

# Contents

- 1 Introduction to the book ..... 1**
  - 1.1 Overview..... 1
  - 1.2 Aims of the book, and who will benefit from it? ..... 3
  - 1.3 Structure of the book..... 4
    - 1.3.1 Motivation for applying Semantic Web technologies to the Social Web ..... 5
    - 1.3.2 Introduction to the Social Web (Web 2.0, social media, social software)..... 5
    - 1.3.3 Adding semantics to the Web..... 6
    - 1.3.4 Discussions..... 6
    - 1.3.5 Knowledge and information sharing ..... 6
    - 1.3.6 Multimedia sharing..... 7
    - 1.3.7 Social tagging ..... 7
    - 1.3.8 Social sharing of software ..... 7
    - 1.3.9 Social networks ..... 8
    - 1.3.10 Interlinking online communities..... 8
    - 1.3.11 Social Web applications in enterprise ..... 8
    - 1.3.12 Towards the Social Semantic Web..... 9
  
- 2 Motivation for applying Semantic Web technologies to the Social Web ..... 11**
  - 2.1 Web 2.0 and the Social Web..... 11
  - 2.2 Addressing limitations in the Social Web with semantics ..... 13
  - 2.3 The Social Semantic Web: more than the sum of its parts..... 15
  - 2.4 A food chain of applications for the Social Semantic Web ..... 17
  - 2.5 A practical Social Semantic Web ..... 19
  
- 3 Introduction to the Social Web (Web 2.0, social media, social software) .... 21**
  - 3.1 From the Web to a Social Web..... 21
  - 3.2 Common technologies and trends ..... 25
    - 3.2.1 RSS..... 25
    - 3.2.2 AJAX..... 27
    - 3.2.3 Mashups ..... 28
    - 3.2.4 Advertising ..... 30
    - 3.2.5 The Web on any device ..... 32
    - 3.2.6 Content delivery ..... 34
    - 3.2.7 Cloud computing ..... 35
    - 3.2.8 Folksonomies ..... 38
  - 3.3 Object-centred sociality ..... 39

3.4 Licensing content.....	42
3.5 Be careful before you post.....	42
3.6 Disconnects in the Social Web .....	44
<b>4 Adding semantics to the Web .....</b>	<b>45</b>
4.1 A brief history.....	45
4.2 The need for semantics .....	47
4.3 Metadata .....	51
4.3.1 Resource Description Framework (RDF).....	52
4.3.2 The RDF syntax .....	54
4.4 Ontologies.....	56
4.4.1 RDF Schema .....	59
4.4.2 Web Ontology Language (OWL).....	61
4.5 SPARQL.....	62
4.6 The ‘lowercase’ semantic web, including microformats .....	64
4.7 Semantic search .....	66
4.8 Linking Open Data .....	67
4.9 Semantic mashups .....	69
4.10 Addressing the Semantic Web ‘chicken-and-egg’ problem.....	71
<b>5 Discussions .....</b>	<b>75</b>
5.1 The world of boards, blogs and now microblogs.....	75
5.2 Blogging .....	76
5.2.1 The growth of blogs .....	77
5.2.2 Structured blogging .....	79
5.2.3 Semantic blogging.....	81
5.3 Microblogging .....	85
5.3.1 The Twitter phenomenon .....	88
5.3.2 Semantic microblogging .....	89
5.4 Message boards.....	91
5.4.1 Categories and tags on message boards.....	92
5.4.2 Characteristics of forums .....	94
5.4.3 Social networks on message boards .....	97
5.5 Mailing lists and IRC.....	100
<b>6 Knowledge and information sharing .....</b>	<b>103</b>
6.1 Wikis.....	103
6.1.1 The Wikipedia.....	105
6.1.2 Semantic wikis .....	105
6.1.3 DBpedia .....	110
6.1.4 Semantics-based reputation in the Wikipedia .....	111

6.2 Other knowledge services leveraging semantics.....	112
6.2.1 Twine.....	112
6.2.2 The Internet Archive .....	115
6.2.3 Powerset .....	117
6.2.4 OpenLink Data Spaces .....	119
6.2.5 Freebase.....	119
<b>7 Multimedia sharing .....</b>	<b>121</b>
7.1 Multimedia management .....	121
7.2 Photo-sharing services .....	122
7.2.1 Modelling RDF data from Flickr.....	123
7.2.3 Annotating images using Semantic Web technologies.....	125
7.3 Podcasts .....	126
7.3.1 Audio podcasts .....	127
7.3.2 Video podcasts .....	129
7.3.3 Adding semantics to podcasts .....	131
7.4 Music-related content .....	133
7.4.1 DBTune and the Music Ontology.....	133
7.4.2 Combining social music and the Semantic Web .....	134
<b>8 Social tagging .....</b>	<b>137</b>
8.1 Tags, tagging and folksonomies .....	137
8.1.1 Overview of tagging.....	137
8.1.2 Issues with free-form tagging systems .....	140
8.2 Tags and the Semantic Web.....	142
8.2.1 Mining taxonomies and ontologies from folksonomies .....	143
8.2.2 Modelling folksonomies using Semantic Web technologies.....	144
8.3 Tagging applications using Semantic Web technologies.....	148
8.3.1 Annotea .....	148
8.3.2 Revyu.com.....	149
8.3.3 SweetWiki .....	151
8.3.4 int.ere.st .....	151
8.3.5 LODr .....	152
8.3.6 Atom Interface.....	153
8.3.7 Faviki.....	154
8.4 Advanced querying capabilities thanks to semantic tagging .....	155
8.4.1 Show items with the tag ‘semanticweb’ on any platform.....	155
8.4.2 List the ten latest items tagged by Alexandre on SlideShare.....	155
8.4.3 List the tags used by Alex on SlideShare and by John on Flickr.....	157
8.4.4 Retrieve any content tagged with something relevant to the Semantic Web field .....	158

<b>9 Social sharing of software</b> .....	<b>159</b>
9.1. Software widgets, applications and projects .....	159
9.2 Description of a Project (DOAP) .....	160
9.2.1 Examples of DOAP use .....	161
9.3 Crawling and browsing software descriptions .....	164
9.4 Querying project descriptions and related data .....	166
9.4.1 Locating software projects from people you trust .....	166
9.4.2 Locating a software project related to a particular topic .....	167
<b>10 Social networks</b> .....	<b>169</b>
10.1 Overview of social networks .....	169
10.2 Online social networking services .....	173
10.3 Some psychology behind SNS usage .....	175
10.4 Niche social networks .....	177
10.5 Addressing some limitations of social networks .....	179
10.6 Friend-of-a-Friend (FOAF) .....	181
10.6.1 Consolidation of people objects .....	184
10.6.2 Aggregating a person's web contributions .....	186
10.6.3 Inferring relationships from aggregated data .....	187
10.7 hCard and XFN .....	189
10.8 The Social Graph API and OpenSocial .....	190
10.8.1 The Social Graph API .....	190
10.8.2 OpenSocial .....	192
10.9 The Facebook Platform .....	193
10.10 Some social networking initiatives from the W3C .....	194
10.11 A social networking stack .....	194
<b>11 Interlinking online communities</b> .....	<b>197</b>
11.1 The need for semantics in online communities .....	197
11.2 Semantically-Interlinked Online Communities (SIOC) .....	198
11.2.1 The SIOC ontology .....	201
11.2.2 SIOC metadata format .....	203
11.2.3 SIOC modules .....	205
11.3 Expert finding in online communities .....	206
11.3.1 FOAF for expert finding .....	208
11.3.2 SIOC for expert finding .....	209
11.4 Connections between community description formats .....	211
11.5 Distributed conversations and channels .....	212
11.6 SIOC applications .....	215
11.7 A food chain for SIOC data .....	216
11.7.1 SIOC producers .....	218
11.7.2 SIOC collectors .....	223
11.7.3 SIOC consumers .....	224
11.8 RDFa for interlinking online communities .....	231

11.9 Argumentative discussions in online communities.....	234
11.10 Object-centred sociality in online communities.....	236
11.11 Data portability in online communities.....	238
11.11.1 The DataPortability working group.....	238
11.11.2 Data portability with FOAF and SIOC.....	240
11.11.3 Connections between portability efforts.....	241
11.12 Online communities for health care and life sciences.....	242
11.12.1 Semantic Web Applications in Neuromedicine.....	243
11.12.2 Science Collaboration Framework .....	244
11.12.3 bio-zen and the art of scientific community maintenance .....	246
11.13 Online presence.....	246
11.14 Online attention.....	247
11.15 The SIOC data competition .....	247
<b>12 Social Web applications in enterprise.....</b>	<b>251</b>
12.1 Overview of Enterprise 2.0.....	251
12.2 Issues with Enterprise 2.0 .....	255
12.2.1 Social and philosophical issues with Enterprise 2.0.....	255
12.2.2 Technical issues with Enterprise 2.0 .....	258
12.3 Improving Enterprise 2.0 ecosystems with semantic technologies.....	262
12.3.1 Introducing SemSLATES.....	262
12.3.2 Implementing semantics in Enterprise 2.0 ecosystems .....	263
12.3.3 SIOC for collaborative work environments.....	266
<b>13 Towards the Social Semantic Web.....</b>	<b>269</b>
13.1 Possibilities for the Social Semantic Web .....	269
13.2 A community-guided Social Semantic Web .....	271
13.2.1 Wisdom of the crowds and the Semantic Web.....	272
13.2.2 A grassroots approach .....	273
13.2.3 The vocabulary onion.....	275
13.3 Integrating with the Social Semantic Desktop.....	278
13.4 Privacy and identity on the Social Semantic Web .....	279
13.4.1 Keeping privacy in mind .....	279
13.4.2 Identity fragmentation .....	280
13.5 The vision of a Social Semantic Web .....	281
<b>Acknowledgments.....</b>	<b>285</b>
<b>Dedication from John.....</b>	<b>287</b>
<b>Biographies .....</b>	<b>289</b>
<b>References .....</b>	<b>291</b>
