Contents

Course and School Timetabling

A Multiobjective Genetic Algorithm for the Class/Teacher Timetabling Problem ........................................... 3
M.P. Carrasco, M.V. Pato

Some Complexity Aspects of Secondary School Timetabling Problems ........ 18
H.M.M. ten Eikelder, R.J. Willemen

A Generic Object-Oriented Constraint-Based Model for University Course Timetabling ........................................... 28
K. Zervoudakis, P. Stamatopoulos

A Co-evolving Timeslot/Room Assignment Genetic Algorithm Technique for University Timetabling ......................... 48
H. Ueda, D. Ouchi, K. Takahashi, and T. Miyahara

A Comprehensive Course Timetabling and Student Scheduling System at the University of Waterloo ......................... 64
M.W. Carter

Examination Timetabling

Examination Timetables and Tabu Search With Longer-Term Memory ................ 85
G.M. White, B.S. Xie

Tabu Search Techniques for Examination Timetabling ......................... 104
L. Di Gaspero, A. Schaerf

A Multicriteria Approach to Examination Timetabling .................... 118
E.K. Burke, Y. Bykov, and S. Petrovic

A Grouping Genetic Algorithm for Graph Colouring and Exam Timetabling ........................................... 132
W. Erben

Employee Timetabling

Cyclical Staff Scheduling Using Constraint Logic Programming ............ 159
P. Chan, G. Weil
A Hyperheuristic Approach to Scheduling a Sales Summit .......................... 176  
*P. Cowling, G. Kendall, and E. Soubeiga*

Solving Rostering Tasks as Constraint Optimization .............................. 191  
*H. Meyer auf‘m Hofe*

Assigning Resources to Constrained Activities ...................................... 213  
*A. Meisels, E. Ovadia*

**Other Timetabling and Related Problems**

Fleet Scheduling Optimization: A Simulated Annealing Approach ............ 227  
*D. Sosnowska, J. Rolim*

A Schedule-Then-Break Approach to Sports Timetabling .......................... 242  
*M.A. Trick*

Three Methods to Automate the Space Allocation Process in UK Universities ................................................................. 254  
*E.K. Burke, P. Cowling, J.D. Landa Silva, and B. McCollum*

**Practical Considerations and General Issues**

Resource-Constrained Project Scheduling and Timetabling ..................... 277  
*P. Brucker, S. Knust*

Graph Colouring by Maximal Evidence Edge Adding ............................... 294  
*B. Rising, J. Shawe-Taylor, and J. Žerovnik*

Modelling Timetabling Problems with STTL ........................................ 309  
*J.H. Kingston*

A Language for Specifying Complete Timetabling Problems ..................... 322  
*L.P. Reis, E. Oliveira*

A Software Architecture for Timetable Construction ............................. 342  
*J.H. Kingston, B.Y.-S. Lynn*

**Other Timetabling Presentations**

Other Timetabling Presentations ................................................... 353

**Author Index** ........................................................................... 359
Practice and Theory of Automated Timetabling III
Third International Conference, PATAT 2000 Konstanz, Germany, August 16-18, 2000 Selected Papers
Burke, E.; Erben, W. (Eds.)
2001, XII, 364 p., Softcover
ISBN: 978-3-540-42421-5
