

Contents

An Adaptive Sparse Grid Approach for Time Series Prediction	1
Bastian Bohn and Michael Griebel	
Efficient Analysis of High Dimensional Data in Tensor Formats	31
Mike Espig, Wolfgang Hackbusch, Alexander Litvinenko, Hermann G. Matthies, and Elmar Zander	
Sparse Grids in a Nutshell	57
Jochen Garcke	
Intraday Foreign Exchange Rate Forecasting Using Sparse Grids	81
Jochen Garcke, Thomas Gerstner, and Michael Griebel	
Dimension- and Time-Adaptive Multilevel Monte Carlo Methods	107
Thomas Gerstner and Stefan Heinz	
An Efficient Sparse Grid Galerkin Approach for the Numerical Valuation of Basket Options Under Kou’s Jump-Diffusion Model	121
Michael Griebel and Alexander Hullmann	
The Use of Sparse Grid Approximation for the r-Term Tensor Representation	151
Wolfgang Hackbusch	
On Multilevel Quadrature for Elliptic Stochastic Partial Differential Equations	161
Helmut Harbrecht, Michael Peters, and Markus Siebenmorgen	
Local and Dimension Adaptive Stochastic Collocation for Uncertainty Quantification	181
John D. Jakeman and Stephen G. Roberts	
The Combination Technique for the Initial Value Problem in Linear Gyrokinetics	205
Christoph Kowitz, Dirk Pflüger, Frank Jenko, and Markus Hegland	

Model Reduction with the Reduced Basis Method and Sparse Grids 223
Benjamin Peherstorfer, Stefan Zimmer, and Hans-Joachim
Bungartz

Spatially Adaptive Refinement 243
Dirk Pflüger

**Asymptotic Expansion Around Principal Components and the
Complexity of Dimension Adaptive Algorithms** 263
Christoph Reisinger
