterns in Color Images
(A Computational Model of Monkey Grating Cells) ............................... 95
T. Lourens, H.G. Okuno, and H. Kitano

Synchronization in Brain – Assessment by Electroencephalographic Signals 108
E. Pereda and J. Bhattacharya

Strategies for the Optimization of Large Scale Networks of Integrate
and Fire Neurons ............................................................................. 117
M.A. Sánchez-Montaños

Structural and Functional Models of Neurons

A Neural Network Model of Working Memory
(Processing of “What” and “Where” Information) ............................... 126
T. Minami and T. Inui

Orientation Selectivity of Intracortical Inhibitory Cells in the Striate
Visual Cortex: A Computational Theory and a Neural Circuitry ........ 134
M.N. Shirazi

Interpreting Neural Networks in the Frame of the Logic of Lukasiewicz . . . 142
C. Moraga and L. Salinas

Time-Dispersive Effects in the J. Gonzalo’s Research
on Cerebral Dynamics ...................................................................... 150
I. Gonzalo and M.A. Porras

Verifying Properties of Neural Networks ............................................ 158
P. Rodrigues, J.F. Costa, and H.T. Siegelmann

Algorithms and Implementation Architectures
for Hebbian Neural Networks ....................................................... 166
J.A. Berzal and P.J. Zufiria

The Hierarchical Neuro-Fuzzy BSP Model: An Application
in Electric Load Forecasting .............................................................. 174
F.J. de Souza, M.M.R. Vellasco, and M.A.C. Pacheco

The Chemical Metaphor in Neural Computation ............................... 184
J. Barahona da Fonseca, I. Barahona da Fonseca,
C.P. Suárez Araújo, and J. Simões da Fonseca

The General Neural-Network Paradigm for Visual Cryptography ........ 196
T.-W. Yue and S. Chiang

# Table of Contents, Part I

## Learning and Other Plasticity Phenomena, and Complex Systems Dynamics

- **Generalization Error and Training Error at Singularities of Multilayer Perceptrons**
  
  S.-I. Amari, T. Ozeki, and H. Park

- **Bistable Gradient Neural Networks: Their Computational Properties**
  
  V. Chinarov and M. Menzinger

- **Inductive Bias in Recurrent Neural Networks**
  
  S. Snyders and C.W. Omlin

- **Accelerating the Convergence of EM-Based Training Algorithms for RBF Networks**
  
  M. Lázaro, I. Santamaría, and C. Pantaleón

- **Expansive and Competitive Neural Networks**
  
  J.A. Gomez-Ruiz, J. Muñoz-Perez, E. Lopez-Rubio, and M.A. Garcia-Bernal

- **Fast Function Approximation with Hierarchical Neural Networks and Their Application to a Reinforcement Learning Agent**
  
  J. Fischer, R. Breithaupt, and M. Bode

- **Two Dimensional Evaluation Reinforcement Learning**
  
  H. Okada, H. Yamakawa, and T. Omori

- **Comparing the Learning Processes of Cognitive Distance Learning and Search Based Agent**
  
  H. Yamakawa, Y. Miyamoto, and H. Okada

- **Selective Learning for Multilayer Feedforward Neural Networks**
  
  A.P. Engelbrecht

- **Connectionist Models of Cortico-Basal Ganglia Adaptive Neural Networks During Learning of Motor Sequential Procedures**
  
  J. Molina Vilaplana, J. Feliú Batlle, and J. López Coronado

- **Practical Consideration on Generalization Property of Natural Gradient Learning**
  
  H. Park

- **Novel Training Algorithm Based on Quadratic Optimisation Using Neural Networks**
  
  G. Arulampalam and A. Bouzerdoum

- **Non-symmetric Support Vector Machines**
  
  J. Feng
Natural Gradient Learning in NLDA Networks ............................... 427
   J.R. Dorronsoro, A. González, and C. Santa Cruz

AUTOWISARD: Unsupervised Modes for the WISARD ................. 435
   I. Wickert and F.M.G. França

Neural Steering: Difficult and Impossible Sequential Problems
for Gradient Descent ............................................. 442
   G. Milligan, M.K. Weir, and J.P. Lewis

Analysis of Scaling Exponents of Waken and Sleeping Stage in EEG .... 450
   J.-M. Lee, D.-J. Kim, I.-Y. Kim, and S.I. Kim

Model Based Predictive Control Using Genetic Algorithms.
Application to Greenhouses Climate Control .......................... 457
   X. Blasco, M. Martínez, J. Senent, and J. Sanchis

Nonlinear Parametric Model Identification with Genetic Algorithms.
Application to a Thermal Process .................................. 466
   X. Blasco, J.M. Herrero, M. Martínez, and J. Senent

A Comparison of Several Evolutionary Heuristics
for the Frequency Assignment Problem .................................. 474
   C. Cotta and J.M. Troya

GA Techniques Applied to Contour Search in Images of Bovine Livestock . 482
   H.M. González Velasco, C.J. García Orellana,
   M. Macías Macías, and M.I. Acevedo Sotoca

Richer Network Dynamics of Intrinsically Non-regular Neurons Measured
through Mutual Information ................................................ 490
   F. Rodríguez, P. Varona, R. Huerta, M.I. Rabinovich,
   and H.D.I. Abarbanel

RBF Neural Networks, Multiobjective Optimization
and Time Series Forecasting ................................................ 498
   J. González, I. Rojas, H. Pomares, and J. Ortega

Evolving RBF Neural Networks ............................................. 506
   V.M. Rivas, P.A. Castillo, and J.J. Merelo

Evolutionary Cellular Configurations
for Designing Feed-Forward Neural Networks Architectures .......... 514
   G. Gutiérrez, P. Isasi, J.M. Molina, A. Sanchís, and I.M. Galván

A Recurrent Multivalued Neural Network for the N-Queens Problem .... 522
   E. Mérida, J. Muñoz, and R. Benítez

</table>
Comparison of Supervised Self-Organizing Maps Using Euclidian or Mahalanobis Distance in Classification Context

F. Fessant, P. Aknin, L. Oukhellou, and S. Midenet

Introducing Multi-objective Optimization in Cooperative Coevolution of Neural Networks

STAR - Sparsity through Automated Rejection

R. Burbidge, M. Trotter, B. Buxton, and S. Holden

Ordinal Regression with $K$-SVCR Machines

C. Angulo and A. Català

Large Margin Nearest Neighbor Classifiers

S. Bermejo and J. Cabestany

Reduced Support Vector Selection by Linear Programs

W.A. Fellenz

Edge Detection in Noisy Images Using the Support Vector Machines

H. Gómez-Moreno, S. Maldonado-Bascón, and F. López Ferreras

Initialization in Genetic Algorithms for Constraint Satisfaction Problems

C.R. Vela, R. Varela, and J. Puente

Evolving High-Posterior Self-Organizing Maps

J. Muruzábal

Using Statistical Techniques to Predict GA Performance

R. Nogueras and C. Cotta

Multilevel Genetic Algorithm for the Complete Development of ANN

J. Dorado, A. Santos, and J.R. Rabuñal

Graph Based GP Applied to Dynamical Systems Modeling

A.M. López, H. López, and L. Sánchez

Nonlinear System Dynamics in the Normalisation Process of a Self-Organising Neural Network for Combinatorial Optimisation

T. Kwok and K.A. Smith

Continuous Function Optimisation via Gradient Descent on a Neural Network Approximation Function

K.A. Smith and J.N.D. Gupta

An Evolutionary Algorithm for the Design of Hybrid Fiber Optic-Coaxial Cable Networks in Small Urban Areas

P. Cortés, F. Guerrero, D. Canca, and J.M. García
