Contents

1 Introduction: Reminiscing on Models and Modeling  ..................  1
   Robert B. Denman

Part I   Ex Vivo Models

2 Probing Astrocyte Function in Fragile X Syndrome  ..................  15
   Shelley Jacobs, Connie Cheng, and Laurie C. Doering

3 Neural Stem Cells  ........................................................  33
   Maija Castrén

4 Fragile X Mental Retardation Protein (FMRP)
   and the Spinal Sensory System  .........................................  41
   Theodore J. Price and Ohannes K. Melemedjian

5 The Role of the Postsynaptic Density in the Pathology
   of the Fragile X Syndrome  ..............................................  61
   Stefan Kindler and Hans-Jürgen Kreienkamp

Part II   Non-mouse Eukaryote Models

6 Behavior in a Drosophila Model of Fragile X  .........................  83
   Sean M. McBride, Aaron J. Bell, and Thomas A. Jongens

7 Molecular and Genetic Analysis of the Drosophila Model
   of Fragile X Syndrome  ....................................................  119
   Charles R. Tessier and Kendal Broadie
8 Fragile X Mental Retardation Protein and Stem Cells  .......... 157
Abrar Qurashi, Xuekun Li, and Peng Jin

9 Manipulating the Fragile X Mental Retardation Proteins in the Frog ............................................................... 165
Marc-Etienne Huot, Nicolas Bisson, Thomas Moss, and Edouard W. Khandjian

10 Exploring the Zebra Finch Taeniopygia guttata as a Novel Animal Model for the Speech–Language Deficit of Fragile X Syndrome ............................................................ 181
Claudia Winograd and Stephanie Ceman

Part III  Novel Mouse Models

11 Neuroendocrine Alterations in the Fragile X Mouse ............ 201
Abdeslem El Idrissi, Xin Yan, William L’Amoreaux, W. Ted Brown, and Carl Dobkin

12 Taking STEPs Forward to Understand Fragile X Syndrome ...... 223
Susan M. Goebel-Goody and Paul J. Lombroso

13 Fmr-1 as an Offspring Genetic and a Maternal Environmental Factor in Neurodevelopmental Disease ......................... 243
Bojana Zupan and Miklos Toth

14 Mouse Models of the Fragile X Premutation and the Fragile X Associated Tremor/Ataxia Syndrome ........................... 255
Michael R. Hunsaker, Gloria Arque, Robert F. Berman, Rob Willemsen, and Renate K. Hukema

Part IV  The Human Model

15 Clinical Aspects of the Fragile X Syndrome ...................... 273
W. Ted Brown

16 Fragile X Syndrome: A Psychiatric Perspective ................... 281
Michael R. Tranfaglia

17 Fragile X Syndrome and Targeted Treatment Trials ............... 297
Randi Hagerman, Julie Lauterborn, Jacky Au, and Elizabeth Berry-Kravis
