

# Contents

<b>Steady-State Photoconduction in Amorphous Organic Solids</b> .....	1
H. Bässler and E.V. Emelianova	
<b>Effective Temperature Models for the Electric Field Dependence of Charge Carrier Mobility in Tris(8-hydroxyquinoline) Aluminum</b> .....	29
P.J. Jadhav, B.N. Limketkai, and M.A. Baldo	
<b>Description of Charge Transport in Disordered Organic Materials</b> .....	45
S.D. Baranovskii, O. Rubel, F. Jansson, and R. Österbacka	
<b>Drift Velocity and Drift Mobility Measurement in Organic Semiconductors Using Pulse Voltage</b> .....	73
Debarshi Basu and Ananth Dodabalapur	
<b>Interfaces in Organic Field-Effect Transistors</b> .....	113
Gilles Horowitz	
<b>Low-Cost Submicrometer Organic Field-Effect Transistors</b> .....	155
Susanne Scheinert, Gernot Paasch, Ingo Hörselmann, and Andrei Herasimovich	
<b>Bio-Organic Optoelectronic Devices Using DNA</b> .....	189
Thokchom Birendra Singh, Niyazi Serdar Sariciftci, and James G. Grote	
<b>Organic Field-Effect Transistors for CMOS Devices</b> .....	213
Christian Melzer and Heinz von Seggern	

<b>Theories of the Charge Transport Mechanism in Ordered Organic Semiconductors</b> .....	259
Alessandro Troisi	
<b>Charge Transport in Organic Semiconductor Devices</b> .....	301
Ling Li and Hans Kosina	
<b>Index</b> .....	325
