Contents

Chapter 1 The Formation of the Sun and Planets ....................... 1
  The Sun’s Protoplanetary Infancy .................................................. 8
  From Disks to Planets ................................................................. 22

Chapter 2 Formation and Early Infancy of the Earth .................. 37
  The Rapid Differentiation of a Metallic Nucleus: The Core ............. 40
  Opening a Protective Umbrella:
    the Birth of the Earth’s Magnetic Field .................................... 46
  A Partially Molten Earth:
    the Magma Ocean Assumption .................................................. 46
  The Birth of the Outer Shells: The Atmosphere and the Hydrosphere .... 53
  The Conclusion: a Planet That Was Undoubtedly Uninhabitable .......... 59

Chapter 3 Water, Continents, and Organic Matter... .................. 61
  The Two Faces of the Earth’s Crust .............................................. 63
  The Fabulous Story Told by the Jack Hills Zircons ..................... 66
  The Atmosphere Between 4.4 and 4.0 Ga: An Outline .................... 73
  From the Atmosphere to the Bottom of the Oceans:
    Was the Earth Rich in Organic Matter? ..................................... 79
    Was a Niche for Life Available as Early as This? ....................... 89

Chapter 4 Intermezzo: The Gestation of Life and its First Steps ... 93
  From Chemistry to Biology ....................................................... 96
  The Unavoidable Question: What is Life? ................................... 100
  The Origins of Metabolism ....................................................... 103
  The Origin of Genetic Systems .................................................. 110
  The Origin of Compartments ..................................................... 121
  A Final Word on the Gestation of Life ....................................... 124
  The Last Common Ancestor of All Existing Organisms: a Portrait .... 129
  The Earliest Diversification of Life ........................................... 143

Chapter 5 The Late Heavy Bombardment ................................. 155
  In Search of the Lost impacts ................................................... 156
  Late, or Continuous, Bombardment? The Two Competing Scenarios .... 160
  The Late Heavy Bombardment: a Cataclysmic Scenario ................. 161
Young Sun, Early Earth and the Origins of Life
Lessons for Astrobiology
Gargaud, M.; Martin, H.; López-García, P.; Montmerle, T.; Pascal, R.
2012, XII, 301 p. 303 illus., 250 illus. in color., Softcover
ISBN: 978-3-642-22551-2
